

**‘EXAMPLE AGENCY’**

**TERRITORY AUTHORITY SECTION**

**FOR THE YEAR ENDED 30 JUNE 2010**

## Territory Authority Section (TAS)

### BACKGROUND

In recent years, the content appearing in the Department Model and the Territory Authority Model has been substantially the same, and as a result, the Territory Authority model and Department Model have for the year ended 30 June 2010, been combined into one model, for an 'Example Agency' which will service both ACT Departments and Territory Authorities.

There are some items that affect only Departments. These items are mentioned/disclosed within the combined model accompanied with an indication that such items relate only to an ACT Department. Whereas, those items which relate solely to Territory Authorities are cross referenced from the combined model to this section and provided below.

Therefore, Territory Authorities will need to use both the Model and the TAS (where applicable) when preparing their Financial Statements.

#### Colours

Where the information below is provided on a white background, the Territory Authority specific changes affect the disclosures required in the actual note. Where the information is provided on a green background, the Territory Authority specific changes affect the commentary as provided in the combined model. Information appearing on a grey background give Authorities a brief reason of why the information appears in this section and directs the authority to the changes which may appear in the note (ie white background) or commentary (ie green background).

Where there are items that are specific to a Territory Authority and as such do not appear in the Combined Model, they appear in the TAS in **Red** text. In addition, where there are items in the combined model that only apply to Departments, and/or apply differently to Territory Authorities they may appear in the TAS in ~~Red-strikethrough~~ text.

#### Reference Table

The below table shows which statements and notes are applicable to Departments and Territory Authorities. It also shows which statements and notes contain additional Territory Authority specific material, and which appears in the TAS.

## TAS 1. STATEMENT OF RESPONSIBILITY

### Statement of Responsibility

In my opinion, the financial statements are in agreement with the Agency's accounts and records and fairly reflect the financial operations of the Agency for the year ended 30 June 2010 and the financial position of the Agency on that date.

Bob Jones  
Chief Executive *Officer [or Chair person]*  
'Example Agency'  
July 2010

#### Reference

#### Reasons for the inclusion in Territory Authority Section

- Guidance provided in the combined model indicates that the Statement of Responsibility is needed to be signed by the Chief Executive. As Territory Authorities don't have Chief Executives an amended statement of responsibility (above) and additional guidance is provided (below).

#### Commentary – Statement of Responsibility

FMA Section 64

The *Financial Management Act 1996* (FMA) requires the Chief Executive **Officer** to attach a 'Statement of Responsibility' to the financial statements. The statement is to be signed by the Chief Executive **Officer where the Authority does not have a governing board. However, where the Authority has a governing board the Chair of that board must sign the statement.**

The 'Statement of Responsibility' must include a statement of the Chief Executive **Officer or Chairman's** responsibility for the preparation of the annual financial statements and the judgements exercised in preparing it. The statement must also state whether in the opinion of the responsible Chief Executive **Officer or Chairman**, the financial statements fairly reflect the financial operations of the Authority during the reporting period and the financial position of the Authority at the end of the reporting period. The name of the Chief Executive **Officer** of the Authority must be clearly printed on the statement.

## TAS 2. OPERATING STATEMENT (CONTINUED)

### Reference

#### Reasons for the inclusion in Territory Authority Section

- The Operating Statement for Territory Authorities may differ slightly from that of Departments due to the fact that most Territory Authorities will require a line item for their *Cost of Goods Sold* (and any other) expense(s); and
- An Authority's budget numbers are based on the numbers presented in the Authority's Statement of Intent, whereas a Department's is based on the numbers presented in the 2009-10 Budget Papers.

As a result, an amended Operating Statement (above) and additional guidance is provided (below).

#### Commentary – Operating Statement

##### Title of the Operating Statement

AASB 101 para 81 (a)

Where a Territory Authority is for-profit it will have to call the 'Operating Statement' a 'Statement of Comprehensive Income'.

##### Appropriate Notes

AASB 101 para 85

In some cases it may be more appropriate to disclose different expense and revenue classes as needed on the operating statement. For example, *Cost of Goods Sold* may be more appropriate to Territory Authorities whereas *Grants and Purchased Services*, may not apply. Where this is the case an appropriate note should also accompany the line item presented.

##### Budget

FMA Section 63(2)  
ACT Accounting Policy

Budget numbers appearing in the Operating Statement are based on the Authority's Statement of Intent.

#### Reasons for the inclusion in Territory Authority Section

- The Balance Sheet for Territory Authorities may differ slightly from that of a Department's due to the fact that most Territory Authorities will require an additional equity line item for *Contributed Equity*.
- An Authority's budget numbers are based on the numbers presented in the Authority's Statement of Intent, whereas a Department's is based on the numbers presented in the 2009-10 Budget Papers.

As a result, an amended balance sheet (above) and additional guidance (below) is provided.

#### Commentary – Balance Sheet

Some Territory Authorities will need to include a *Contributed Equity* line in the Equity section of the Balance Sheet. Where this is the case, the Statement of Changes in Equity will also require an additional column to correspond with this component of Equity.

#### Budget

Budget numbers appearing in the Balance Sheet are based on the Authority's Statement of Intent.

The above Cash Flow Statement should be read in conjunction with the accompanying notes.

#### Reasons for the inclusion in Territory Authority Section

- Due to the fact that an Authority generally operates for-profit and/or has different activities than a Department, the Cash Flow Statement for Territory Authorities will differ slightly from that of a Department's by including different lines items (e.g. Territory Authorities may require *Cost of Goods Sold* and *Goods and Services Tax remitted to the ATO*, whereas Departments generally don't);
- Due to the fact that some Territory Authorities, may have more income which includes GST, it is more likely that Authorities will be required to make payments to the ATO, and therefore may require an alternative line *Goods and Services Tax remitted to the ATO*; and
- A Territory Authority, of which some are part of the National Tax Equivalents Regime, has additional requirements on such payments, whereas Departments are not part of that regime.

As a result, an amended Cash Flow Statement is provided above and additional guidance is provided below.

For example, payments related to Cost of Goods Sold may be more appropriate to Territory Authorities.</p> <p>AASB 107 para 14 (f) Territory Authorities will most likely need to include a payment line relating to GST remitted to the ATO. Where payments are greater than any refunds for any given year, the line <i>Goods and Services Tax remitted to the ATO</i> should replace the line <i>Goods and Services Tax Input Tax Credits from the Australian Taxation Office</i>. In most cases, an Authority would have either a ‘<i>Goods and Services Tax Input Tax Credits from the Australian Taxation Office</i>’ line or a ‘<i>Goods and Services Tax Remitted to the Australian Taxation Office</i>’ depending on whether the Authority generally is in a refund or payment situation with the ATO. In the event that refunds are greater one year and payments are greater the next (or vice versa) both lines will be required.</p> <p><b>Classification of Income Tax Cash Flows</b></p> <p>AASB 107 para 35 In the rare circumstance, where an Agency has to pay income tax (because of the National Tax Equivalents Regime), cash flows relating to income taxes shall be disclosed separately and classified as operating activities unless they can be specifically identified with investing and financing activities.</p>

	<p><b>Reasons for the inclusion in Territory Authority Section</b></p> <ul style="list-style-type: none"> <li>AASB 116 requires different disclosures based on whether an agency operates on a for-profit or not-for-profit basis. All Departments are not-for-profit, and as a result the guidance provided in Note 26 within the model only applies to not-for-profit agencies.</li> </ul> <p>Therefore, Territory Authorities should follow the additional note disclosure above and guidance provided below, as determined by their individual for-profit or not-for-profit status.</p>																					
	<b>Commentary – Note 26: Property, Plant &amp; Equipment</b>																					
AASB 116 para 77(e)	Territory Authorities that are for-profit will be required to disclose for each revalued class of property, plant and equipment, the carrying amount that would have been recognised had the assets been carried under the cost model. An example disclosure is presented above. For-profit Territory Authorities should include this disclosure at the end of their Property, Plant and Equipment note.																					
AASB 116 para AUS 77.1	Territory Authorities which are not-for-profit are not required to make this disclosure.																					
	<b>Treatment of Revaluation Decrements</b>																					
AASB 116 para Aus 40.1	Revaluation decrements are expensed when a particular asset (of for-profit Territory Authorities), or class of assets (of not-for-profit Territory Authorities), has/have been revalued downwards and there is no amount in the Asset Revaluation Surplus for the revaluation to be offset against.
