Financial Statement Guidelines for Agencies

1.1 PREFACE

The Model Financial Statements (Model) have been developed to assist agencies with the preparation of their annual financial statements.

The Model is designed to clearly explain presentational requirements within the current reporting framework of the Territory. Disclosures contained in the Model should only be included in an agency's financial statements if they are applicable and material. For example, where an agency does not have any investment properties, the investment property note disclosure contained in the Model should not be included in the agency's financial statements. Additional disclosure should also be included where the information is considered to enhance the comprehension of the financial statements and is of relevance to primary users. The requirements in this Model are effective for the year ending 30 June 2023.

The Model illustrates the consistency and quality of financial information considered necessary to meet the information needs of primary users. The Model is a set of 'general purpose financial statements' which are concerned with providing information to meet the common needs of primary users who rely on information communicated to them by an agency's financial statements. One of the primary users is considered to be the Legislative Assembly.

The Model is based on the following principles:

- Accountability Directors-General are accountable for the efficient and effective use of resources for which they are responsible and the safekeeping of public monies. The financial statements are to disclose information relevant to assessing their performance in this respect.
- Compliance The financial statements must disclose the information required by legislation and the applicable Australian Accounting Standards.
- Comparability The financial statements are to provide operational information that is comparable between periods and between agencies.

The Model 'Burley Griffin Agency' is a fictitious agency and has only been used for the purposes of illustrating the financial reporting requirements for ACT Government agencies.

1.2 MATERIALITY GUIDANCE

Agencies are encouraged to consider materiality in preparing and streamlining their financial statements. AASB 101 defines information as material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make based on those financial statements, which provide financial information about a specific reporting entity. The definition of materiality includes a reference to 'obscured'. Information is obscured if it is communicated in a way that would have a similar effect to primary users of omitting or misstating that information. The following are examples of circumstances that may result in material information being obscured:

- information regarding a material item, transaction or other event is disclosed in the financial statements but the language used is vague or unclear;
- information regarding a material item, transaction or other event is scattered throughout the financial statements;
- dissimilar items, transactions or other events are inappropriately aggregated;
- similar items, transactions or other events are inappropriately disaggregated; and
- the understandability of the financial statements is reduced as a result of material information being hidden by immaterial information to the extent that a primary user is unable to determine what information is material.

1.2 MATERIALITY GUIDANCE – CONTINUED

The concept of materiality means that a specific disclosure requirement in an Australian Accounting Standard need not be satisfied if the information resulting from that disclosure is not material. This is the case even if the Australian Accounting Standard contains a list of specific requirements or describes them as minimum requirements. Alternatively, where an item is not specifically required to be disclosed by an Australian Accounting Standard but is material, it shall be disclosed in either the financial statements or in the notes to the financial statements, whichever one is appropriate to enable primary users of financial statements to understand the impact of particular transactions, other events and conditions.

The AASB Practice Statement 2 *Making Materiality Judgements* should be used by agencies in their assessment of materiality. Making materiality judgements involves both quantitative and qualitative considerations. A quantitative threshold - a specified level, rate or amount used in assessing size - can be a helpful tool in making a materiality judgement. However, a quantitative assessment alone is not always sufficient to conclude that an item of information is not material. The entity should further assess the presence of qualitative factors.

Materiality depends on the size and nature of the omission or misstatement judged in the surrounding circumstances. The size or nature of the item, or a combination of both, could be the determining factor. Assessing whether an omission or misstatement could influence economic decisions of primary users, and so be material, requires consideration of the characteristics of those users. AASB 101 states that the "financial statements are prepared for users who have a reasonable knowledge of business and economic activities and who review and analyse the information diligently. At times, even well-informed and diligent users may need to seek the aid of an adviser to understand information about complex economic phenomena". As such, users are assumed to have a reasonable financial knowledge and a willingness to study the information with due diligence. Therefore, the assessment needs to consider how users with such attributes could reasonably be expected to be influenced in making economic decisions.

AASB 101 *Presentation of Financial Statements* clarifies that entities should not disclose immaterial information in their financial statements and that the presentation of information in notes can and should be tailored to provide primary users with the clearest story of an entity's financial performance and financial position. Agencies are strongly encouraged to undertake an annual assessment with the view to further simplify the presentation of their financial statements.

1.2.1 BENEFITS OF STREAMLINED FINANCIAL REPORTING

Benefits of financial statement simplification include:

- improving the readability of the financial statements. Readability improves when there is less detail included regarding immaterial balances and more of a focus is placed on material information;
- reducing financial statement preparation time due to the ability to use system solutions to assist with the identification of notes and line items that are material from those that may not be material, as well as reducing the size of the financial statements that need preparation and review; and
- reducing the level of unnecessary work required during the audit process.

1.2.2 GENERAL GUIDANCE

Agencies need to exercise judgement when assessing whether information is material to the financial statements. The following quantitative and qualitative criteria may be applied in the assessment process:

- size or dollar amount of the item;
- nature of the item;
- whether the agencies' results cannot be understood without the specific disclosure;
- reporting requirement associated with the item (i.e. it needs to be disclosed to comply with a reporting requirement, regardless of the amount); and/or
- it is required to meet the needs of a primary user.

1.2.2 GENERAL GUIDANCE – CONTINUED

The following generally accepted quantitative benchmarks may be applied by agencies in assessing materiality:

- below 5 per cent of the applicable benchmark is assumed to be immaterial, unless disclosure is required by legislation, policy, specific stakeholder requirements or qualitative materiality considerations;
- between 5 per cent and 10 per cent of the applicable benchmark needs to be considered in the context of qualitative materiality criteria or specific stakeholder requirements; and
- over 10 per cent of the applicable benchmark is deemed material.

While there is no 'one size fits all' approach to streamlining financial statements, the following guidance should be considered, to determine when to:

- provide separate line items on the face of the financial statements (i.e. Operating Statement, Balance Sheet, Statement of Changes in Equity and Statement of Cash Flows);
- provide separate note disclosures for a face statement line item;
- reduce immaterial detail provided in separate note disclosures; and
- provide explanations for variances between prior and current year actual figures.

As circumstances change over time, materiality judgements should be reassessed at each reporting date.

1.2.3 REQUIREMENT FOR SEPARATE LINE ITEMS ON THE FACE OF THE FINANCIAL STATEMENTS

Face statement line items which are less than 10 per cent of the relevant category total (a category is for instance total Income, Expenses, Assets, Liabilities, Equity, Receipts from Operating Activities, Payments from Operating Activities, Receipts from Investing Activities, Payments from Financing Activities or Payments from Financing Activities) may be aggregated with other line items. An item that is not sufficiently material to warrant separate presentation on the face of the statements may still warrant separate presentation in the notes.

Agencies may also consider re-naming line items where it represents only one type of transaction (e.g. where 'other assets' only include prepayments; agencies may change the name of the line item to 'prepayments'). Agencies need to be mindful that when considering changing the name of a line item on the face of the financial statements in the Annual Report this still needs to be comparable to the financial statements in the Budget Papers (as per section 27(2) and section 63(2) of the FMA).

Agencies need to refer to the commentary in the Model for further guidance on aggregation of line items on the face of the financial statements.

1.2.4 REQUIREMENT FOR SEPARATE NOTE DISCLOSURES

Face statement line items which are less than 10 per cent of that category's total (a category is for instance total Income, Expenses, Assets, Liabilities or Equity), may not require separate note disclosure. The intention being that small value line items will be shown at the face statement level only. However, for these line items, if the variance between the current and prior year actual values is greater than the threshold for variance explanations (refer section on '*Variance explanations between Current and Prior Year Figures'*), a separate note with the variance explanation may be required. Alternatively, an agency could provide a variance explanation at the bottom of the relevant face statement (i.e. the Operating Statement, Balance Sheet, Statement of Changes in Equity and Statement of Cash Flows), thereby not necessitating a separate note.

A separate note is not required if the item is assessed as not material (following evaluation of quantitative and qualitative materiality factors) and/or the note only restates the information that is on the face of the financial statements and does not provide any additional information.

These thresholds are a guide only and agencies need to determine the most appropriate thresholds specific to their financial statements.

1.2.5 DETAIL IN SEPARATE NOTE DISCLOSURES

Within notes, any line item less than 10 per cent of that note total, may be grouped with another appropriate line and labelled accordingly. Where the line 'Other' is used, it should not represent any more than 10 per cent of the note total. The intention is that line items in notes are reduced and material items remain visible.

Agencies may restate prior year line items within the notes to accommodate for this simplification (i.e. a higher level of aggregation), however, the totals in each note will remain the same as the published prior year amount. Where an agency restates prior year line items within the notes, it is recommended that a brief explanation by way of a footnote be included in the note that outlines this change and the reason the change has been made.

1.2.6 EXCEPTIONS TO THE GENERAL GUIDANCE ON MATERIALITY (OUTLINED IN SECTION 1.2.2 ABOVE)

As specified in the Model, some disclosures are required by the ACT disclosure policy regardless of the amount or the threshold for disclosure, such as waivers, write-offs, act of grace payments and compensation to key management personnel. However, if a prior period error is discovered in relation to any of these items, then the error would have to be material by amount for a correction of a prior period error disclosure to be included in the 'Change in Accounting Policy and Accounting Estimates, and Correction of a Prior Period Error' Note.

Exceptions may also need to be made despite the threshold tests to ensure the most appropriate information is presented in agencies financial statements for the benefit of primary users. However, this is a matter for agency judgement on specific disclosures.

1.2.7 VARIANCE EXPLANATIONS BETWEEN CURRENT, BUDGET AND PRIOR YEAR FIGURES

Agencies are to include concise explanations of major variances between the current, budget and prior year for material amounts in the financial statements. Variance explanations included in each individual note are between current and prior year actuals. Variance explanations between actual and budget figures are generally contained in the Budgetary Reporting Note. Variance explanations included in the notes form part of the audited financial statements. Variance explanations should identify the reason for the variance and must be able to be independently verified. As far as practicable, variance explanations should be written in plain English.

Variances are considered to be material variances if both of the following criteria are met:

- the line item is a significant line item: where either the line item actual amount accounts for more than 10% of the relevant associated category (Income, Expenses, Assets, Liabilities and Equity totals) or more than 10% of the sub-element (e.g. Current Liabilities and Receipts from Operating Activities totals) of the financial statements; and
- the variances (original budget to actual and current year actual to prior year actual) are greater than plus (+) or minus (-) 10% and \$500,000 of the budget for the financial statement line item for smaller agencies and greater than plus (+) or minus (-) 10% and \$15 million for large agencies.

Small agencies include Office of the Legislative Assembly, ACT Audit Office, Legal Aid Commission, Public Trustee and Guardian, Cultural Facilities Corporation, Cemeteries and Crematoria Authority, ACT Gambling and Racing Commission, Independent Competition and Regulatory Commission, Motor Accident Injuries Commission, ACT Electoral Commission, ACT Integrity Commission, ACT Executive, ACT Long Service Leave Authority, Building and Construction Industry Training Fund Authority, CIT Solutions Pty Ltd, Lifetime Care and Support Fund, and Office of the Work Health and Safety Commissioner.

Large agencies include Chief Minister, Treasury and Economic Development Directorate, Canberra Health Services, Transport Canberra and City Services Directorate, Housing ACT, Justice and Community Safety Directorate, Education Directorate, Community Services Directorate, Transport Canberra Operations, Environment, Planning and Sustainable Development Directorate, ACT Local Hospital Network, City Renewal Authority, Suburban Land Agency, Health Directorate, Public Sector Workers Compensation Fund, Major Projects Canberra, ACT Insurance Authority, Canberra Institute of Technology, Territory Banking Account and Superannuation Provision Account.

These thresholds are indicative only and are included to assist agencies' in making judgement on whether an explanation is required.

1.2.8 CONSULTATION WITH AUDIT COMMITTEE AND THE AUDIT OFFICE

Each agency will need to exercise judgement in determining appropriate thresholds for disclosures in their financial statements. Agencies are encouraged to agree their specific thresholds for disclosures along with exceptions with their Audit Committee in the process of developing their financial statements. Once the thresholds and exceptions have been determined, agencies should liaise with the ACT Audit Office to ensure they consider these thresholds and exceptions are appropriate.

1.2.9 IMPACT OF THE COVID-19 PANDEMIC

Although the affects of COVID-19 in the ACT have reduced, there can still be impacts on agencies' financial statements, including disclosures. In particular, agencies need to assess the ongoing impacts of specific actions undertaken by the ACT Government and Commonwealth in their response to COVID-19. For instance, determining the appropriate financial period in which to reflect the costs and liabilities associated with a policy intervention. Areas still impacted could include expected credit losses on receivables, the fair value of assets and events after the reporting period. Agencies can seek further guidance on COVID-19 contained in the ACT Disclosure Paper on COVID-19 disclosures and workpapers.

1.3 WHAT'S NEW

1.3.1 CHANGES TO THE MODEL RESULTING FROM ACCOUNTING STANDARD CHANGES

Impact of Accounting Standards Issued but yet to be Applied

Note 3 *Change in Accounting Policy and Accounting Estimates, and Correction of a Prior Period Error* includes updated wording when compared to last year's Model Financial Statements. However, this wording is currently being reviewed by the Financial Reporting and Framework Branch and further updated wording will be provided to agencies in AADP 307 *ACT Accounting Disclosure Paper on the AASB Standards Issued but yet to be Applied*. This paper will be released in June this year and the updated wording in the paper should be adopted by agencies, where appropriate, rather than the wording included in Note 3 in the Model.

In addition to the example wording for inclusion in Note 3, the paper will also provide background information in relation to all standards issued but yet to be applied and the likely impact of those standards on ACT Government agencies.

Agencies are required to disclose known or reasonably estimable information relevant to assessing the possible impact that the application of these standards will have on the agency's financial statements in the period of initial application (AASB 108.30).

1.3.2 CHANGES TO THE MODEL RESULTING FROM STREAMLINING AND DECLUTTERING

In 2021-22 the Financial Reporting and Framework Branch undertook a major review of the Model. The amendments to the Model that resulted from the review did not come about from changes in accounting standards but rather represented improvement to the Model. The amendments had to be made in two parts. The first lot of amendments were made to last year's Model (2021-22), with the second lot of amendments made to this year's Model (2022-23). The amendments had to be made in two parts due to some of them relating to the face of the financial statements and requirement of the Financial Management Act that annual financial statements of an agency must be prepared in a form that facilitates a comparison between financial operations of the agency during the reporting period and the estimates of those operations contained in the budget. Therefore, the changes to the face of the statements were required to be made in the 2022-23 Budget first and then to the Model.

The second lot of amendments to the Model have resulted in a number of changes to the financial statements and consequential changes to the notes. The information below outlines the main changes which have occurred when compared to the 2021-22 Model. It is not an exhaustive list and represents the major changes only. Individual wording changes to the 2022-23 Model can be seen throughout the document given they have been identified using different colours. These are as follows:

- Red text with strikethrough Identifies line items/wording that have been deleted from the Model. That is, wording which appears in the 2021-22 Model but does not appear in the 2022-23 Model;
- Red text Identifies line items/wording that has been inserted/changed in the Model. That is, wording which did not appear in the 2021-22 Model but does appear in the 2022-23 Model;
- green text is 2021-22 Model text that has been moved <u>from</u> somewhere else in the 2022-23 Model; and
- green text with strikethrough is 2021-22 Model text that has been moved to somewhere else in the 2022-23 Model.

1.3.2 CHANGES TO THE MODEL RESULTING FROM STREAMLINING AND DECLUTTERING – CONTINUED

General Changes

Where possible, disclosures in the Model have been removed or combined to assist with decluttering.

Changes to the Face of Statements

Agencies are reminded that these changes only need to be made if they are relevant:

Statement	Change
Operating Statement	Remove – The distinction between Revenue and Gains on the face of the Operating Statement. There is now just a single heading for Income.
	Combine – Other Revenue and Other Gains into one single line item Other Income.
	Remove – the Superannuation Expense line item. All superannuation expenses are now included in the Employee Expenses line item.
	Rename Total Other Comprehensive Income/(Deficit) to Total Other Comprehensive Result.
	Rename Total Comprehensive Income/(Deficit) to Total Comprehensive Result.
Balance Sheet	Replace – the Cash and Cash Equivalents line item with a Cash and Investments line item.
	Remove – the Contract Assets line item. All contract assets are now included in the Receivables line item.
	Remove – the Contract Liabilities line item. All contract liabilities are now included in the Payables line item.
Statement of Changes in Equity	Remove – the Restatement of Opening Equity Section at the beginning of the Statement of Changes in Equity.
	Include – a Net Assets transferred in/(out) Other Agencies line item.
	Rename – Other Comprehensive Income to Other Comprehensive Result.
	Rename – Total Comprehensive Income to Total Comprehensive Result.
Statement of Cash Flows	Change – The Employee line item will now be referred to as the 'Employee Payments' line item.
	Remove – the Superannuation line item. All superannuation payments are now included in the Employee Payments line item.
	Include – a Purchase of Capital Works line item and a Purchase of Intangibles line item.
Output Class Operating Statements	Remove – The distinction between Revenue and Gains on the face of the Operating Statement. There is now just a single heading for Income.
	Combine – Other Revenue and Other Gains into one single line item Other Income.
	Remove – the Superannuation Expense line item. All superannuation expenses are now included in the Employee Expenses line item.

1.3.2 CHANGES TO THE MODEL RESULTING FROM STREAMLINING AND DECLUTTERING – CONTINUED

Changes to the Notes

Note	Change
Note 3 Impact of Accounting Standards Issued but yet to be Applied	Standards issued but not yet applied disclosure wording has been updated.
Note 6 Grants and Contributions Revenue	Inclusion of Resources Provided Free of Charge disclosures.
Note 7 Investment and Interest Revenue	Updated the Description and Material Accounting Policies for 'Interest Revenue' and 'Unwinding of Concessional Loans Discount Revenue' and combining these two line items into a single line item called 'Interest Revenue from Concessional Loans'.
	Additional guidance has been included in the commentary regarding the split of investment and interest revenue.
Note 10 Employee Expenses	The employee expenses and superannuation expenses split no longer required, due to the changes made to the face of the Operating Statement.
Note 12 Grants and Purchased Services	Additional guidance has been included in the commentary regarding Concessional Loan Discount Expense.
Note 13 Borrowing Costs	Concessional loans payable disclosures have now been included.
Note 15 Cash and Investments	Change in note title. Additional guidance has been included in the commentary regarding the title of the note where an agency does not have any investments.
Note 16 Receivables	Change in note title.
	Additional wording has been included in the Description and Material Accounting Policies section relating to Loans Receivable (including a change in Expected Credit Loss methodology).
	Reference to 'Allowance for Impairment Losses' has changed to 'Expected Credit Loss Allowance'.
Note 19 Property, Plant and Equipment	Introduction of additional asset classes.
Note 21 Intangibles	The useful life which software can be amortised over has increased from 5 years to 10 years.
	This change has been made given it is considered appropriate that some software assets be amortised over a period of up to 10 years by ACT Government agencies, rather than only five. As such, the Intangibles Asset Policy Paper now allows agencies to use a useful life for Software assets of up to 10 years. For further information refer to AAPP 115 ACT Accounting Policy Paper on Intangible Assets : Software on the Accounting in the ACT Government - Treasury website.
Note 24 Payables	Change in note title.

1.3.2 CHANGES TO THE MODEL RESULTING FROM STREAMLINING AND DECLUTTERING – CONTINUED

Note	Change
Note 25 Borrowings	Updated the Description and Material Accounting policies for ACT Government Borrowings.
Note 30 <i>Restructure of Administrative</i> Arrangements	The Description and Material Accounting Policies Relating to Restructure of Administrative Arrangements section has been added.
	Additional wording included stating that amounts need to be agreed with the transferor prior to the transfer.
Note 31 Financial Instruments	Additional wording included for the credit risk disclosure.
Note 32 Capital and Other Expenditure Commitments	The Description and Material Accounting Policies Relating to Capital and Other Expenditure Commitments section has been added.
Territorial Statements and Notes	Similar changes listed above have been made to the Territorial Statements where applicable.
Changes Effecting Various Notes:	
 changes to the COVID-19 disclosures 	Updates to the COVID-19 wording included in notes to reflect the changing circumstances within the ACT Community.

1.4 APPLICATION

Prescription of a common format for financial statements assists with the comparability of information across ACT Government agencies. The format and content prescribed in the Model is to be followed, taking into account relevance and materiality considerations. It is recognised that disclosure of information in notes will need to be adapted to the specific needs of each agency. However, the content and format requirements are to be complied with, where applicable.

Section 27 and section 63 of the *Financial Management Act 1996* (FMA) requires directorates and territory authorities respectively to prepare their annual financial statements in accordance with Australian Accounting Standards. The Model is considered to meet the reporting requirements of the FMA.

Where the Model refers to an agency, this shall be taken to include directorates and territory authorities.

ACT Accounting Policies relating to recognition and measurement are incorporated in ACT Accounting Policy Papers, which are available on the ACT Accounting website at www.act.gov.au/accounting. However, ACT Accounting Policies relating to disclosures are included in the Model as well as any ACT Accounting Disclosure Papers issued by the Financial Reporting and Framework Branch (which are also included on the ACT Accounting website).

1.5 ACCOUNTING STANDARDS AND GUIDANCE RELEASES

The Model incorporates, as appropriate, Australian Accounting Standards and Accounting Interpretations as prepared by the Australian Accounting Standards Board (AASB).

If an agency is of the view that the Model does not comply with the accounting standards, accounting interpretations, or the FMA, this should be brought to the attention of the Financial Reporting and Framework Branch in the Chief Minister, Treasury and Economic Development Directorate immediately.

1.6 ADAPTING THE MODEL TO INDIVIDUAL AGENCY REQUIREMENTS

1.6.1 DECLUTTERING FINANCIAL STATEMENTS

Agencies need to continue their efforts in further streamlining and decluttering their financial statements by removing immaterial, duplicate or irrelevant disclosures that have built up over time. Agencies need to apply judgement in determining which disclosures could be omitted. Agencies need to consider the Materiality Guidance at Section 1.2 in making this assessment.

1.6.2 PRESENTATION

When an agency is formatting its financial statements, the 'reference' column on the left-hand side of the Model and the commentary notes are <u>not</u> to be included. The commentary notes are also <u>not</u> to be included in an agency's financial statements.

Where an accounting standard requires a line item to be included in the financial statements, but the agency does not have any current year, prior year or original budget figures against this line item, the line item need not be disclosed in the financial statements. The exceptions to this are the net cash inflows / (outflows) sub-totals in the Statement of Cash Flows and where indicated in the commentary to a statement or note. For completeness, all 3 subtotals (for operating, investing and financing activities) should be displayed.

If an item is not material, it need not be shown as a separate line item in the statements.

1.6.3 NOTE DISCLOSURES

The primary purpose of the Model is to illustrate how the most commonly applicable disclosure requirements for ACT Government agencies can be met. Agencies should consider their own specific circumstances when determining which disclosures to include.

Not all note disclosures in the Model will apply to every agency, so agencies must decide which notes are necessary. While the Model has been developed to be as inclusive as possible, not all situations that may be encountered by agencies have been addressed. Therefore, agencies must ensure that their financial statements meet the requirements outlined in the relevant accounting standards bearing in mind the materiality guidance in Section 1.2.

The notes contained in the Model are considered to be 'best practice'. Agencies do have discretion to alter the Model notes to meet specific needs, so long as the applicable content requirements are still complied with. This is particularly the case with definitions and line item descriptions.

The breakdown of statement line items contained in various notes (e.g. Note 11 *Supplies and Services* and Note 14 *Other Expenses*) need to be tailored to the requirements of each agency. All material amounts are to be individually disclosed in these notes.

Throughout the notes in the Model, brackets have been used to prompt preparers to adopt agency specific policy. The following brackets < > have been used to highlight that the numbers in them are not specific accounting policy requirements and hence each agency needs to insert its applicable accounting policy. Agencies may adopt the number used in the brackets where it is appropriate to do so. An example of this is property, plant and equipment with a minimum value of <\$5,000> being capitalised. Agencies are required to substitute the \$5,000 amount if they use a different capitalisation threshold.

Given the Territory Authority Section (TAS) has been withdrawn and the information incorporated into the Model, any text that specifically relates to territory authorities will be included in [] in blue text in the Model. In the commentary sections, territory authority information is included under a separate heading.

1.6.4 COMPARATIVE FIGURES FOR NEW AGENCIES

Where an agency first commences activities in the current financial reporting period, that agency need not disclose comparative figures in its financial statements. Where a new agency has been created and other agencies have been merged or amalgamated into the new agency, advice regarding comparatives should be sought from the Financial Reporting and Framework Branch in the Chief Minister, Treasury and Economic Development Directorate.

1.7 CONSOLIDATION

Agencies with control over another entity must prepare consolidated financial statements in accordance with AASB 10 *Consolidated Financial Statements* for the agency and all entities it controls.

'An investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee' (AASB 10.6).

1.8 CERTIFICATION

1.8.1 INDEPENDENT AUDITOR'S REPORT

The independent auditor's report on an agency's financial statements must be attached to the front of the statements, directly before the Statement of Responsibility by the Director-General (D-G)/Chief Executive Officer or Chairperson.

1.9 SUBMISSION DATE FOR FINANCIAL STATEMENTS

The Chief Minister's Annual Report Directions require agencies to submit their annual financial statements to the Auditor-General and the Chief Minister, Treasury and Economic Development Directorate (CMTEDD) no later than the dates specified in the timetable issued by CMTEDD, in order to meet the whole-of-government financial reporting deadline. The Statement of Responsibility is required to be signed by the D-G/CEO or Chairperson any time before the audit opinion, is provided by the Auditor-General. However, to ensure there is no loss of quality, the official draft financial statements need to be reviewed by the relevant Internal Audit Committee and authorised for issue to the Auditor-General by the D-G/CEO or Chairperson. Agencies should work with the Audit Office to facilitate the supply of earlier draft information wherever possible to assist in achieving a timely audit outcome.

CMTEDD issues a timetable each year that provides the dates when:

- agencies are to provide annual financial statements to the Audit Office; and
- the final audit report is issued.

ACT MODEL FINANCIAL STATEMENTS OF 'BURLEY GRIFFIN AGENCY'

For the Year Ended 30 June 2023

Independent Auditor's Report

[Insert the Report from the ACT Audit Office.]

'Burley Griffin Agency' Financial Statements For the Year Ended 30 June 2023

Statement of Responsibility

In my opinion, the directorate's* financial statements fairly reflect the financial operations for the year ended 30 June 2023 and its financial position on that date.

Chloe Grace Director-General [Chief Executive Officer or Chairperson] 'Burley Griffin Agency' August 2023

Reference

Commentary – Statement of Responsibility

FMA Section 28 and 64

The *Financial Management Act 1996* (FMA) requires the Director-General/Chief Executive Officer/Chairperson to attach a 'Statement of Responsibility' to the financial statements. The statement is to be signed by the Director-General of a directorate or by the Chief Executive Officer of a territory authority where the authority does not have a governing board. Where the authority has a governing board the Chair of that board must sign the statement.

For directorates and territory authorities, the 'Statement of Responsibility' must state whether, in the opinion of the responsible Director-General/Chief Executive Officer/Chairperson, the financial statements fairly reflect the financial operations of the agency during the reporting period and the financial position of the agency at the end of the reporting period. In addition, territory authorities should also state that the Chief Executive Officer or Chairperson is responsible for the preparation of the annual financial statements and the judgements exercised in preparing it.

The name of the Director-General/Chief Executive Officer/Chairperson of the agency must be clearly printed on the statement.

Territory Authority Commentary

*A territory authority should use the following wording in its Statement of Responsibility:

[As the Chief Executive Officer/Chairperson of 'Example Territory Authority' I am responsibility responsible for the preparation of the annual financial report as well as the judgements exercised in preparing it. In my opinion, the Authority's financial statements fairly reflect the financial operations for the year ended 30 June 2023 and the financial position on that date.]

'Burley Griffin Agency' Financial Statements For the Year Ended 30 June 2023

Statement by the Chief Finance Officer

In my opinion, the Agency's financial statements have been prepared in accordance with the Australian Accounting Standards, are in agreement with its accounts and records and fairly reflect its financial operations for the year ended 30 June 2023 and the financial position on that date.

Harry Austin Chief Finance Officer 'Burley Griffin Agency' August 2023

Reference

Commentary – Statement by the Chief Finance Officer

ACT Disclosure Policy

Although the FMA only requires that a Statement of Responsibility be provided by the Director-General, it is ACT Disclosure Policy that the Chief Finance Officer or equivalent must also provide a statement. This statement should say that the financial statements have been prepared in accordance with Australian Accounting Standards, and are in agreement with the agency's accounts and records and fairly reflect the financial operations of the agency. This statement is usually signed prior to the Director-General signing the Statement of Responsibility, and is to provide a level of assurance to the Director-General. The name of the Chief Finance Officer or equivalent of the agency must be clearly printed on the statement.

Reference **Commentary – Content of Financial Statements** Presentation of Notes A table of contents helps users to quickly access a particular statement or note. AASB 101 Presentation of Financial AASB 101.113 Statements only requires that notes in the financial statements be presented in a systematic manner. In determining a systematic manner, an agency must consider the effect on the understandability and comparability of its financial statements. Each item in a financial statement must be cross-referenced to any directly related information in the notes. Page numbers are used in the Model for ease of reference. Agencies are not required to include page numbers in the table of contents due to the difficulty in knowing what page numbers the financial statements will have in the annual report. Examples of systematic ordering or grouping of the notes include: AASB 101 114 giving prominence to the areas of activities that the agency considers most relevant to an understanding of its operating statement and balance sheet, such as grouping together information about particular operating activities: grouping together information about items measured similarly such as assets measured at fair value; or following the order of the line items in the operating statement and the balance sheet, such as: AASB 101.16 a statement of compliance with IFRSs*; (ii) supporting information for items presented in the Operating Statement, Balance Sheet, Statement of Changes in Equity and Statement of Cash Flows, in the order in which each statement and each line item is presented; and (iii) other disclosures, including: contingent liabilities and unrecognised contractual commitments; and non-financial disclosures, for example the agency's financial risk management objectives and policies. AASB 101.3 *Note: ACT Government agencies cannot make a statement of compliance with IFRSs but shall make a statement of AASB 1054 7 compliance with Australian Accounting Standards. The Model includes this statement of compliance in Note 2 Basis of AASB 101 16 Preparation of the Financial Statements. However, for-profit authorities are required to make an explicit and unreserved AASB 101.Aus16.2 statement of compliance with IFRS in the notes where their financial statements comply with IFRSs. Compliance with Australian Accounting Standards by for-profit agencies will not necessarily lead to compliance with IFRSs. This circumstance arises when the entity is a for-profit government agency to which particular standards apply, such as AASB 1004 Contributions, and to which Aus paragraphs in various other Australian Accounting Standards apply, and the entity applies a requirement that is inconsistent with an IFRS requirement. Additional Information The notes must disclose additional information that is not presented on the face of in-the financial statements as AASB 101.112(b) &(c) required by Australian Accounting Standards, ACT Disclosure Policy and where it is necessary to enable an assessment of the agency's financial performance and financial position to be made.

Reference	Commentary – Operating Statement
AASB 101.81A ACT Disclosure Policy AASB 101.10 ACT Disclosure Policy	ACT Disclosure Policy requires an agency to include one Statement of Profit or Loss and Other Comprehensive Income in their financial statements. AASB 101 <i>Presentation of Financial Statements</i> allows entities to choose the title of the one Statement of Profit or Loss and Other Comprehensive Income. However, ACT Disclosure Policy requires that the single Statement of Profit or Loss and Other Comprehensive Income be called an Operating Statement to maintain consistency and to reflect the fact that most agencies do not operate solely with the intention to generate a profit, but to provide services to the community in an efficient and effective manner. The Operating Statement discloses items of profit and loss as well as other comprehensive income as appropriate.
AASB 101.81A – 105	Format AASB 101 sets out the format for the Operating Statement, including certain line items that must be disclosed in the statement.
FMA Section 27(2) FMA Section 63(2)	The <i>Financial Management Act 1996 (</i> FMA) requires that the annual financial statements of an agency be prepared in accordance with Australian Accounting Standards and in a form that facilitates a comparison between financial operations of the agency during the reporting period and the estimates of those operations contained in the budget for the agency for the reporting period.
ACT Disclosure Policy	Income and expenses are disaggregated in the Operating Statement.
AASB 101.82	AASB 101 requires that the total amounts of the following line items be disclosed in the Income or Expenses section of the Operating Statement:
	• revenue, presenting separately interest revenue calculated using the effective interest method;
	• gains and losses arising from the derecognition of financial assets measured at amortised cost;
	finance costs;
	impairment losses (including reversals of impairment losses);
	 share of profit or (loss) of associates and joint ventures accounted for using the equity method; gains or losses arising from reclassifying a financial asset from amortised cost to fair value through profit and loss;
	 any cumulative gains or losses previously recognised in other comprehensive income that is reclassified to profit and loss arising from a financial asset moving from the other comprehensive income measurement category to the fair value through profit and loss measurement category;
	• tax expense; and
	single amount for the total of discontinued operations.
AASB 101.82A	AASB 101 requires the other comprehensive income section to present line items for amounts of other comprehensive income classified by nature (including the share of the other comprehensive income of associates and joint ventures accounted for using the equity method) and grouped into those that in accordance with other Australian Accounting Standards:
	will not be reclassified subsequently to profit or loss (income or expense); and
	• will be reclassified subsequently to profit or loss (income or expense) when specific conditions are met.
AASB 101.96	Examples of other comprehensive income items that would never be reclassified to profit or loss are changes in the revaluation surplus recognised in accordance with AASB 116 <i>Property, Plant and Equipment</i> or AASB 138 <i>Intangible Assets</i> and actuarial gains and losses on defined benefit pension plans recognised in accordance with AASB 119 <i>Employee Benefits</i> . It is unlikely that agencies would have items of other comprehensive income that may subsequently be reclassified to profit or loss.
AASB 101.85	Additional line items (including by disaggregating the line items listed above), headings and sub-totals are required to be presented in the Operating Statement when such presentation is relevant to an understanding of the agency's financial performance. These additional sub-totals must:
AASB 101.85A	 be made up of items recognised and measured in accordance with Australian Accounting Standards;
	• be presented and labelled in a manner that makes the sub-totals clear and understandable and consistent from period to period; and
	• not be displayed with more prominence than the sub-totals and totals required in Australian Accounting Standards.
AASB 101.85B	An agency must present the line items in the Operating Statement that reconcile any sub-totals presented in accordance with AASB 101.85 with the sub-totals or totals required in Australian Accounting Standards for the Operating Statement.
	Note that where an agency has no amounts applicable to any individual line item, that line item should not be included in the Operating Statement.

Reference	Commentary – Operating Statement – Continued
AASB 101.51(c), 51(e) & 53	The reporting date and rounding used in the Operating Statement must be identified.
AASB 101.113	The Operating Statement must be cross-referenced to relevant notes included, based on materiality considerations.
FMA Section 27(2) FMA s63(2)	Budget The budget numbers appearing in the Operating Statement for directorates are the numbers published in the 2022-23 Budget Papers. Budget numbers appearing in the Operating Statement for territory authorities are based on the authority's Statement of Intent included in the 2022-23 Budget Papers.
	Income
AASB Framework 74 & 76	Income is comprised of revenue and gains. Gains are usually to be displayed separately to revenue in the Operating Statement as this separate identification is useful for the purpose of making economic decisions. Gains are often reported net of related expenses. Note that where a net loss occurs in relation to a particular transaction, it is disclosed as part of Other Expenses.
	Offset of Income and Expenses
AASB 101.32 AASB 116.71	Income and expenses must not be offset unless required or permitted by an Australian Accounting Standard. For example, AASB 116 <i>Property, Plant and Equipment</i> allows the offset of the income and expense from de-recognition of an item of property, plant and equipment.
	Classification of Expenses
AASB 101.99	Under AASB 101, expenses shall be classified by using either:
	the nature of expenses method; or
AASB 101.100 ACT Disclosure Policy	 the function of expenses method. The standard encourages this classification to be disclosed in the Operating Statement. ACT Disclosure Policy requires agencies to classify expenses by their nature.
	Goods and Services Tax (GST)
Interpretation 1031.6	Revenue and expenses must be recognised net of the GST except where the amount of GST incurred is not recoverable from the taxation authority. In this case, the GST must be recognised as part of the item of expense.
	Materiality and Aggregation
AASB 101.30A	Agencies need to consider the Materiality Guidance for Financial Statements Simplification under Section 1.2 Materiality Guidance. An agency should decide, taking into consideration all relevant facts and circumstances, how it aggregates information in the Operating Statement, which includes the notes. It must not reduce the understandability of its financial statements by obscuring material information with immaterial information or by aggregating material items that have different natures or functions.
	Extraordinary Items
AASB 101.87	Agencies must not classify any items of income or expense as extraordinary either in the Operating Statement or in the notes to the financial statements.
	Appropriate Notes
AASB 101.85	In some cases it may be more appropriate to disclose different expense and revenue classes as needed on the Operating Statement. For example, Cost of Goods Sold may be more appropriate to territory authorities whereas Grants and Purchased Services, may not apply. Where this is the case an appropriate note should also accompany the line item presented.
	Territory Authority Commentary
AASB 101.81A AASB 101.5 & 10	Where a territory authority is for-profit it is required to name will have to call the 'Operating Statement' a 'Statement of Comprehensive Income'.

Reference	Commentary – Balance Sheet
	Format
AASB 101.54 - 80 AASB 101.5 AASB 101.10 ACT Disclosure Policy	Format A Statement of Financial Position is to be included in the financial statements. AASB 101 allows both for-profit and not-for-profit agencies to change the title of their financial statements, so it is ACT Disclosure policy that the Statement of Financial Position be called the Balance Sheet. AASB 101 sets out the format for the Balance Sheet, including certain line items that must be disclosed in the statement.
AASB 101.60	AASB 101 requires all assets and all liabilities to be presented as current or non-current except where a presentation based on liquidity provides information that is more relevant and reliable. Current assets should be presented separately from non-current assets and current liabilities should be presented separately from non-current liabilities in the Balance Sheet.
AASB 101.54	Where material, AASB 101 requires the following items be disclosed separately in the Balance Sheet:
	Assets:
	cash and cash equivalents;
	• trade and other receivables;
	• inventories;
	 assets held for sale and assets included in disposal groups classified as held for sale;
	investment property;
	biological assets;
	 investments accounted for using the equity method;
	current tax assets;
	• deferred tax assets;
	 financial assets (excluding cash and cash equivalents, trade and other receivables, and investments accounted for using the equity method);
	 property, plant and equipment; and
	• intangible assets.
AASB 16.47	Right-of use assets are disclosed in Note 19 <i>Property, Plant and Equipment</i> under the relevant class of asset.
	Liabilities:
	 trade and other payables; liabilities included in a disposal group classified as held for sale;
	 nabilities included in a disposal group classified as field for sale; current tax liabilities;
	 deferred tax liabilities;
	 financial liabilities (excluding trade and other payables, and provisions); and
	 provisions.
AASB 101.55	Additional line items (including by disaggregating the line items listed above), headings and sub-totals shall be presented in the Balance Sheet when their presentation is relevant to the understanding of the agency's financial position. These additional sub-totals must:
AASB 101.55A	• be made up of items recognised and measured in accordance with Australian Accounting Standards;
	• be presented and labelled in a manner that makes the sub-totals clear and understandable and consistent from period to period; and
	 not be displayed with more prominence than the sub-totals and totals required in Australian Accounting Standards.
	Note that where an agency has no amounts applicable to any individual line item, that line item should not be included in the Balance Sheet.
	The Contributed Equity line item contained in the Model Balance Sheet relates to territory authorities.
AASB 101.51(c), 51(e)	The reporting date and rounding used in the Balance Sheet must be identified.
&53 AASB 101.113	The Balance Sheet must be cross-referenced to relevant notes included, based on materiality considerations.
	Cash and Investments Where an agency does not have any investments (either actual or budget) they should include a 'Cash and Cash Equivalents' line item on the face of the balance sheet rather than a 'Cash and Investment' line item.
	Budget
FMA Section 27(2) FMA s63(2)	The budget numbers appearing in the Balance Sheet are those published in the 2022-23 Budget Papers. For territory authorities budget numbers appearing in the Balance Sheet are based on the authority's Statement of Intent included in the 2022-23 Budget Papers.

Reference	Commentary – Balance Sheet – Continued
AASB 101.66	 Classification of Assets An asset is classified as current when it satisfies any one of the following criteria: it is expected to be realised in, or is intended for sale or consumption in, the agency's normal operating cycle; it is held primarily for the purpose of being traded; it is expected to be realised within 12 months after the reporting date; or it is cash or a cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period. All other assets are classified as non-current.
AASB 101.69	 Classification of Liabilities A liability is classified as current when it satisfies any one of the following criteria: it is expected to be settled in the agency's normal operating cycle; it is held primarily for the purpose of being traded; it is due to be settled within 12 months after the reporting date; or the agency does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. All other liabilities are classified as non-current.
AASB 101.68 & 70	Operating Cycle Where the operating cycle is greater than 12 months, assets that are sold, consumed or realised as part of that operating cycle, or liabilities that are part of the working capital used in the agency's normal operating cycle, are classified as current. When the agency's normal operating cycle is not clearly identifiable, its duration is assumed to be 12 months.
Interpretation 1031.7	Goods and Services Tax (GST) The amount of GST incurred by a purchaser that is not recoverable from the taxation authority is required to be recognised as part of the cost of the acquisition of an asset. Interpretation 1031 requires receivables and payables to be stated with the amount of GST included.
Interpretation 1031.8	Apart from the above circumstances, assets must be recognised net of the amount of GST.
Interpretation 1031.6 & 9	Interpretation 1031 requires the net amount of GST recoverable from, or payable to, the taxation authority to be included as part of receivables or payables in the Balance Sheet.
AASB 101.30A	Materiality and Aggregation Agencies need to consider the Materiality Guidance for Financial Statements Simplification under Section 1.2 Materiality Guidance. An agency should decide, taking into consideration all relevant facts and circumstances, how it aggregates information in the Balance Sheet, which includes the notes. It must not reduce the understandability of its financial statements by obscuring material information with immaterial information or by aggregating material items that have different natures or functions.
AASB 101.32	Offset of Assets and Liabilities Assets and liabilities shall not be offset unless required or permitted by an Australian Accounting Standard.
	Lease liabilities are presented separately in the Balance Sheet.
ACT Disclosure Policy	
AASB 110.12 & 13 AASB 101.137(a)	Dividends Declared Dividends declared after the reporting date should not be recognised as a liability in the Balance Sheet. However, dividends declared after the reporting date but before the financial statements are authorised for issue should be disclosed in the notes.

The above Statement of Changes in Equity is to read in conjunction with the accompanying notes.

Refer to the Statement of Appropriation.

Reference	Commentary – Statement of Changes in Equity
	Format
AASB 101.106 - 110	The Statement of Changes in Equity, must include certain line items.
AASB 101.106	 An agency shall present a Statement of Changes in Equity showing in the statement: total Comprehensive Income for the period;
	• for each component of equity (i.e. accumulated funds, reserves and contributed equity), the effects of retrospective application or retrospective restatement recognised in accordance with AASB 108; and
	• for each component of equity, a reconciliation between the carrying amount at the beginning and the end of the period, separately disclosing changes resulting from:
	 profit or loss;
	 other comprehensive income; and
	 transactions with owners in their capacity as owners, showing separately contributions by and distributions to owners and changes in ownership interests in subsidiaries that do not result in a loss of control.
	Note that where an agency has no amounts applicable to any individual line item, that line item should not be included in the Statement of Changes in Equity.
AASB 101.51(c), 51(e)	The reporting date and rounding used in the Statement of Changes in Equity must be identified.
& 53 AASB 101.113	The Statement of Changes in Equity must be cross-referenced to relevant notes included, based on materiality considerations.
AASB 101.106,106A	AASB 101 allows for the reconciliation of items of other comprehensive income to be presented either in the Statement of Changes in Equity or in the notes.
	Budget
FMA Section 27(2) FMA s63(2)	The budget numbers appearing in the Statement of Changes in Equity are those numbers published in the 2022-23 Budget Papers. For territory authorities budget numbers appearing in the Statement of Changes in Equity are based on the authority's Statement of Intent included in the 2022-23 Budget Papers.
	Dividend
AASB 101.107 ACT Disclosure Policy	The accounting standards require that dividends recognised as distributions to owners during the year must be disclosed in the Statement of Changes in Equity or in the notes. ACT Disclosure policy requires that agencies include dividends in the Statement of Changes in Equity.
	Materiality and Aggregation
AASB 101.30A	Agencies need to consider the Materiality Guidance for Financial Statements Simplification under Section 1.2 Materiality Guidance. An agency should decide, taking into consideration all relevant facts and circumstances, how it aggregates information in the Statement of Changes in Equity, which includes the notes. It must not reduce the understandability of its financial statements by obscuring material information with immaterial information or by aggregating material items that have different natures or functions.

AASB 101.113	The Statement of Cash Flows must be cross-referenced to rel considerations.	levant notes	included, dep	ending upon	materiality

Reference	Commentary – Statement of Cash Flows – Continued
	Reporting of Cash Flows
AASB 107.18 & 21 ACT Disclosure Policy	AASB 107 allows cash flows arising from operating activities to be reported in the Statement of Cash Flows using eith the direct or indirect method. ACT Disclosure Policy requires that agencies use the direct method, whereby major class of gross cash receipts and gross cash payments are disclosed. Major classes of investing and financing cash flows sh be presented on a gross basis.
AASB 107.22	However, the following items, may be reported on a net basis:
	• items where the agency is, in substance, holding or disbursing cash on behalf of its customers; and
	• items where turnover is quick, the amounts are large, and the maturities are short i.e. less than 3 months.
	These two situations will not apply to agencies, with the possible exception of the Territory Banking Account and/or t Superannuation Provision Account.
	Budget
FMA Section 27(2) FMA s63(2)	The budget numbers appearing in the Statement of Cash Flows are the numbers published in the 2022-23 Budget Pape For territory authorities budget numbers appearing in the Statement of Cash Flows are based on the authorit Statement of Intent included in the 2022-23 Budget Papers.
	Definitions
AASB 107.6 & 9	Cash flows are inflows and outflows of cash and cash equivalents. Cash flows exclude movements between items the constitute cash or cash equivalents because these components are part of the cash management of an agency rather than part of its operating, investing and financing activities.
AASB 107.6	AASB 107 defines cash as cash on hand and demand deposits. Cash on hand refers to notes and coins held on premi and demand deposits are deposits held at call with a financial institution.
AASB 107.6	Cash equivalents are highly liquid investments with short periods to maturity, and are subject to an insignificant risk changes in value.
AASB 107.6	Operating activities are the principal revenue-producing activities of an agency and other activities that are not invest or financing activities.
AASB 107.6	Investing activities are the acquisition and disposal of long-term assets, and other investments not included in ca equivalents.
AASB 107.6	Financing activities are activities that relate to changes in the size and composition of the contributed capit (accumulated funds) and borrowings of the agency.
	Bank Overdraft
AASB 107.8	Where a bank overdraft is repayable on demand and therefore forms an integral part of an agency's cash manageme these overdrafts are included as a component of cash and cash equivalents. A characteristic of such banki arrangements is that the bank balance often fluctuates from being positive to overdrawn. Where a bank overdraft is repayable on demand, it would be treated as a cash flow from financing activities.
	Different Cash Flows in One Transaction
AASB 107.12	A single transaction may include cash flows that are classified differently. For example, when the cash repayment o loan includes both an interest element and a capital element, the interest element may be classified as operating a the capital element as financing.
	Goods and Services Tax (GST)
nterpretation 1031.10	Cash flows relating to the GST must be included in the Statement of Cash Flows on a gross basis.
nterpretation 1031.11	The GST component of cash flows arising from investing and financing activities which is recoverable from, or paya to, the taxation authority must be classified as operating cash flows.
	Interest in a Joint Venture
AASB 107.38	Where applicable, an agency shall include the following cash flows, relating to a Joint Venture, in its Statement of Ca Flows:
	• its investment in the Joint Venture;
	distributions from the Joint Venture; and
	• other payments or receipts between it and the Joint Venture.

• other payments or receipts between it and the Joint Venture.

Reference	Commentary Statement of Cash Flows – Continued
AASB 101.30A	Materiality and Aggregation Agencies need to consider the Materiality Guidance for Financial Statements Simplification under Section 1.2 Materiality Guidance An agency should deside taking into consideration all relevant facts and singurates how it aggregates
	Guidance. An agency should decide, taking into consideration all relevant facts and circumstances, how it aggregates information in the Statement of Cash Flows, which includes the notes. It must not reduce the understandability of its financial statements by obscuring material information with immaterial information or by aggregating material items that have different natures or functions.
	Leases
AASB 16.50(a)	If an agency is a lessee, they are required to classify cash payments for the principal portion of the lease liability within
AASB 16.50(b	financing activities. Cash payments for the interest portion of lease liability are classified as operating activities.
AASB 16.50(c)	Short-term lease payments, payments for leases of low-value assets and variable lease payments not included in the measurement of the lease liability are classified within operating activities.
AASB 107.43	Non-cash investing and financing transactions (e.g. the initial recognition of the lease at commencement) should be
AASB 107.44	excluded from the statement of cash flows. Such transactions shall be disclosed elsewhere in the financial statements in a way that provides all the relevant information about these investing and financing activities.
	Territory Authority Commentary
AASB 107.14 (a)	In some cases it may be more appropriate to disclose different receipts and payments classes as needed on the Statement of Cash Flows. For example, payments related to Cost of Goods Sold may be more appropriate to territory authorities.
AASB 107.14 (f)	Territory authorities will most likely need to include a payment line relating to GST remitted to the ATO. Where payments are greater than any refunds for any given year, the line <i>Goods and Services Tax Remitted to the ATO</i> should replace the line 'Goods and Services Tax Input Tax Credits from the Australian Taxation Office'. In most cases, an authority would have either a 'Goods and Services Tax Input Tax Credits from the Australian Taxation Office' line or a 'Goods and Services Tax Remitted to the Australian Taxation Office' line or a 'Goods and Services Tax Remitted to the Australian Taxation Office' depending on whether the authority generally is in a refund or payment situation with the ATO. If refunds are greater one year and payments are greater the next (or vice versa) both lines will be required.
	Classification of Income Tax Cash Flows
AASB 107.35	Where an authority has to pay income tax (because of the National Tax Equivalents Regime), cash flows relating to income taxes shall be disclosed separately and classified as operating activities.

'Burley Griffin Agency' Statement of Appropriation For the Year Ended 30 June 2023

Description and Material Accounting Policies relating to Controlled Recurrent Payments Reference Controlled Recurrent Payments (CRP) are revenue received from the ACT Government to fund the costs of delivering outputs. Community Service Obligations (CSO) are received by the 'Burley Griffin Agency' for the provision of waste management services to the public at subsidised rates. AASB 1058.10 CRP and CSO are recognised when the Agency gains control over the funding which is obtained upon the receipt of cash, given they do not contain enforceable and sufficiently specific performance obligations as defined by AASB 15. Capital injection appropriations are not recognised as income, but instead are recognised as equity injections and a cash inflow which is used to purchase/build an asset(s) or to reduce a liability(s). **Column Heading Explanations** The Original Budget column shows the amounts that appear in the Statement of Cash Flows in the Budget Papers. This amount also appears in the Statement of Cash Flows. The Total Appropriated column is inclusive of all appropriation variations occurring after the Original Budget. The Appropriation Drawn is the total amount of appropriation received by the Agency during the year. This amount appears in the Statement of Cash Flows. Original Total Appropriation Appropriation Appropriated Budget Drawn Drawn 2023 2023 2023 2022 \$'000 \$'000 \$'000 \$'000 Controlled AASB 1004.64(a) **Controlled Recurrent Payments** AASB 1058.26 (c) AASB 1059.39 ACT Disclosure Policy **Community Service Obligations** AASB 1004.64(a), 48 **Capital Injections** AASB 1059.39 **Total Controlled Appropriation** The above Statement of Appropriation is to be read in conjunction with the accompanying notes. Variances between '2022-23 Controlled Recurrent Payments Appropriation Drawn' and '2021-22 Controlled Recurrent **Payments Appropriation Drawn'**

The increase in CRP was due to the transfer of the Heritage and Environment function from ABC Directorate to 'Burley Griffin Agency'. Please Refer to Note 30 *Restructure of Administrative Arrangements* for further details.

'Burley Griffin Agency' Statement of Appropriation – Continued For the Year Ended 30 June 2023

	Controlled Recurrent Payments (CRP)	Capital Injection: (CI)
Reconciliation of Appropriation for 2022-23	\$'000	\$'000
Original Appropriation Supplementary Appropriation (Financial Management Act (FMA) s.13) Transfer of Appropriation from CRP to Expenses on Behalf of the Territory (EBT) (FMA s.14)		
Transfer of Appropriation from CI to CRP (FMA s.14A)		
Transfer of Appropriation from EBT to CRP (FMA s.15A)		
Administrative Arrangements Transfer (FMA s.16) ¹		
Appropriation for accrued employee entitlements (FMA s.16A)		
Rollover of Undisbursed Appropriation (FMA s.16B)		
Variation of appropriations for Commonwealth grants (FMA s.17)		
Treasurer's Advance (FMA s.18)		
Total Appropriated		
Budget Rollovers ²		
Controlled Appropriation Drawn		

^{1.} The difference between the Original Budget and the Total Appropriated is mainly due to an administrative arrangement that occurred on 7 January 2023, where the Agency gained the Heritage and Environment Division from the ABC Directorate. The heritage function is responsible for the development of heritage policy as well as the maintenance of a number of large heritage assets. The environment function is responsible for the development of policy frameworks and providing advice on the management and protection of the environment. For further details see Note 30 *Restructure of Administrative Arrangements*.

^{2.} The difference between the Total Appropriated and the Controlled Appropriation Drawn down is largely due to design delays associated with a major project scheduled to commence in 2022-23 2023. Appropriation was not drawn down for this project and has been rolled over to the following reporting period. 'Project X' (\$xxx) was due to start in February 2023, however, it is expected that it will not commence until August 2023. This project has both recurrent and capital injection elements.

Reference	Commentary – Statement of Appropriation
FMA Section 6	No payment of public money can be made other than in accordance with an appropriation. Appropriation reconciliations are reconciliations of cash flow.
FMA Section 8	An Appropriation Act must make separate appropriations in relation to each directorate for:
	 any controlled recurrent payments to be provided to the directorate; and
	any capital injection to be provided to the directorate.
FMA Section 37A	If an agency receives an amount of appropriation that is excess to its requirements, it may repay the excess amount, or part of the excess amount, to the Territory Banking Account. The appropriation from which the excess amount was paid to the agency is restored by the amount it repaid to the Territory Banking Account. The balance of the appropriation, including the amount repaid, may be applied for the purposes for which it was appropriated.
	Agencies should disclose appropriation amounts returned (if any) in a footnote to the 'Appropriation Drawn' in the Statement of Appropriation.
AASB 1058.39	The following must be disclosed by a government directorate or other public sector entity that obtains part or all of their spending authority from an ACT Government appropriation:
	• a summary of the major categories of appropriations, disclosing separately the original amounts appropriated for the reporting period and the total amounts appropriated for the reporting period;
	• the expenditures for the reporting period in respect of each of the above items; and
	• any reasons for material variances between the amounts appropriated or otherwise authorised and the associated expenditures for the reporting period.
	A tabular presentation of the variance explanation should be used if it would assist understanding of the reasons for the variance.
ACT Disclosure Policy	Although CSO revenue is not separately identified in the Appropriation Act, CSO revenue is an identifiable sub-category of CRP revenue and is separately disclosed in the Statement of Appropriation.
	Territory Authority Commentary
AASB 107.14 (a)	The <i>Financial Management Act 1996</i> (FMA) allows some territory authorities to receive CRP directly from the ACT Government. Territory authorities that receive CRP will need to include the Statement of Appropriation, as provided in the Model, in their Financial Statements. Authorities that do not receive CRP are therefore not required to include a Statement of Appropriation in their Financial Statements.

Summary of Agency Output Classes

For agencies that, have multiple output classes and have intra agency climinations between these output classes the There are no some has so to metude a Semicrony of Agency Owtput Classes in their filt and al Statements.

Format

FMA Section 27(3)(a) Financial Management (Periodic & Annual Financial Statements) Guidelines 2016 Section 7(2) The Financial Management Act 1996 (FMA) states that the Financial Management (Periodic and Annual Financial Statements) Guidelines 2016 must be complied with, when preparing annual financial statements. These guidelines require the financial statements include an Operating Statement for each class of output provided by the agency during the year. However the guidelines specifically exclude other comprehensive income from being included in the Operating Statement for each class of output.

Reference	Commentary – Operating Statement for Each Output Class – Continued
AASB 1052.15	In addition to the FMA, AASB 1052 <i>Disaggregated Disclosures</i> requires the following disclosures to be provided in the financial statements of a government directorate:
	• in summarised form, the identity and purpose of each major activity undertaken by the government directorat during the reporting period;
	 income reliably attributable to each of the major activities, showing separately user charges, income fror government and other income by major class of income; and
	• expenses reliably attributable to each of the major activities, showing separately each major class of expense.
	If an agency has no amounts applicable to any line item, the item should not be included in the Output Class Operatin Statement.
	The output class names and descriptions used in the Operating Statement for each Output Class of 'Burley Griffin Agency are examples only that need to be tailored to the agency.
	Definitions
FMA, Dictionary	For FMA purposes, 'outputs' are defined as goods produced or services provided by a directorate or territory authorit
AASB 1052	or a person producing goods or providing services on behalf of a directorate or territory authority. 'Class of outputs' ar defined as a group of related outputs. For the purposes of AASB 1052, major activities of a directorate have been defined as 'output classes'.
	Budget
FMA Section 27(2)	The budget numbers appearing in the output class operating statements are those numbers published in the 2022-23 Budget Papers. For territory authorities budget numbers appearing in the Output Class Operating Statement are based on the authority's Statement of Intent.
	One Output Class
	Where an agency only has one output class, a separate operating statement for that output class and the 'Summary c Agency Output Classes' is not required to be included in an agency's financial statements. However, where this is th case, an agency must disclose:
	• the title of the output class;
	a description of the output class; and
	• the fact that there is not an additional Output Class Operating Statement or a Summary of Agency Output Classes
	Example wording an agency may use at the bottom of its operating statement, is as follows:
	'Burley Griffin Agency' only has one output class and as such the above Operating Statement is also the Agency'
	Operating Statement for the [Name of Output Class] Output Class. The [Name of Output Class] Output Class includes [Description of Output Class.] As a result, a separate output class Operating Statement and Summary of Agency Output Classes has not been included in these financial statements.
	Territory Authority Commentary
Financial Management (Territory Authorities prescribed for Outputs) Guidelines 2020 (No 2020). Disallowable	Only territory authorities that are 'prescribed' territory authorities (PTA) receiving Controlled Recurrent Payments ar required to report on output classes. A 'Summary of Output Classes' statement and an Operating Statement for eac territory authority output class must be disclosed in a territory authority's financial statements, where relevant Prescribed territory authorities are:
instrument 2020-183	ACT Gambling and Racing Commission;
	Canberra Institute of Technology;
	Cultural Facilities Corporation;
	Legal Aid Commission (ACT); and
	• Office of the Work Health and Safety Commissioner (to be known as WorkSafe ACT).
	All other territory authorities are not required to report this information.
FMA Section 63(2)	AASB 1052 applies to government department (i.e. ACT directorate) disclosures, which are not relevant to territor authorities.

DISAGGREGATED DISCLOSURE OF ASSETS AND LIABILITIES [DIRECTORATES ONLY] – CONTINUED

a) Unallocated Cash and Cash Equivalents

Cash and cash equivalents have been included in the 'Unallocated' column above, as this class cannot be 'reliably attributed' to the directorate's output classes. As the amount of cash and cash equivalents held by the directorate is comprised of a number of disparate components, no single allocation driver can be used to 'reliably attribute' this asset class. The components are as follows:

- working capital which is not held for any specific output class but is instead held for unforeseen operational expenditures;
- cash held for unpresented cheques. There is no correlation between output class expenditure and actual cheques which are unpresented at any given point in time. Also, a single unpresented cheque could relate to multiple output classes;
- cash held for a specific purpose; and
- cash held in anticipation of an imminent payment.
- b) Unallocated Investments

Investments with the Territory Banking Account cannot be 'reliably attributed' to the directorate's output classes.

Commentary – Disaggregated Disclosure of Assets and Liabilities [Directorates Only]

One Output Class

Where a directorate only has one output class, this disaggregated disclosure note is not required to be included in the directorate's financial statements. However, where this is the case, the directorate must disclose this fact at the bottom of its balance sheet.

Example wording a directorate may use at the bottom of its balance sheet, is as follows:

'Burley Griffin Agency' only has one output class and as such the above Balance Sheet is also the directorate's Balance Sheet for the [Name of Output Class] Output Class. A separate disaggregated disclosure statement note has not been included in these financial statements.

Reliably Attributable

AASB 1052 *Disaggregated Disclosures* states that the financial statements of a government Department shall disclose the assets deployed and liabilities incurred that are 'reliably attributable' to each Department's output class. However, AASB 1052 does not provide guidance on what assets or liabilities it generally considers to be 'reliably attributable' to a particular output class. It does state that it may not be possible to reliably attribute all assets and liabilities.

ACT Disclosure Policy

AASB 1052.16

AASB 1052 19

ACT Disclosure Policy on Disaggregated Disclosures is that, in most cases, cash and cash equivalents cannot be reliably attributed to a directorate's output classes. Where this is the case, directorates do not have to allocate this to output classes.

The following asset and liability classes can be allocated:

- Property, Plant and Equipment;
- Intangibles;
- Capital Works in Progress;
- Employee Benefits; and
- Lease Liabilities.

As such, directorates must allocate these asset classes to each of their output classes.

For all other asset and liability classes, the ultimate decision regarding whether or not these classes can be reliably attributed to an appropriate output class rests with the directorate, and as such directorates will need to analyse their assets and liabilities to determine which classes can be reliably attributed. As directorates are to determine if an asset or liability class is 'reliably attributable', directorates should not base their allocations on the note above, as the allocation is an example only.

Reference	Commentary – Disaggregated Disclosure of Assets and Liabilities [Directorates Only] – Continued
	Explanation of Unallocated Amount
	Directorates should disclose the reason why cash and cash equivalents cannot be 'reliably attributed' and as such cannot be allocated to an output class. An example disclosure has been included in this statement note. A similar explanation will need to be included for a material asset or liability class that cannot be 'reliably attributed'. However, a similar disclosure is not required for immaterial asset and liability classes which cannot be 'reliably attributed' to an output class.
	Disclosure of Comparative Information
AASB 101.38	Comparative information must be disclosed in respect of the prior reporting period for all amounts reported in the financial statements, except where another Australian Accounting Standard permits or requires otherwise. AASB 1052
AASB 1052.15	does not specifically address comparative figures for disaggregated disclosures but, as stated above, it only requires the allocation of asset and liability classes where they can be 'reliably attributable' to an output class. As such, directorates must include comparative figures for this disaggregated disclosure unless not 'reliably attributable'.
AASB 101.42	 When it is impracticable to reclassify comparative amounts, a directorate shall disclose: the reason for not reclassifying the amounts; and
	• the nature of the adjustments that would have been made if the amounts had been reclassified.

Reference	NOTE 1. OBJECTIVES OF 'BURLEY GRIFFIN AGENCY'
AASB 1054.8(b) AASB 101.138(b) AASB 1052.15(b)	The Agency is a not-for-profit ACT Government entity that aims to be innovative and that contributes to the long-term growth and liveability of Canberra. The Agency provides a wide range of services to the ACT community as well as exploring ways in which its service delivery can be improved. The services provided include municipal services, public transport, court and tribunal services, land sales, land information, procurement and property services, undertaking, promoting and coordinating the development and management of land and the provision and maintenance of major infrastructure such as roads, bridges, streetlights and stormwater drains.
	The Agency provides policy advice to Government on land use planning and environmental impacts, urban infrastructure, strategic management of ACT land and property and municipal services. The Agency also collects a number of different taxes, licences, fees and fines for the ACT Government.
	Commentary – Note 1: Objectives of 'Burley Griffin Agency'
	An agency shall disclose in the notes to its financial statements whether, it is a for-profit or not-for-profit entity.
AASB 1054.8(b) AASB 1052.15(b)	Directorates are required to disclose their objectives if this information has not been disclosed elsewhere in the Annual Report. Territory authorities should also provide a note disclosing their objectives.
AASB 101.138(b)	Agencies need to provide a description of the nature of the agency's operations and its principal activities.
Chief Minister's Annual Report Directions	As the Chief Minister's Annual Report Directions require details of the organisation and its major achievements to appear elsewhere within the Annual Report, Note 1 can be simplified and be more concise. The information required by the Directions includes details of the reporting entity and its organisational profile.

Reference	NOTE 2. BASIS OF PREPARATION OF THE FINANCIAL STATEMENTS – CONTINUED
AASB 101.27, AASB 101.17(a)	Accrual Accounting The financial statements have been prepared using the accrual basis of accounting. The financial statements are prepared according to historical cost convention, except for non-current assets held for sale, property, plant and equipment and financial instruments which are valued at fair value in accordance with (re)valuation policies applicable to the Agency during the reporting period.
AASB 101.51(d)	Currency These financial statements are presented in Australian dollars, which is the Agency's functional currency.
AASB 101.51(b), AASB	Individual Not-for-Profit Reporting Entity Example Agency 'Burley Griffin Agency' is an individual not-for-profit reporting entity.
1054.8(b)	Controlled and Territorial Items The Agency produces Controlled and Territorial financial statements. The Controlled financial statements include income, expenses, assets and liabilities over which the Agency has control. The Territorial financial statements include income, expenses, assets and liabilities that the Agency administers on behalf of the ACT Government, but does not control.
	The purpose of the distinction between Controlled and Territorial is to enable an assessment of the Agency's performance against the decisions it has made in relation to the resources it controls, while maintaining accountability for all resources under its responsibility.
	The basis of preparation described applies to both Controlled and Territorial financial statements except where specified otherwise.
AASB 101.51(c)	Reporting Period These financial statements state the financial performance, changes in equity and cash flows of the Agency for the year ended 30 June 2023 together with the financial position of the Agency as at 30 June 2023.
FMA 27(2) & 63(2)	Comparative Figures Budget Figures WORDING FOR DIRECTORATES [To facilitate a comparison with the Budget Papers, as required by the FMA, budget information for 2022-23 has been presented in the financial statements. Budget numbers in the financial statements are the original budget numbers that appear in the Budget Papers.]
	WORDING FOR TERRITORY AUTHORITIES [To facilitate a comparison with the Budget Papers, as required by the FMA, budget information for 2022-23 has been presented in the financial statements. Budget numbers in the financial statements are the original budget numbers that appear in the Statement of Intent.]
AASB 101.38	Prior Year Comparatives Comparative information has been disclosed in respect of the previous period for amounts reported in the financial statements, except where an Australian Accounting Standard does not require comparative information to be disclosed.
AASB 101.41	Where the presentation or classification of items in the financial statements is amended, the comparative amounts have been reclassified where practical. Where a reclassification has occurred, the nature, amount and reason for the reclassification is provided.
AASB 101.51(e) & 53	Rounding All amounts in the financial statements have been rounded to the nearest thousand dollars (\$'000). Use of "-" represents zero amounts or amounts rounded down to zero.
ACT Treasury Directorate Finance Memorandum 2006/11 AASB 101.25-26	Going Concern The 2022-23 financial statements have been prepared on a going concern basis as 'Burley Griffin Agency' has been funded in the ACT Government 2023-24 Budget and the Budget Papers include forward estimates for 'Burley Griffin Agency'.
	COVID-19 Impact 'Burley Griffin Agency' has assessed the impact of the COVID-19 pandemic on its financial statements. From this assessment the Agency has concluded that COVID-19 has had a material impact on certain aspects of its operations. The Agency has received more funding for additional employees and capital projects. 'Burley Griffin Agency's' own source revenue has been negatively impacted with the amount of public transport fare revenue still much lower than pre pandemic levels. 'Burley Griffin Agency' has also waived amounts owing to it, although in smaller amounts than in previous years of the pandemic and has had an event which has occurred after balance date. All material COVID-19 disclosures are included in the note to which they relate. The COVID-19 pandemic has also resulted in 'Burley Griffin Agency' not being able to collect as much traffic fine and parking fine territorial revenue when compared to pre pandemic levels.

Reference	Commentary – Note 2: Basis of Preparation of the Financial Statements
	There are a number of general requirements in relation to the presentation and disclosure of financial statements.
	AASB 101 Presentation of Financial Statements requires the following:
	a) financial statements should be presented on an annual basis. However, where an agency's reporting period changes and where the financial period for the current or prior year covered in the financial statements is less, or more, than 12 months, the agency must disclose the reason for a period other than 12 months being used and that comparative amounts are not entirely comparable (AASB 101.36); and
	b) presentation and classification of items is retained from one period to the next unless:
	 it is apparent, following a significant change in the nature of the operations of the agency, that another presentation or classification would be more appropriate (having regard to the requirement in AASB 108) (AASB 101.45 (a)); or
	 a change in presentation or classification is required by Australian Accounting Standards (AASB 101.45 (b)). ACT Disclosure Policy requires all agencies to use the English language and Australian currency in the presentation of their financial statements.
	Amounts may be rounded to the nearest \$1,000 in the financial statements, provided:
	rounding is applied consistently; and
	• the level of rounding is clearly indicated.
5044 27(2)	Rounding of amounts for financial statement purposes should not alter actual amounts in agencies' financial systems.
FMA sec 27(2) FMA sec 63 (2)	Directorates and territory authorities must also prepare financial statements in a form that facilitates a comparison with the budget contained in the Budget Papers for directorates (section 27(2) of the FMA) and with the budget information contained in a territory authority's Statement of Intent (section 63 (2) of the FMA) for authorities.
FMA sec 27(3)(c) & (d), FMA sec 63(3)(c)	The annual financial statements must include a statement of the accounting policies adopted by the agency and such other statements as are necessary to fairly reflect the financial operations of the agency during the year and its financial position at the end of the year.
AASB 101.10(e), AASB 101.17	Material accounting policies must be presented in the notes to the financial statements. The material accounting policies must include the measurement basis used in preparing the financial statements and the other accounting policies used that are relevant to an understanding of the financial statements.
AASB 1054.7 & 9	The notes must also include a statement that the financial statements are general-purpose financial statements and a statement as to whether the financial statements have been prepared in accordance with Australian Accounting Standards.
AASB 1054.8(a) & (b)	In addition to the above mandatory disclosure requirements, the commentary in the standards indicate that it may also be appropriate to indicate the relevant statutory and other requirements adopted in the preparation of the financial statements, such as compliance with the FMA. The notes should also disclose whether, for the purpose of preparing the financial statements, the agency is a for-profit or not-for-profit entity.
AASB 108.10	Where there is no accounting standard or accounting interpretation, the disclosures should focus on explaining why the policy applied ensures that relevant and reliable information is presented in the financial statements.
Model Financial	Disclosures should only be included where the item is materially relevant to the Agency.
Statement 1.6 Application –ACT	Assets and Liabilities
Disclosure Policy AASB 101.125, AASB 101.127	All key assumptions concerning the future, that have a significant risk of causing material adjustments to carrying amounts of assets and liabilities within the next reporting period, must be disclosed. This disclosure will contain details of their nature and their carrying amounts as at the reporting date. The assumptions and other sources of estimation uncertainty disclosed in accordance with AASB 101.125 relate to the estimates that require management's most difficult, subjective or complex judgements.
	Other Judgements and Estimates
	For other significant accounting judgements and estimates they will be specific to each agency. Where an agency has made a specific significant accounting judgement or estimate this must be disclosed. For example, the Superannuation Provision Account makes significant accounting estimates in relation to the superannuation liability.
	Going Concern
AASB 101. 25-26	When preparing financial statements, management shall make an assessment of the agency's ability to continue as a going concern. The general presumption for government agencies is that they will continue to perform their current functions and activities.

Reference	Commentary – Note 2: Basis of Preparation of the Financial Statements – Continued
	Where current assets and current liabilities are assessed by territorial territory authorities and territory owned corporations as part of a going concern analysis, disclosure of the of the analysis should be included.
	From time to time, the government may decide through an administrative arrangement change, or similar event, to move functions across agencies and/or create new agencies (or more rarely cease an agency's activities or sell off an agency). Agencies should disclose where it is known they will cease to be a separate reporting entity, due to an administrative arrangement change, or similar event. An example disclosure would read "As a result of Administrative Arrangement 20X0 (No.1), notifiable instrument NI 20X0-XXX, announced on 30 May 20X0 'Burley Griffin Agency' ceases as a separate reporting entity on 1 July 20XX". 'Burley Griffin Agency's functions were transferred to 'New Agency'.
	Statement of Compliance with International Financial Reporting Standards (IFRSs)
AASB 101.16 AASB 101.Aus16.3	For-profit authorities are required to make an explicit and unreserved statement of compliance with IFRS in the notes where their financial statements comply with IFRSs. Compliance with Australian Accounting Standards by for-profit agencies will not necessarily lead to compliance with IFRSs.
	NOTE 3. IMPACT OF ACCOUNTING STANDARDS ISSUED BUT YET TO BE APPLIED
AASB 101.10(e)	The information below applies to both the Controlled and Territorial financial statements.
	All Australian Accounting Standards and Interpretations issued but yet to be applied are either not relevant to 'Burley Griffin Agency' or have been assessed as having an immaterial financial impact on 'Burley Griffin Agency'.
AASB 108.30 & 31	These standards and interpretations are applicable to future reporting periods. 'Burley Griffin Agency' does not intend to adopt these standards and interpretations early and as such they will be adopted from their application date., with the exception of the change to AASB 101 resulting from AASB 2021/2 Amendments to Australian Accounting Standards
	— Disclosure to Accounting Policies and Definitions of Accounting Policies and Definition of Accounting Estimates. This change requires the Agency to disclose its material accounting policy information rather than its significant accounting policies. For all other Australian Accounting Standards issued by yet to be applied, they will be adopted from their application date.
	Commentary – Note 3: Impact of Accounting Standards Issued but yet to be Applied
	The above example disclosure and this associated commentary is to assist agencies to make the necessary disclosures in their financial statements. Agencies should make their own assessment on the impact and relevance of the standards, bearing in mind that they should only disclose those standards and amending standards that are expected to have a material impact on them or where they have not yet assessed their impact.
	There are no Where 'Standards Issued but Yet to be Applied' listed in the disclosure above, as it is considered that none of these standards will be are not applicable to most agencies , or if applicable, will not have a material financial effect, these standards do not have to be individually listed in this note. These standards have not been disclosed because agencies do not have to include standards that would never apply to them
	financial impact on them. As such, most agencies will be able to simply use
	The disclosure wording included in this note for their own financial statements. is currently being reviewed by the Financial Reporting and Framework Branch, and updated wording to be included in this note will be provided to agencies in AADP 307 ACT Accounting Disclosure Paper on the AASB Standards Issued but yet to be Applied which will be released in June this year. This updated wording should be adopted, where appropriate, rather than the wording included above in the Model.
	It is recommended that agencies review all the standards issued but yet to be applied to ensure these standards do not

Reference	NOTE 4. CHANGE IN ACCOUNTING POLICY AND ACCOUNTING ESTIMATES, AND CORRECTION OF A PRIOR PERIOD ERROR
AASB 101.10(e)	Change in Accounting Policy
	[Agencies are to insert any changes in accounting policy where relevant.]
	'Burley Griffin Agency' has early adopted changes to AASB 101 resulting from AASB 2021/2 Amendments to Australian Accounting Standards – Disclosure to Accounting Policies and Definitions of Accounting Policies and Definition of Accounting Estimates. References are now to 'material' accounting policies rather than 'significant' accounting policies in these financial statements.
	Change in Accounting Estimates 'Burley Griffin Agency' had the following changes in accounting estimates during the reporting period.
AASB 108.34 & 39	Revisions of Useful Lives and Residual Values 'Burley Griffin Agency' reviewed the useful lives and residual values of its property, plant and equipment at the end of the reporting period. This review resulted in the adjustment to the useful lives of some community and heritage and community assets and the increase of the residual value of some plant and equipment, for details see Note 19 Property, Plant and Equipment.
	Revision of Restructuring Provision 'Burley Griffin Agency' reviewed its provision for the restructuring of a maintenance division at the end of the reporting period. It was determined that the initial amount estimated for the dismantling and disposing of plant and equipment was overstated and as such has been reduced, for details see Note 28 Other Provisions.
	Correction of Prior Period Errors
	[Agencies are to insert any prior period errors where relevant.]
	An example disclosure for a correction of a prior period error is contained in the Accounting Disclosure Paper – Presenting Restatements of Comparatives. This a separate supplementary paper to this Model.
	Commentary – Note 4: Change in Accounting Policy and Accounting
	Estimates, and Correction of a Prior Period Error
	Change in Accounting Policy
	For information concerning the treatment and disclosure of a Change in Accounting Policy please refer to the Accounting Disclosure Paper – Presenting Restatements of Comparatives on the ACT Accounting website at https://treasury.act.gov.au/accounting. This is a separate supplementary paper to this Model.
	Only affected line items are included in the Operating Statement and Balance Sheet table.
	If the impact on the Statement of Cash Flows is material, then a table showing the changes (similar to the operating statement and the balance sheet) should be included.
	Change in Accounting Estimate
AASB 108.36	 The effect of a change in an accounting estimate shall be recognised prospectively in the Operating Statement in: the period of the change, if the change affects that period only; or
	 the period of the change and future periods, if the change affects both.
AASB 108.37	Except to the extent that a change in an accounting estimate gives rise to changes in assets and liabilities, or relates to an item of equity, it shall be recognised by adjusting the carrying amount of the related asset, liability or equity item in the reporting period of the change.
AASB 108.39, AASB 108.40	Agencies are required to disclose the nature and amount of a change in an accounting estimate that has an effect in the current reporting period or is expected to have an effect in future reporting periods, except for the disclosure of the effect on future reporting periods when it is impracticable to estimate that effect. If the amount of the effect in future periods is not disclosed because estimating it is impracticable, that fact shall be disclosed.

Reference

Commentary – Note 4: Change in Accounting Policy and Accounting Estimates, and Correction of a Prior Period Error – Continued

For property, plant and equipment, disclosure of a change in an accounting estimate may arise from changes in estimates with respect to:

- residual values;
- the estimated costs of dismantling, removing or restoring items of property, plant and equipment;
- useful lives; and
- depreciation methods.

For further information concerning the treatment and disclosure of a Change in Accounting Estimate please refer to the *Accounting Disclosure Paper – Presenting Restatements of Comparatives* on the ACT Accounting website at https://treasury.act.gov.au/accounting. This is a separate supplementary paper to this Model.

Correction of Prior Period Errors

For information concerning the treatment and disclosure of a correction of a prior period error, please refer to the *Accounting Disclosure Paper - Presenting Restatements of Comparatives* on the ACT Accounting website at https://treasury.act.gov.au/accounting.

Modification

Agencies should modify this note to their particular requirements. For example, if an agency only has a change in accounting policy and no corrections of errors or change in accounting estimates, then only the section on changes in accounting policy is required. The note title should only reflect what the note contains.

In the event that an agency has none of these items to report, then the note should be omitted in its entirety.

INCOME NOTES

Material Accounting Policies – Income

Income Recognition

The following material accounting policies relate to each income note unless stated otherwise in the individual note. Revenue is recognised in accordance with AASB 15 *Revenue from Contracts with Customers* where the contract is enforceable and contains sufficiently specific performance obligations, otherwise revenue is in the scope of AASB 1058 *Income of Not-for-Profit Entities*.

AASB 15

The core principle of AASB 15 is that revenue is recognised on a basis that reflects the transfer of promised goods or services to customers at an amount that reflects the consideration the entity expects to receive in exchange for those goods or services. Revenue is recognised by applying a five step model as follows:

- 1. identify the contract with the customer;
- 2. identify the performance obligations;
- 3. determine the transaction price;
- 4. allocate the transaction price; and
- 5. recognise revenue as or when control of the performance obligation is transferred to the customer.

Generally, the timing of the payment for sale of goods and rendering of services corresponds closely to the timing of satisfaction of the performance obligations, however where there is a difference, it will result in the recognition of a receivable, contract asset or contract liability.

None of the revenue streams of the Agency have any significant financing terms as there is less than 12 months between receipt of funds and satisfaction of performance obligations.

AASB 1058

Where revenue streams are in the scope of AASB 1058, the Agency recognises the asset received (generally cash or other financial asset) at fair value, recognises any related amount (e.g. liability or equity) in accordance with an accounting standard and recognises revenue as the residual between the fair value of the asset and the related amount on receipt of the asset.

Where a service concession unearned revenue liability is recognised, revenue will be recognised as the liability unwinds.

Reference	Commentary – Income Notes
AASB 15.114	An agency shall disaggregate revenue recognised under AASB 15 and AASB 1058 into categories that depict how the nature, amount, timing and uncertainty of revenue and cash flows are affected by economic factors.
	A not-for-profit agency shall assess which revenue standard is applicable to its income streams. For a not-for-profit agency, the majority of income streams are likely to be under either AASB 15 or AASB 1058. Because AASB 1058 undertakes a residual approach, an agency should assess the applicability of AASB 15 before it considers the application of AASB 1058.
AASB 15.9	AASB 15 applies to contracts with customers that are enforceable and sufficiently specific. If the contract does not meet
AASB 15.9Aus1	these criteria, an agency shall consider the requirements of AASB 1058 in accounting for such contracts.
AASB 15.113(a)	NOTE E SALES OF COODS AND SERVICES FROM CONTRACTS
	NOTE 5. SALES OF GOODS AND SERVICES FROM CONTRACTS
	WITH CUSTOMERS
	Description and Material Accounting Policies relating to the Sale of Goods and Services
	'Burley Griffin Agency' earns revenue from providing goods and services to other ACT Government agencies, private sector consumers and to the public. This revenue is legally retained by the Agency and driven by consumer demand. All revenue recognised in this note is user charge revenue.
AASB 15.9-90	Revenue is recognised either over time or at a point in time. Any distinct goods or services are separately identified and any discounts or rebates in the contract price are allocated to the separate elements. Revenue is based on the transfer of promised goods or services to customers at an amount that reflects the consideration in exchange for those goods or services. The timing of the payment for sale of goods and rendering of services largely corresponds with the timing of satisfaction of the performance obligations, however where there is a difference, it will result in the recognition of a receivable, contract asset or contract liability. Where payment is not received at the time of purchase, payments from customers are generally required within <xx> days of the provision of services.</xx>
AASB 15.123	'Burley Griffin Agency' undertakes an annual review to determine whether the goods and services it provides need to be classified as revenue from contracts with customers in accordance with AASB 15. These reviews involve contacting business units across 'Burley Griffin Agency' to obtain information primarily regarding any new contracts and other arrangements in order to make an assessment about whether they fall within the scope of AASB 15. The annual reviews also involves an assessment of any changes to existing contracts and other arrangements. 'Burley Griffin Agency' then assesses its revenue from contracts with customers and uses key judgements in determining the satisfaction of performance obligations. Key judgements are also used in determining the transaction price and the amounts allocated to performance obligations. As a result, 'Burley Griffin Agency' determined the goods and services to be classified as revenue from contracts with customers which have been included in this note as outlined below:
	Sale of Goods
AASB 15.119	This revenue stream relates to 'Burley Griffin Agency' selling various ACT environmental merchandising to tourists visiting
AASB 15.125	Canberra and to the ACT community. Revenue is recognised at the transaction price when 'Burley Griffin Agency' transfers control of the goods to customers. This occurs when the environmental merchandising is sold to the customer and the transfer of physical possession to the customer occurs. No volume discount is provided. Merchandising sold comes with the ability to return it within a 7-day period. Given historical data shows that there is an immaterial amount of refunds for returned goods, the full selling price is recognised as revenue.
	Sale of Land
	This revenue stream relates to 'Burley Griffin Agency' selling residential land to the public, selling commercial and industrial land to businesses and selling community land to community groups operating in the ACT. Revenue is recognised by 'Burley Griffin Agency' when settlement occurs, because the purchaser has control of the land at this point in time. That is, at settlement, the purchaser has legal title to the land, they obtain all the risks and rewards of ownership of the land and the purchaser can prevent others from accessing and directing the use of the land.

Reference	NOTE 5. SALES OF GOODS AND SERVICES FROM CONTRACTS
AASB 15.119	WITH CUSTOMERS – CONTINUED
AASB 15.124 AASB 15.119 AASB 15.125	Property Management Services This revenue stream relates to property management services and includes the management of government owned commercial buildings, government office accommodation, multi-purpose buildings and leases of commercial buildings on behalf of the Territory. The property management services contracts are generally for three years, are with other ACT Government Agencies, and the total charge for these services is based on a percentage of the rent. All these contracts have the same or similar terms and conditions. The contracts outline that the property management service revenue stream is made up of a number of activities comprising maintenance, cleaning, security and landscaping. 'Burley Griffin Agency' concluded that these activities are not distinct within the context of the contract because the performance obligation is to ensure the property is open and operating as intended each month over the term of the contract. The other ACT Government agencies that are obtaining these property management services receive and consume the benefits of each activity when they are provided on a monthly basis, and as such, revenue is recognised on a monthly basis.
	Facilities Management Services Revenue This revenue stream relates to facilities management services provided to private sector clients. Facilities management services involve building and equipment maintenance. Control of the performance obligation is transferred at a point in time when the work is complete.
AASB 15.113(a)	 Event Revenue This revenue stream relates to the promotion and management of major sporting events at venues including 'Example Stadium' and 'Example Oval'. A major event is considered to be a match or feature that is a national or international fixture. Major sporting events promoted and managed by 'Burley Griffin Agency' include rugby, cricket and soccer matches. All contracts for these three sporting events have similar terms and conditions and involve 'Burley Griffin Agency' providing ticketing services, negotiating advertising signage at the ground, advertising the event through various types of media, and providing game day logistics, catering and cleaning.
	Event revenue contracts contain four performance obligations, each of which are satisfied at a point in time upon completion. The first performance obligation is upon signing the contract to run a major event and at this point 10% of the contract revenue is payable to 'Burley Griffin Agency' so this revenue is recognised at this point. The second performance obligation is upon the completion of signage negotiations which is required to be completed two weeks before the event. At this point a further 20% of contract revenue is recognised. The third performance obligation relates to ticketing and advertising and is required to commence one month from the event and finish the day before the event. At this point a further 30% of contract revenue is recognised evenly over this one-month period. The fourth performance obligation relates to the game day logistics, catering and cleaning. The final 40% of the contract revenue is recognised on the day of the event.
	Fare Revenue This revenue stream relates to fare revenue from the provision of public transport services. 'Burley Griffin Agency' recognises fare revenue from buses but has provided 'Example Metro' with a right to charge third-party users of the light rail and as such 'Burley Griffin Agency' does not recognise revenue from light rail services. The performance obligation is the provision of public transport services to the customer. Fares revenue is recognised when customers board the bus.
AASB 15.119	Waste Fees This revenue stream relates to fees being charged where certain types of waste require special burial arrangements. This waste includes oil, batteries, paint and asbestos. The performance obligation is the provision of landfill site access to a customer. Revenue is recognised at the time of disposal of contaminated waste at the landfill sites.
	COVID-19 Impact Since the commencement of the COVID-19 pandemic 'Burley Griffin Agency' has lost a material amount of public transport fare revenue. Bus patronage decreased to an estimated 25% of pre COVID 19 levels in August 2021 due to a restricted service operating and lock down introduced by the ACT Government is response to the Delta outbreak. Since the lockdown ended in November 2021 and public transport services reverting to a normal timetable, patronage has since slowly recovered and is now estimated to be at 90% of pre COVID 19 levels. The reduction in patronage over the current financial year has resulted in lower fare revenue of approximately \$xxx million when compared to pre pandemic levels. However after the lockdown was lifted in November 2021 and people have returned to school and work, the amount of public transport patronage has slowly recovered and is now estimated to be at 90% of pre COVID-19 levels. Given the continuation of flexible working arrangements post the pandemic, there is still a large number of people working partly or fully from home which has resulted in lower numbers of the public accessing public transport over the current financial year. This has resulted in lower public transport revenue when compared to pre-pandemic levels.

Reference NOTE 5. SALES OF GOODS AND SERVICES FROM **CONTRACTS WITH CUSTOMERS – CONTINUED** 2023 2022 \$'000 \$'000 Sales of Goods and Services from Contracts with Customers AASB 15.114 Sale of Goods AASB 15 114 Sale of Land AASB 15.114 Service Revenue AASB 15.B89 - Property Management Services Revenue^a AASB 15.B89 - Facilities Management Services Revenue AASB 15.B89 - Event Revenue AASB 15.B89 - Fare Revenue AASB 15.114 Waste Fees Other **Total Sales of Goods and Services from Contracts with Customers** The increase in Property Management Service Revenue Fees of Sxxx is mainly due to the rise in rental prices in the a) ACT, with the property management fees charged as a percentage of the rent. Commentary – Note 5: Sales of Goods and Services from Contracts with Customers Revenue recorded in this note is within the scope of AASB 15 Revenue from Contracts with Customers, i.e. exists within an enforceable contract with sufficiently specific performance obligations. The disaggregation shown in this note is by type of revenue but this breakdown is an example only. Agencies need to AASB 15.114.B87-89 include a breakdown of all material revenue line items from contracts with customers into categories that depict how **ACT Disclosure Policy** the nature, amount, timing, and uncertainty of revenue and cash flows are affected by economic factors. In addition, agencies should modify the length of the description and material accounting policies provided for each ACT Disclosure Policy revenue type based on the materiality and complexity of that revenue type. That is, the more material and complex the revenue type, the the description and accounting policy should be for that revenue type. The less material and complex the revenue type, the less detailed shorter the description and accounting policy should be for that revenue type. For example, in the Model Financial Statements, a detailed description and accounting policy has been included for ACT Disclosure Policy Events Revenue as, for 'Burley Griffin Agency', this revenue type is both material and complex. However, for agencies that have 'Events Revenue' that is less material and complex, it is expected that agencies would shorten the wording to be less descriptive. On the other hand, in the Model Financial Statements, a less detailed description and accounting policy has been included for 'Waste Fee Revenue' as, for 'Burley Griffin Agency', this revenue type is both less material and less complex. However, for agencies that have 'Waste Revenue' that is more material and complex, it is expected that agencies would lengthen the wording to be more descriptive. **Revenue Recognition** To determine whether to recognise revenue under AASB 15, agencies must follow a five-step process: AASB 15 9-90 identifying the contract with a customer; identifying the performance obligations; • determining the transaction price; allocating the transaction price to the performance obligations; and • recognising revenue when/as performance obligations are satisfied. Revenue is recognised when (or as) an agency satisfies performance obligations by transferring a promised good or AASB 15 31-32 service to a customer. Agencies need to consider the pattern of revenue recognition for each revenue type and for each performance obligation, to determine whether contract revenue is recognised over time or at a point in time. According to AASB 15, revenue shall be recognised when the agency satisfies a performance obligation by transferring a AASB 15.31 promised good or service (i.e. an asset) to a customer. An asset is transferred when (or as) the customer obtains control of that asset:

Reference	Commentary – Note 5: Sales of Goods and Services from Contracts with
	Customers – Continued
AASB 15.32	 for each performance obligation identified in a contract, an agency shall determine at contract inception whether it satisfies the performance obligation over time or satisfies the performance obligation at a point in time;
AASB 15.35	 an agency transfers control of a good or service over time and, therefore, satisfies a performance obligation and recognises revenue over time, if one of the following criteria is met: (a) the customer simultaneously receives and consumes the benefits provided by the agency's performance as the agency performs; (b) the agency's performance creates or enhances an asset (for example, work in progress) that the customer controls as the asset is created or enhanced; or (c) the agency's performance does not create an asset with an alternative use to the agency and the agency has an enforceable right to payment for performance completed to date;
AASB 15.39	 for each performance obligation satisfied over time, an agency shall recognise revenue over time by measuring the progress towards complete satisfaction of that performance obligation. The objective when measuring progress is to depict an agency's performance in transferring control of goods or services promised to a customer (i.e. the satisfaction of an agency's performance obligation);
AASB 15.40	 an agency shall apply a single method of measuring progress for each performance obligation satisfied over time and the agency shall apply that method consistently to similar performance obligations and in similar circumstances. At the end of each reporting period, an agency shall remeasure its progress towards complete satisfaction of a performance obligation satisfied over time; and
AASB 15.38	• if a performance obligation is not satisfied over time, an agency satisfies the performance obligation at a point in time. Revenue should be recognised at the point in time at which a customer obtains control of a promised asset and the agency satisfies a performance obligation.
AASB 15.124(a)&(b) AASB 15.125	For performance obligations that the agency satisfies over time it shall disclose the methods used to recognise revenue, for example a description of the output methods or input methods used and how they are applied and an explanation of why the methods used provide a faithful depiction of the transfer of goods or services. For performance obligations that are satisfied at a point in time, agencies shall disclose the significant judgements made in evaluating when a customer obtains control of the goods or services.
	Significant Accounting Judgement and Estimates – Revenue from Contracts
	Agencies should ensure that they refer to all material significant judgements and estimates made in applying AASB 15 and AASB 1058, including determining the appropriate accounting standard, performance obligations and the pattern of when control of goods and services is transferred transfer of goods and services. These disclosures should be specific to the agency.
AASB 15.123	Key Significant judgements include determining the timing of revenue from contracts with customers in terms of timing of satisfaction of performance obligations, and determining the transaction price and the amounts allocated to performance obligations.
	Estimation uncertainty includes determining the transaction price (estimating variable consideration, adjusting the consideration for the time value of money and measuring non-cash considerations), allocating the transaction price, including estimating standalone selling prices and allocating discounts and variable consideration.
AASB 15.114 AASB 1058.24	Revenue Categories
	Revenue from contracts with customers under AASB 15 must be disclosed separately from other sources of revenue.
AASB 15.113(a)	Examples of categories of revenue within the scope of AASB 15 that might be appropriate include, but are not limited to, all of the following:
AASB 15.B89	 type of good or service (for example, major product lines);
	 geographical region (for example, country or region);
	 market or type of customer (for example, government and non-government customers);
	• type of contract (for example, fixed-price and time-and-materials contracts);
	contract duration (for example, short-term and long-term contracts);
	• timing of transfer of goods or services (for example, revenue from goods or services transferred to customers at a point in time and revenue from goods or services transferred over time); and
	• sales channels (for example, goods sold directly to consumers and goods sold through intermediaries).
	Examples of categories of income within the scope of AASB 1058 that might be appropriate include, but are not limited to, all of the following:
	 grants, bequests and donations of cash, other financial assets and goods;
	recognised volunteer services; and
AASB 1058.26	appropriation income.

Reference	Commentary – Note 5: Sales of Goods and Services from Contracts with Customers – Continued
	User Charge Revenue
	User charge revenue relates to the sale of goods or provision of services to other entities (including ACT Government Entities). User charges are generated by consumer demand, are market related and have a commercial nature. They are non-regulatory in nature, in that they are not a policy instrument that government uses to regulate an activity.
	Transaction Price
AASB 15.46 AASB 15.48	AASB 15 requires recognition of revenue at the amount of the transaction price that is allocated to the performance obligation(s). When determining the transaction price, an agency shall consider the effects of variable consideration, constraining estimates of variable consideration, the existence of a significant financing component in the contract, non-cash consideration, and consideration payable to a customer.
	For further information please see ACT Guidance Paper: Revenue Disclosures and Workpapers on the ACT Accounting website at https://treasury.act.gov.au/accounting.
	NOTE 6. GRANTS AND CONTRIBUTIONS REVENUE
	Description and Material Associating Balisias relating to Croate and Contributions Bayonus
	Description and Material Accounting Policies relating to Grants and Contributions Revenue General Grants and Contributions Accounting Policy
AASB 1058.9 AASB 1058.18 AASB 1058.15	Where 'Burley Griffin Agency' receives an asset or services for significantly less than fair value then the transaction is in the scope of AASB 1058 and revenue is recognised on receipt of the asset/services. The related expense and/or asset is recognised in the line item to which it relates, when the services are received.
	Goods and services received free of charge from ACT Government agencies are recognised as resources received free of charge, whereas goods and services received free of charge from entities external to the ACT Government are recognised as grants, donations or contributions.
	All the services listed below are recognised in the Operating Statement or Balance Sheet as appropriate as services received free of charge given they are reliably measurable and would have been purchased if not provided to the Agency free of charge.
AASB 1058.18	Legal Services Legal Services were received free of charge from the ACT Government Solicitor's Office (GSO) due to legal action resulting from 'Burley Griffin Agency' burying waste material in landfill which then leaked and contaminated the area and nearby farmland. The GSO provided the directorate with the fair value of the services provided.
	Chief Minister, Treasury and Economic Development Directorate (CMTEDD) Resource Received Free of Charge
	Shared Services Resource Received Free of Charge
	'Burley Griffin Agency' is required by the ACT Government to use Shared Services for its financial and HR processing. Shared Services is part of CMTEDD. Given Shared Services is directly appropriated by the ACT Government to provide certain services at a fixed cost to 'Burley Griffin Agency', it means that the Agency does not have to pay for these services.
	Professional Standards Unit (PSU) Professional Standards Unit (PSU) is part of CMTEDD and provides investigation services regarding misconduct and other complaints relating to employees across the ACT Public Service. In addition to investigating complaints, PSU, through the office of the Public Sector Standards Commissioner also advises the Chief Minister on matters arising from investigations conducted.
	Given PSU is directly appropriated by the ACT Government, 'Burley Griffin Agency' does not have to pay for these services. CMTEDD provided 'Burley Griffin Agency' with the fair value of the services provided.
	Territory Records Office (TRO) TRO provides record management services to 'Burley Griffin Agency' free of charge. TRO is directly appropriated to provide these services across the ACT Government and as such, 'Burley Griffin Agency' is required to use these services. CMTEDD provided 'Burley Griffin Agency' with the fair value of the services provided. TRO is part of CMTEDD.
	Project Management Services provided by Major Projects Canberra (MPC) MPC provides procurement and infrastructure delivery services to 'Burley Griffin Agency' free of charge. MPC is directly appropriated to deliver these services and as such, 'Burley Griffin Agency' is required to use these services. The fair value of these services provided are capitalised on the Balance Sheet as they are directly attributable to the creation of the assets for which the service is provided.

NOTE 6. GRANTS AND CONTRIBUTIONS REVENUE – CONTINUED

Description and Material Accounting Policies relating to Grants and Contributions Revenue – Continued

Volunteer Services Received Free of Charge

Each financial year 'Burley Griffin Agency' runs 'Example Multicultural Festival'. As part of the festival approximately 130 staff from within the ACT Government volunteered to help out and undertake tasks such as Area Wardens, Reception Assistants Assistances, Festival Information Tent Officers, VIP Welcome Assistants and Logistics Radio Officers. In addition, approximately 40 volunteers external to the ACT Government also assisted in the running of the festival.

The value of these volunteers' time can be reliably measured by 'Burley Griffin Agency' as a number of quotes were obtained from the private sector to provide services for the festival, however these services were ultimately undertaken by volunteers.

COVID-19 Administration and Logistical Support

During the COVID-19 pandemic 'Burley Griffin Agency' received support free of charge from other ACT Government Agencies with the administration of a new public transport timetable. The timetable had to be altered in 2021-22 due to the lockdown that occurred in Canberra in August through to November 2021 resulting from a COVID outbreak. The timetable has had to be altered again in 2022-23 due to the steady increase in the volume of public transport services being offered to the public after the lockdown was lifted.

Concessional Loan Discount Income

In July 2022 'Burley Griffin Agency' received a concessional loan from the Environment, Planning and Sustainable Development Directorate under the 'Zero Emissions Government Fund'. Under this scheme, loans are provided to other ACT Government agencies to undertake larger scale energy and resource efficient projects to reduce greenhouse gas emissions and to reduce the impacts of rising utility costs. For further details in relation to this concessional loan scheme refer to Note 25 *Borrowings*.

Concessional Loan Discount Income is recognised at the commencement of the concessional loan and is measured as the difference between the present value of the loan calculated using the concessional rate (face value) and the present value of the loan calculated using the market rate (fair value).

Grants with Sufficiently Specific Performance Obligations Other Grants and Contributions

'Grants with Sufficiently Specific Performance Obligations' are recognised as revenue over time in accordance with AASB 15 when 'Burley Griffin Agency' satisfies the milestones contained in the funding agreement relating to the conduct of relevant ecological surveys for 'Example Commonwealth Department'. The funding payments are normally received in advance however are not recognised as revenue until after the relevant obligation is satisfied.

Other Grants and Contributions

With the exception of the 'Concessional Loan Discount Income' and the 'Grants with Sufficiently Specific Performance Obligations' line items, 'Burley Griffin Agency' has determined that the agreements/arrangements relating to 'Other Grants and Contributions' line items included in this note are not enforceable and they do not contain sufficiently specific performance obligations for recognising revenue from contracts with customers under AASB 15. This is because none of the arrangements require 'Burley Griffin Agency' to provide an equal amount in return for the consideration received. As such, AASB 1058 has been applied for recognising this revenue. This revenue is recognised upon receipt of the donation, the grant funding or restructure fund receipts, with the exception of the 'Grants to Acquire or Construct Assets to be Controlled by the Agency' line item.

Where 'Burley Griffin Agency' receives 'Grants to Acquire or Construct Assets to be Controlled by the Agency' that meet the following criteria:

- the contract is enforceable;
- the financial asset is to be used to acquire or construct a non-financial asset which will be recognised by the agency; and
- the asset is not required to be transferred to any other party;

then a liability is recognised on receipt of funds and revenue is recognised as the acquisition or construction occurs, using a progressive percentage of costs incurred because this most closely reflects the progress to completion.

	Resource Provided Free of Charge
	'Burley Griffin Agency' provided various services free of charge to other ACT Government agencies throughout the financial year. These services have been recognised in 'Burley Griffin Agency's' Operating Statement as expenses in the relevant expense line items. Therefore the figures included in this note are disclosures only and the total Resources Provided Free of Charge does not appear as a separate line item in the Operating Statement.
	Resources Provided Free of Charge
	Resources Provided Free of Charge Publication Services
	COVID-19 Support Services
	Total Resources Provided Free of Charge
	Commentary – Note 6: Grants and Contributions Revenue
	AASB 1058 Income of Not-for-Profit Entities
AASB 1058.1	AASB 1058 applies to transactions where the consideration to acquire an asset is significantly less than fair value principally to enable a not-for-profit agency to further its objectives (i.e. transactions with a donation nature) and the receipt of volunteer services.
AASB 1058.8 AASB 1058.9	According to AASB 1058, an agency shall apply the requirements of other Australian Accounting Standards (as relevant) to an asset arising from a transaction (e.g. AASB 9 <i>Financial Instruments</i> for cash received). On initial recognition of the asset, an agency shall recognise any related contributions by owners, increases in liabilities, decreases in assets ('related

amounts'), and revenue in accordance with other Australian Accounting Standards.

Reference	Commentary – Note 6: Grants and Contributions Revenue - Continued
AASB 1058.10 AASB 1058.15	For transactions within the scope of AASB 1058, an agency shall recognise income immediately in profit or loss for excess of the initial carrying amount of an asset over the related amounts recognised in accordance with the otle standards (referred to above).
AASB 1058.16	 There is an exception where a transfer of a financial asset is to enable an agency to acquire or construct a recognisation non-financial asset that will be controlled by the agency. This exception applies to a transfer that: requires the agency to use that financial asset to acquire or construct a recognisable non-financial asset identified specifications; does not require the agency to transfer the non-financial asset to the transferor or other parties; and occurs under an enforceable agreement. An agency shall recognise a liability for the excess of the initial carrying amount of a financial asset received in suc transfer over any related amounts recognised. The agency shall recognise income in profit or loss when the agency satisfies its obligations under the transfer. Contribution of Services
AASB 1058.18 &22 ACT Disclosure Policy	 Contribution of services (resources received free of charge) must be recognised at their fair value if: the fair value can be reliably measured; and
	 the services would have been purchased if not received free of charge. Resources received free of charge comprise resources received from other ACT Government agencies. It does not inclure resources received from external parties.
AASB 1058.27	Where revenue is recognised through a contract which is not enforceable or does not contain sufficiently spect performance obligations then it is within the scope of AASB 1058 and should be included within this note.
	Disclosure should be included regarding the extent of volunteer services used regardless of whether the value of services has been recognised.
	 Where Agencies receive capital grants that meet the following: the contract is enforceable;
	 the financial assets are to be used to acquire or construct a non-financial asset which will be recognised on agency's books; and the asset is not required to be transferred to any other party. then this transaction is separately identified as the revenue is recognised as the asset is constructed or acquired rational terms are received as the funde.
	than on receipt of the funds. Restructure Fund Receipts should be classified as Contributions and should be shown gross rather than netted off again the related termination expense.
	Legal Services The Government Solicitors Office will provide agencies with the amount of resources that they have provided free charge in the financial year.
	Agencies need to ensure they do not disclose legally sensitive information.
	Resources Provided Free of Charge The Resources Provided Free of Charge information included in this note is a disclosure only. That is, all the expension which are incurred in providing the resources free of charge to other ACT Agencies are included as expenses in expense line items to which they relate on the face of the Operating Statement. Therefore, the total Resources Provide Free of Charge figure does not appear as a separate line item on the face of the Operating Statement (ie the to Resources Provided Free of Charge figure cannot be matched back to one single figure on the Operating Statement)
	In the situation where an agency has an immaterial amount of Grants and Contributions Revenue and therefore de not include a 'Grants and Contributions Revenue' note in their financial statements but has a material amount Resource Provided Free of Charge, it is suggested that the agency include a separate note after the 'Other Expense note titled 'Resource Provided Free of Charge'.

	 a) The increase in interest received from loan receivable of \$xxx reflects the issuing of more loans under the 'Example Home Loan Scheme' due to an increased demand for the scheme throughout the reporting period.
	Commentary – Note 7: Investment and Interest Revenue
	Whole-of-Government Banking Arrangements
AASB 9.5.4.1	Agencies can have either set-off or non set-off bank accounts through the Territory Banking Account with Westpac as part of the Whole-of-Government Banking Arrangement. Agencies that have set-off bank accounts will not earn interest on the funds in those accounts. However, agencies that have set-off bank accounts will earn interest on the funds in those accounts which should be recorded in this note. Where this is the case agencies should measure interest revenue using the effective interest method and should disclose this fact under the 'Description and Material Accounting Policies relating to Investment and Interest Revenue' heading in the Investment and Interest Revenue Note.
AASB 101 para 82(a)	Split of Investment and Interest Revenue The amount included in the 'Interest Revenue' sub-total under the 'Split of Investment and Interest Revenue' heading in this note should only include interest revenue which has been calculated using the effective interest rate method. All other revenue amounts should be included in the 'Investment Revenue' sub-total under the 'Split of Investment and Interest Revenue' heading.
ACT Disclosure Policy	Income from Investment Property This note includes income earned from both owned investment property through head leases and income earned through sub-lease arrangements.

	The breakdown shown in this note disclosure is an example only. Agencies should only include line items that ar applicable to them where material.
AASB 101.35	Gains and losses arising from a group of similar transactions should be reported on a net basis. However, if the gains an losses are material they should be reported separately.
AASB 101.7 AASB 108.5 ACT Disclosure Policy	The notion of materiality applies to the classification of other income. Each material class of gains must be disclose separately and the total of unclassified gains must not exceed 10% of total gains disclosed in the note.
	Service Concession Arrangements
	Where Service Concession Arrangement revenue is material when compared to total revenue of an agency then it wi warrant its own line item on the face of the financial statements. Where it is immaterial in the context of this note the agencies should consider its inclusion in the 'Other Revenue' line item.

Reference	NOTE 10. EMPLOYEE AND SUPERANNUTION EXPENSES
	Description and Material Accounting Policies Relating to Employee and Superannuation Expenses
AASB 119.5 & 9	Employee benefits include:
	 short-term employee benefits such as wages and salaries, annual leave loading, non-monetary benefits (vehicles) and applicable on-costs, if expected to be settled wholly before twelve months after the end of annual reporting period in which the employees render the related services;
	 other long-term benefits such as long service leave and annual leave; and
	termination benefits.
ACT Disclosure Policy AASB 119.5(b) & 53	On-costs include annual leave, long service leave, superannuation and other costs that are incurred when employ take annual leave and long service leave.
	Employees of 'Burley Griffin Agency' will have different superannuation arrangements due to the type of superannuat schemes available at the time of commencing employment, including both defined benefit and defined contribut superannuation scheme arrangements.
	For employees who are members of the defined benefit Commonwealth Superannuation Scheme (CSS) and Public Sec Superannuation Scheme (PSS) 'Burley Griffin Agency' makes employer superannuation contribution payments to Territory Banking Account at a rate determined by the Chief Minister, Treasury and Economic Development Directora The 'Burley Griffin Agency' also makes productivity superannuation contribution payments on behalf of these employe to the Commonwealth Superannuation Corporation, which is responsible for administration of the schemes.
	For employees who are members of defined contribution superannuation schemes (the Public Sector Superannuat Scheme Accumulation Plan (PSSAP) and schemes of employee choice) 'Burley Griffin Agency' makes emplo superannuation contribution payments directly to the employees' relevant superannuation fund.
	All defined benefit employer superannuation contributions are recognised as expenses on the same basis as employer superannuation contributions made to defined contribution schemes. The accruing superannuation liabit obligations are expensed as they are incurred and extinguished as they are paid.

Reference	Commentary – Note 10: Employee and Superannuation Expenses
AASB 119.11	Where an employee has rendered services to the agency during a reporting period, the agency must recognise as an expense (and a liability) the undiscounted amount of short-term employee benefits, including non-monetary benefits, expected to be settled in exchange for that service. Wages and salaries include the cost of any components of a wage or salary package and related Fringe Benefits Tax.
	Termination expense represents the movement in the provision for termination benefits outlined in Note 27 <i>Employee Benefits</i> . This provision relates solely to redundancies paid to employees as a result of positions being abolished due to a restructuring of the agency.
AASB 119.83 FFM Memo 2015/12 ACT Accounting Policy Employee Benefits	Territory Authority Commentary <i>Corporate Bond Rate</i> The rate used by for-profit authorities to discount employment benefit obligations (both funded and unfunded) is determined by reference to market yields at the end of the reporting period on high quality corporate bonds.
	NOTE 11. SUPPLIES AND SERVICES
	Description and Material Accounting Policies Relating to Supplies and Services General - Supplies and Services
	Purchases of Supplies and Services generally represent the day-to-day running costs incurred in normal operations, recognised in the reporting period in which these expenses are incurred.
	Legal Expenses 'Burley Griffin Agency' has recognised legal expenses related to legal services received free of charge from the ACT Government Solicitor's Office (GSO). The legal services were provided due to legal action being taken against 'Burley Griffin Agency' for burying waste material in landfill which then leaked and contaminated the area and nearby farmland. The GSO provided 'Burley Griffin Agency' with the fair value of the services provided.
AASB 16.5(a)&(b), B3- B8,B14	Lease Rental Payments Lease Rental Payments includes short-term leases of 12 months or less and low value leases up to \$10,000 as well as non-specialised accommodation leases with Property Group.
AASB 1054.10 (a) &(b)	Auditor Service Fees Audit Fees are included in the Contractors and Consultants line item below. Auditor's remuneration consists of financial audit services provided to the Agency by the ACT Audit Office and any other services provided by a contract auditor engaged by the ACT Audit Office to conduct the financial audit. 'Burley Griffin Agency's' audit fees for the audit of its 2022-23 financial statements was \$xxx (\$xxx 2021-22). No other services were provided by the ACT Audit Office.
AASB 16.5(a)&(b) &B3- B8;	Insurance Major risks are insured through the ACT Insurance Authority. The excess payable, under this arrangement, varies depending on each class of insurance held.
	Repairs and Maintenance Maintenance expenses, which do not increase the service potential of an asset, are expensed.

	Commentary – Note 11: Supplies and Services				
	The breakdown of Supplies and Services shown above is an example only. Agencies will need to include breakdown of all material line items in the Supplies and Services expenses note disclosure.	their own			
	Auditor's Remuneration				
AASB 1054 10 & 11	AASB 1054 Australian Additional Disclosures requires agencies to disclose the fees to:				
	• the auditor of the agency for an audit or a review of its financial statements; and				
	• the auditor of the agency for non-audit services in relation to the agency, disclosing separately the r amount of each of the non-audit services provided by the auditor.				
	If auditor remuneration amounts are immaterial (when compared to total Supplies and Services) then age include the amount in the 'Other' line item within the Supplies and Services note disclosure.	encies can			

	NOTE 12. GRANTS AND PURCHASE	ED SERVICES	
	Description and Material Accounting Policies relating to Grants and Purch	ased Services	
ACT Disclosure Policy	Grants are amounts provided to ACT Government agencies and non-ACT Government agencies for general assistance or for a particular purpose. Grants may be for capital, current or recurrent purposes and the name or category reflects the use of the grant. The grants given are usually subject to terms and conditions set out in the contract, correspondence, or by legislation.		
	Grants are goods, services or assets that are provided to another entity wit return. 'Burley Griffin Agency' provides recurrent grants to various commu programs. Capital Grants are payments from 'Burley Griffin Agency' that are for the construction of new buildings or to upgrade existing buildings. recognised when the services have been performed by the grantee or the Capital Grant expenses are recognised in the reporting period in which they	nity organisations under four provided to Non-Government Recurrent Grants expenditur e grant eligibility criteria has	different grant Organisations re is generally

Reference	Commentary – Note 12: Grants and Purchased Services - Continued			
	Concessional Loan Discount Expense When a concessional loan is provided by an agency, the difference between the present value calculated using the concessional rate (face value) and the present value calculated using the market rate (fair value) is recognised as a 'Concessional Loan Discount Expense'. Given 'Burley Griffin Agency' did not issue any concessional loans in the current financial year, there is no 'Concessional Loan Discount Expense' disclosed in these Model Financial Statements. Where an agency has issued concessional loans in the current financial year then a 'Concessional Loan Discount Expense' should be disclosed in their Grants and Purchased Services note where material.			
	NOTE 13. BORROWING COSTS			
AASB 123.Aus8.1 & Aus26.1, ACT Accounting Policy	Description and Material Accounting Policies Relating to Borrowing Costs All borrowing costs, including those that are directly attributable to the acquisition, construction or production of a qualifying asset, are expensed in the period in which they are incurred.			
	Expense from the Unwinding of Concessional Loan Discount Income The Concessional Loan Discount Income is recognised at the commencement of the concessional loan and is initially calculated as the difference between the loan's nominal value at the concessional rate and fair value at the market rate. 'Burley Griffin Agency' then unwinds this income over the term of the loan on a straight-line basis which is recognised each year as the 'Expense from the Unwinding of Concessional Loan Discount Income'. In addition, the concessional loans provided to 'Burley Griffin Agency' are interest free meaning that the concessional rate paid by 'Burley Griffin Agency' is zero percent.			
	'Burley Griffin Agency' received a concessional loan from the Environment, Planning and Sustainable Development Directorate under the 'Zero Emissions Government Fund'. Under this scheme loans are provided to other ACT Government agencies to undertake larger scale energy and resource efficiency projects to reduce greenhouse gas emissions and to reduce the impacts of rising utility costs. For further details in relation to this concessional loan scheme refer to Note 25 <i>Borrowings</i> .			
	2023 2022 \$'000 \$'000

137.60	Total Borrowing Costs			
	For more information in relation to service concession arrangements refer to Note 39 Service Concession Arrangements.			
	Commentary – Note 13: Borrowing Costs			
AASB 123.6	 Borrowing costs may include: interest on bank overdrafts and short-term and long-term borrowings; 			
	 interest in respect of lease liabilities recognised in accordance with AASB 16 <i>Leases</i>; and 			
AASB 16.49 AASB137.60	• the finance cost for the unwinding of the discount on make good provisions (recognised in accordance with AASB Interpretation 1.8).			
AASB 123.Aus 26.1	The financial statements shall disclose the accounting policy adopted for borrowing costs. This policy should be included in this note.			
AASB 123.Aus 8 AASB 123.Aus 8.1 ACT Accounting Policy	An entity must capitalise borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset, unless the entity is a not-for-profit public sector entity. A not-for-profit public sector entity may elect to recognise borrowing costs as an expense, regardless of how the borrowings are applied. ACT Accounting Policy requires all borrowing costs to be expensed in the period in which they occur. As such, all borrowing costs are expensed as incurred.			

Reference	Commentary – Note 13: Borrowing Costs - Continued
AASB 123. 8 & Aus 8.1 ACT Disclosure Policy	Territory Authority Commentary Territory authorities that are either for-profit, or not considered a public sector entity, will have to capitalise borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset. These entities may still recognise other borrowing costs as an expense in the period in which they are incurred.
	NOTE 14. OTHER EXPENSES
	Description and Material Accounting Policies Relating to Other Expenses
	Restoration of Contaminated Sites Expense 'Burley Griffin Agency' disposed of waste material by burying it in landfill, however, it was discovered that the waste had leaked and contaminated the area, including nearby farmland. As such, the Agency has recognised the estimated cost of clearing up the site as an expense.
FMA sec 131 (1)(a) FMA sec 131 (3)	Waivers A waiver is the relinquishment of a legal claim to a debt. The Treasurer may in writing, waive the right to payment of an amount owing to the Territory. In the current financial year the Treasurer has waived sports ground hire fees, loans owing to the Agency from third parties, and made other waivers. Waivers are expensed during the year in which the right to payment was waived.
	Impairment Losses – Non-Financial Assets Impairment loss expenses are recognised for both property, plant and equipment, and intangible assets when their carrying amount is higher than their recoverable amount, with the difference between the two being the amount of the impairment loss. Impairment losses for plant and equipment, lease hold improvements and intangibles are recognised as an expense in the Operating Statement. Impairment losses for land, buildings, infrastructure, and community and heritage and community assets, are only recognised as an expense when the amount of the impairment is greater than the balance in the Asset Revaluation Surplus for the relevant class of asset.
	Impairment Losses and Write-Offs – Accounts and Loans Receivables
	A matrix is used to calculate the amount of lifetime expected credit loss which factors practical and justifiable forward- looking information, including forecast economic changes expected to impact 'Burley Griffin Agency's' receivables (See Note 16 <i>Receivables and Contract Assets</i>). This method is based on the possibility of default events occurring over the lifetime of the loans.
	Losses or Deficiencies in Public Monies
ACT Disclosure Policy	 This line item includes a number of different items including: decrease in monies due to fraud;
	 monies which cannot be accounted for; and monies which have been lost.
	Losses or Deficiencies in Public Monies are expensed during the year in which these deficiencies were discovered.
	Act of Grace Payments
FMA Sec 130 ACT Disclosure Policy	The Treasurer authorised five Act of Grace Payments. Four of these payments related to an oversight made by 'Burley Griffin Agency' regarding land development applications. The fifth payment related to a delayed heritage grant payment which resulted in the recipient incurring a penalty for late payment to a third party supplier due to not receiving the grant payment on time. The land development application oversights and the delayed grant payment did not legally entitle the applicant(s)/recipient(s) to compensation, however as all were unfairly disadvantaged by 'Burley Griffin Agency', the Treasurer approved the Act of Grace Payments.
	Restructuring Expenses
	The Agency is undertaking a restructuring of a maintenance division that will result in the closure of the division and in 60 employees being made redundant. Restructuring is expected to be completed towards the end of the next reporting period.
	The restructuring expense is recognised at the point in time when a formal detailed plan has been completed by 'Burley Griffin Agency' and a valid expectation has been raised, in those affected, that the restructuring will occur.

Reference	Commentary – Note 14: Other Expenses
	The breakdown shown in this note disclosure is an example only. Agencies should only include line items that are applicable to them where material.
	Gains and losses arising from a group of similar transactions should be reported on a net basis. However, if the gains and losses are material they should be reported separately.
	If an agency has made a net gain on investments held with the Territory Banking Account it will appear as Gains from Disposals, Derecognition and Remeasurement of Assets in Note 8. If a net loss has been made, then it should be included in this <i>Other Expenses</i> note.
AASB 101.35	Revaluation decrements are expensed when a particular asset (of for-profit territory authorities), or class of assets (of not-for-profit agencies), as a whole, has been revalued downwards and there is no amount in the Asset Revaluation Surplus for that asset class for the revaluation to be offset against.
	Agencies are required to assess at each reporting date whether there is an indication that non-current assets may be impaired and if so, to assess assets for impairment. Where a not-for-profit agency has an impairment loss against an asset, which has no Asset Revaluation Surplus against the class it is in, the impairment loss is recognised in the Operating Statement. However, an impairment loss, on an asset, which has an Asset Revaluation Surplus against that Asset Revaluation Surplus to the extent that the impairment loss does not exceed the amount in the Asset Revaluation Surplus for that asset class.
AASB 116.Aus 40.1	Materiality
AASB 136.9, 10 & 61	The notion of materiality applies to the classification of other expenses. The line item 'Other Expenses' should not be disproportionately large compared to total expenses. Within the <i>Other Expenses</i> note each material class of other expenses must be disclosed separately and the total of unclassified other expenses must not exceed 10% of Total 'Other Expenses'.
ACT Disclosure Policy	Disclosures for waivers, write-offs, and act of grace payments are considered material by nature so disclosure of these line items in the <i>Other Expenses</i> note are required regardless of their amount. However, where a prior period error is discovered in relation to a wavier, write-off or act of grace payment, then the error would have to be material by amount for a correction of a prior period error disclosure to be included in the 'Change in Accounting Policy and Accounting Estimates, and Correction of a Prior Period Error' Note.
	Decrease in Monies due to Fraud
Chief Minister's Annual Report Directions	The Chief Minister's Annual Report Directions requires further disclosure of fraud in the Annual Report.
AACD 101 7	Act of Grace Payments
AASB 101.7 AASB108.5 ACT Disclosure Policy	The <i>Financial Management Act 1996</i> (FMA) states that an Act of Grace Payment made by a directorate must be reported in the notes to its financial statements in the reporting period the payments are made.
FMA sec 130(8) FMA sec 130(9)	The FMA states that the notes to the financial statements must indicate the amount and grounds for each Act of Grace payment. Where there are Act of Grace Payments which relate to the same event/situation, they can be grouped in one line item in the 'Breakdown of Act of Grace Payments' section of the 'Other Expenses' Note. Then the total number of individual Act of Grace Payments included in that line item are required to be disclosed for that line item. For example, in the above note, there are four individual payments relating to an oversight made by 'Burley Griffin Agency' regarding land development applications. Therefore this is disclosed as a single line item and would include four against the number of Act of Grace Payments for that line item.
FMA sec 130(10) ACT Disclosure Policy	The FMA also states that the financial statements shall not disclose the identity of an Act of Grace Payment recipient unless disclosure was agreed to by the recipient. ACT Disclosure Policy also requires that a description of an Act of Grace Payment or group of payments be included in the financial statements of the directorate or territory authority where it makes an Act of Grace Payment.
	Waiver A waiver is the relinquishment of a legal claim to a debt. The write-off of a debt is the accounting action taken to remove a debt from the books but does not relinquish the legal right of the Agency to recover the amount. A write-off of debts may occur for reasons other than waivers.
FMA sec 131 (3) ACT Disclosure Policy	The FMA requires that a waiver relating to an amount payable to the Territory shall be reported in the notes to the financial statements of the relevant agency that relate to the year in which the right to payment was waived.
	If an agency has waivers associated with a government policy, then the note should provide details of waivers by policy type. Individual recipients of waivers should not be identified unless they have agreed to such disclosure.

Reference	ASSET NOTES
	Material Accounting Policies – Assets
AASB 101.60 & 66	Assets – Current and Non-Current Assets are classified as current where they are expected to be realised within 12 months after the reporting date. Assets, which do not fall within the current classification, are classified as non-current.
	NOTE 15. CASH AND INVESTMENTS
	Description and Material Accounting Policies Relating to Cash and Investments
ACT Disclosure Policy	Cash and Cash Equivalents The Agency holds a number of bank accounts with the Westpac Bank as part of the whole-of-government banking arrangements. As part of these arrangements, the Agency does not receive any interest on these accounts, as all the accounts held are Set-Off Accounts.
AASB 107.6 & 46, AASB 7.21	Cash includes cash at bank and cash on hand. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Bank overdrafts are included in cash and cash equivalents in the Statement of Cash Flows but not in the cash and cash equivalents line on the Balance Sheet.
ACT Disclosure Policy	Investments Investments by the Agency are made in accordance with the Treasurer's approved 'Burley Griffin Agency' Investment Plan. The investment plan outlines 'Burley Griffin Agency's' investment strategy and objectives in relation to investing its funds with the Territory Banking Account. The investment return objective for the 'Burley Griffin Agency's' financial investments is CPI + <xx%> per annum.</xx%>
	'Burley Griffin Agency' makes investments with the Territory Banking Account by acquiring units in the Territory Banking Account's financial investments portfolio. The unit value changes in response to the underlying market value of the financial investments held by the Territory Banking Account. All unitised investments are designated at Fair Value through Profit or Loss with the carrying amount measured at fair value.
	Fair value is the price that would be received to sell the units in an orderly transaction between market participants at the measurement date and reflects the best available prices of the underlying financial investments. Subsequent to initial measurement, investments are re-measured to fair value with changes in their fair value (gains/loss) recognised in the Operating Statement (see Model Financial Statements - Note 8 <i>Gains from Disposals, Derecognition and Remeasurement of Assets</i> or and Note 14 <i>Other Expenses</i>). Distributions earned on these investments are disclosed in Note 7 <i>Investment and Interest Revenue</i> .
AASB 7.21, AASB 7.B5(e	The investments that are not expected to be realised, sold or consumed in the normal operating cycle are classified as non-current investments with the Territory Banking Account.

	Cash and Investments Where an agency does not have any investments (either actual or budget) they should title this note 'Cash and Cash Equivalents' rather than 'Cash and Investment'.
	Whole-of-Government Banking Arrangements Agencies can have either set-off or non set-off bank accounts through the Territory Banking Account with Westpac as part of the Whole-of-Government Banking Arrangement. Agencies that have set-off bank accounts will not earn interest on the funds in those accounts. However, agencies that have non set-off bank accounts will earn interest on the funds in those accounts which should be recorded as interest revenue in Note 7 <i>Investment and Interest Revenue</i> .
FMA Section 49	Third Party Monies-Trust Account Balances Any monies held in trust by an agency should not be included in the agency's cash balance. Monies held in trust are disclosed by way of note only (see Note 37 <i>Third Party Monies</i>).
ACT Treasury Directorate Finance Memorandum 2006/11	Investments To facilitate an efficient investment management arrangement a centralised and unitised investment administration structure is provided by Treasury, through the Territory Banking Account, that provides different investment options to meet the specific objectives of those agencies that have the approval to invest their funds. Individual Investment Plans for each investing agency, describing their investment strategy and objectives, are required to be approved by the Treasurer.
	Agency investors have 'Investment Unit Holdings' with the Territory Banking Account. Different investment options are provided by the Territory Banking Account to Agencies in order to meet the specific objectives of those agencies. Note that where an agency does not have any current or non-current investments, the investment part of this note disclosure is not required.
AASB 107.44A-44E	Cash Flow Reconciliation Agencies preparing financial statements are required to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes. Where relevant, agencies should include these additional disclosures in its financial statements i.e. a reconciliation of the opening and closing balance of liabilities arising from financing activities.

Reference	NOTE 16. RECEIVABLES AND CONTRACT ASSETS
	Description and Material Accounting Policies Relating to Receivables and Contract Assets
	Accounts Receivables
AASB 7.21	Accounts receivable (including trade receivables and other trade receivables) are measured at amortised cost, with ar adjustments to the carrying amount being recorded in the Operating Statement. Receivables relating to the Sale of Goods and Services from Contracts with Customers are recognised when invoiced, as this is the point in time that the consideration is unconditional because only the passage of time is required before the payment.
ASB 9.5.5.17	Impairment loss – Accounts Receivables The allowance for expected credit losses represents the amount of trade receivables and other trade receivables th Agency estimates will not be repaid. The allowance for impairment losses is based on objective evidence and a revier of overdue balances. An entity shall measure expected credit losses of a financial instrument in a way that reflects:
	(a) an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes;(b) the time value of money; and
	 (b) the time value of money, and (c) reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions. The amount of the expected credit loss is recognised in the Operating Statement (see Note 14 Other Expenses). When 'Burley Griffin Agency' has no reasonable expectation of recovering an amount owed by a debtor and ceases action the collect the debt, as the cost to recover the debt is more than the debt is worth, the debt is written off by directly reducin the receivable against the loss allowance.
AASB 9.5.5.8, 5.5.15 & B5.35 Financial Framework Memo 2018/23 AASB 9 Financial Instruments - Further Implementation	'Burley Griffin Agency' applied the simplified approach under AASB 9, meaning that the allowance for expected cred losses of accounts receivables is measured at the lifetime expected credit losses at each reporting date. 'Burley Griffi Agency' has established a provision matrix based on its historical credit loss experience, adjusted for forward lookin factors specific to the debtors and the economic environment. Loss rates are calculated separately for groupings of customers with similar loss patterns. 'Burley Griffin Agency' has determined there is <one> material group for measuring expected credit losses based on the sale of services and the</one>
Guidance to Agencies AASB 7.35(c) AASB 7.35F AASB 7.35G	sale of goods reflecting customer profiles for revenue streams. The calculations reflect historical observed default rate calculated using credit losses experienced on past sales transactions during the last <3> years preceding 30 June 202. The historical default rates are then adjusted by reasonable and supportable forward-looking information for expected changes in macroeconomic indicators that affect the future recovery of those receivables.
ACT Disclosure Policy Financial Framework Memo 2018/23 AASB 9 Financial Instruments –Guidance to Agencies.	Inter-agency loans and receivables between ACT Government agencies are expected to have low credit risk Consequently ACT Government policy is that directorates, territory authorities and territory-owned corporation consolidated into the whole-of-Government financial statements will generally not measure any loss allowance for receivables collectible from other ACT Government agencies consolidated into the whole-of-government financial statements.
	The Agency has made a significant estimate in the calculation of the expected credit loss allowance for impairment loss for receivables in the Financial Statements. This estimate is based on a number of categorisations of receivables and th use of an expected credit loss provision matrix. These categorisations are considered by management to be appropriat and accurate.
	Loans Receivable 'Burley Griffin Agency' provided provides concessional loans under the 'Example Home Loan Scheme' to ACT resident that meet certain eligibility criteria. The loans were provided at the commencement of the Scheme commenced in 202 and was set up to assist low income households in achieving home ownership. The concessional loans have a low interest rate and the repayments are principal and interest. The loans have a term of 30 years, and repayments commence at the start of each loan.
	'Burley Griffin Agency' does not intend on selling the loans to recover the principal. On initial recognition, the Concessional Loans Receivable are measured at their fair value plus any transaction costs. The difference between the loan's nominal value at the concessional rate and fair value at the market rate is recognised as a Concessional Loan Discount Expense. Subsequent to initial recognition Concessional Loans Receivable are measured at amortised cost. A ACT residents repay loan amounts, 'Burley Griffin Agency' is required to return this money back to government.
	Expected Credit Impairment Losses – Loans Receivables
	For loans receivable, 'Burley Griffin Agency' applied the general simplified approach under AASB 9, which uses a lifetime 12 months expected credit loss for all loans receivable, unless there has been a significant increase in credit risk since initial recognition. Where there has been a significant increase in credit risk since initial recognition, an amount equal the lifetime expected credit loss Advantage to a determine the expected credit loss Advantage Advantage approach

initial recognition. Where there has been a significant increase in credit risk since initial recognition, an amount equal to the lifetime expected credit losses is used to determine the expected credit loss allowance. A 'Loss Rate' approach provision matrix, based on its historical credit loss experience adjusted for forward looking factors, is used to calculate the expected credit loss.

Reference	Commentary – Note 16: Receivables and Contract Assets
	The model provides the minimum disclosure requirements under AASB 9, with the breakdown shown in this note disclosure being an example only. Agencies need to adapt this note to fit their circumstances and materiality. Agencies should only include line items that are applicable to them where material. For example, where an agency does not have a material amount of contract assets then contract assets should not be included in this note. Where this is the case, this note should be titled. <i>Receiptles</i> and would only include receivables.
	A 'Reconciliation of the Loss Allowance' needs to be included for each type of receivable/contract asset (i.e. accounts receivable, loans receivable, contracts assets etc). However, where these reconciliations are not material they do not need to be separately disclosed or could be combined.
	Receivables
ACT Disclosure Policy	An agency is not required to include disclosures associated with ageing of their receivables where it has no receivables that are past due or impaired. They can simply state that 'No receivables are past due or impaired.'
AASB 9B5.5.35 AASB 9B5.5.51-52	Agencies need not undertake an exhaustive search for information but should consider all reasonable and supportable information that is available without undue cost or effort and that is relevant to the estimate of expected credit losses, including the effect of expected prepayments. The information used should include factors that are specific to the borrower, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date. Agencies may use various sources of data, that may be both internal (agency-specific) and external. Possible data sources include internal historical credit loss experience, internal ratings, credit loss experience of other agencies and external ratings, reports and statistics. Agencies that have no, or insufficient, sources of entity-specific data may use peer group experience for the comparable financial instrument (or groups of financial instruments).
	The agency has a net Goods and Services Tax (GST) receivable. A net GST receivable will be reported in most Controlled financial statements as no GST is payable to the Australian Taxation Office for Controlled Recurrent Payments funding. However, agencies will receive input tax credits for most expenses incurred. The net GST receivable should be excluded from the calculation deriving the allowance for the expected credit loss because of the assessed low credit risk.
	If a net GST payable arises then this amount would be disclosed at Note 24 <i>Payables and Contract Liabilities</i> rather than in this receivables note.
	Contract Assets
AASB 15.105	When either party to a contract has performed, an agency shall present the contract in the Balance Sheet as a contract asset or a contract liability, depending on the relationship between the agency's performance and the customer's payment. Any unconditional rights to consideration are presented as a receivable separately from contract assets.
AASB 15 Appendix A Defined terms	A contract asset is defined as an agency's right to consideration in exchange for goods or services that the entity has transferred to a customer when that right is conditioned on something other than the passage of time (for example, the entity's future performance).
	Common contract asset balances are items such as services performed but not yet invoiced for contracts which are paid in arrears.
AASB 15.105 AASB 15.116(a)	Where an agency performs by transferring either goods or services to a customer before the payment is due or before the customer pays for consideration, then these are to be classified as contract assets. Contract assets exclude receivables from contracts with customers. Agencies must assess a contract asset for impairment in accordance with AASB 9.
AASB 15.117	Agencies must disclose contract assets separately from contract receivables.
AASB 15.116(a)	Agencies should disclose the opening and closing balances of contract assets.
AASB 15.118 AASB 15.119(a) AASB 15.119(b)	Agencies shall explain how the timing of the satisfaction of performance obligations relates to the typical timing of payment and the effect that those factors have on the contract asset. Quantitative information may be used.
	Agencies should explain significant changes in the balances of contact assets. Reasons for this change may include:
	• business combinations;
	 cumulative catch-ups, such as those arising from a change in the measure of progress, a change in an estimate of the transaction price or a modification; impairment of contract assets;
	 Impairment of contract assets; a change in timeframe – of contact assets becoming a receivable; and
	 a change in timeframe – for performance obligations to be satisfied.

Reference	Commentary – Note 16: Receivables and Contract Assets – Continued
	Impairment of Contract Assets Contract assets are recognised and measured in accordance with AASB 15, however for impairment testing purpose they are covered by AASB 9 and therefore are assessed for impairment using the expected credit loss model.
AASB 15.113(b)	Disclosure of impairment of contract assets is disclosed separately from impairment of other financial assets.
ASB 15.95	Contract Cost Asset
	AASB 15 requires incremental costs to obtain a contract and costs to fulfil a contract to be capitalised as an asset ar released as the goods/services are transferred to the customer where certain conditions are met.
	When the agency has recognised an asset for costs to obtain or fulfil a contract with a customer, the agency is require to disclose the closing balance by main asset category (e.g. costs to obtain contracts, set up costs, pre-contract cos etc).
	It is unlikely that agencies would have material incremental costs to obtain a contract since this is generally costs su as commission.
	In relation to costs to fulfil a contract, agencies should consider whether costs which have been incurred on a differe basis from the recognition of revenue meet the criteria to be capitalised under AASB 15. Note that this is not a accounting policy choice, if the criteria are met then a contract cost must be recognised.
ASB 7.31-42	AASB 7 <i>Financial Instruments: Disclosures</i> requires quantitative and qualitative disclosures for each type of risk (i.e. crearisk, liquidity risk and market risk) to evaluate the nature and extent of risks from financial instruments to which t agency is exposed, including financial assets that are either past due or impaired (see Note 31 <i>Financial Instruments</i>).
	Impact of COVID-19 on Expected Credit Losses
	 It is likely Expected Credit Losses (ECLs) will may have increased to reflect changes in the ability of customers to set their debts. Material changes to the method of calculating ECLs will need to be appropriately disclosed. ECLs (i.e. provisions) against receivables may increase substantially; and agencies need to consider the appropriateness of their existing methodologies for predicting future ECLs.
	NOTE 17. INVENTORIES
	Description and Material Accounting Policies relating to Inventories Inventory
	Inventory held by 'Burley Griffin Agency' is made up of land, as well as environmental merchandising which it sells tourists visiting Canberra and to the ACT community. 'Burley Griffin Agency' acquires, develops and prepares land a hold this land as inventory. Raw materials are purchased by 'Burley Griffin Agency' and it then produces the merchandi in-house by agency staff.
ASB 102.36(a), ASB 102.9, ASB 102.25	Inventories held for sale are valued at the lower of cost and net realisable value. The cost of land inventory includes t value of the land itself along with all direct costs incurred in developing the land. The cost is assigned to land inventor on a specific identification of cost basis given this inventory is high value and low volume. The cost of ACT merchandisis inventory comprises the purchase price of inventories as well as transport, handling and other costs directly attributat to the acquisition of inventories. Trade discounts, rebates and other similar items are deducted in determining the cost of purchase. The cost of the ACT environmental merchandising inventories is assigned using the <first-in, first-out<="" p=""></first-in,>
ASB 102.Aus9.1	Inventories held for distribution are measured at cost, adjusted, when applicable, for any loss of service potential w the carrying amount being recorded in the Operating Statement as an expense once the inventories are distributed.
	Where inventories are acquired for no cost or nominal consideration, they are measured at current replacement cost

Where inventories are acquired for no cost or nominal consideration, they are measured at current replacement cost at the date of acquisition. Current replacement cost is the cost 'Burley Griffin Agency' would incur to acquire the asset.

	Commentary – Note 17: Inventories
	Definition
AASB 102.6	Inventories are assets:
	held for sale in the ordinary course of business;
	 in the process of production for such sale; or in the form of motorials or supplies to be compared in the modulation process of in the modulation of compared in the modulation.
AASB 102.Aus 6.1	• in the form of materials or supplies to be consumed in the production process or in the rendering of services.
AASB 102.AUS 0.1	 Inventories held for distribution are assets: held for distribution at no or nominal consideration in the ordinary course of operations;
	• in the process of production for distribution at no or nominal consideration in the ordinary course of operations;
	 or in the form of materials or supplies to be consumed in the production process or in the rendering of services at
	no or nominal consideration.
	Measurement
AASB 102.9 & Aus 9.1	Under AASB 102 <i>Inventories</i> , inventories are to be measured at the lower of cost or net realisable value. Not-for-profit agencies with 'inventories held for distribution' are to measure them at cost, adjusted when applicable for any loss of
	service potential. Agencies shall disclose the basis on which any loss of service potential of inventories held for
	distribution is assessed or the bases when more than one basis is used.
	Classification
AASB 102.36(b) & Aus 36.1(b)	AASB 102 states that each category of inventories should be further sub-classified in a manner appropriate to the agency's operations. Common sub-classifications are merchandise, production supplies, raw materials, work in progress
AASB 102.37	and finished goods.
	Inventories Pledged as Security
AASB 102.36(h) & Aus 36.1(g)	AASB 102 also requires specific disclosure of the carrying amount of inventories pledged specifically and separately from other assets of the agency as security for liabilities, and the nature of the security. This is also required where an agency holds 'inventories held for distribution'.
	Cost of Sales
AASB 102.38	Cost of sales generally consists of those costs previously included in the measurement of inventory that has now been sold and unallocated production overheads and abnormal amounts of production costs of inventories. The circumstances of the entity may also warrant the inclusion of other amounts, such as distribution costs.
	Territory Authority Commentary
	For-profit territory authorities that possess 'inventories held for distribution' will need to measure them at the lower of cost or net realisable value, rather than at cost adjusted for any service loss potential, as the latter option only applies to not-for-profit agencies.

Reference	Commentary – Note 18: Non–Current Assets Held for Sale
AASB 5.7	For an asset to be classified as held for sale it must be available for immediate sale in its present condition subject only to terms that are usual and customary for the sale of such assets and the sale must be highly probable.
AASB 5.8	For the sale to be highly probable, the appropriate level of management must be committed to a plan to sell the asset (or disposal group), and an active program to locate a buyer and complete the plan must have been initiated. Further, the asset (or disposal group) must be actively marketed for sale at a price that is reasonable in relation to its current fair value. In addition, the sale should be expected to qualify for recognition as a completed sale within one year from the date of classification, except where circumstances beyond the agency's control extend the period of sale, and actions required to complete the plan should indicate that it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn.
	Fair Value Concepts and Disclosures
	Fair value concepts and disclosures relevant to AASB 13 Fair Value Measurement are discussed in detail in the commentary to Note 19 Property, Plant and Equipment.
	If all Non-Current Assets held for sale are in the same fair value category, then a sentence to that effect could be used for disclosure rather than a tabular presentation.
	NOTE 19. PROPERTY, PLANT AND EQUIPMENT
	Description and Material Accounting Policies relating to Property, Plant and Equipment
ACT Accounting Policy	'Burley Griffin Agency' has the following eight classes of Property, Plant and Equipment: includes the following six classes of assets.
	 Land is defined as the ground, including the soil covering and any associated surface waters. Land includes leasehold land held by the Agency, but excludes land under infrastructure and land held as community assets (e.g. public nature reserves and National Parks).
	 Buildings are structures that have a roof and walls which stand permanently in one place. These structures are separately identifiable from the land they are constructed upon and as such do not include this land. Buildings include office buildings, warehouses, light rail and bus depots and land improvements. Land improvements include parking lots, retaining walls, and purpose built children's playground structures and landscaping adjoining a building. Right of use building assets and Service concession building assets are included within the building asset class. This includes the Public Private Partnership arrangement for the Court House being included as a right of use asset
	building and the Public Private Partnership arrangement for the Light Rail building being included as a service concession asset. Right-of-use building assets are not included in the building asset class.
	• Right-Of-Use Buildings are leased structures and land improvements that are separately identifiable from the land they are constructed upon. Right-Of-Use buildings include the court house and adjacent parking lot that are part of the Public Private Partnership arrangement and the specialised depot building.
	• Leasehold improvements are capital expenditure items incurred in relation to leased assets. Leasehold improvements represent fit-outs in leased buildings.
AASB 116.74(a)	• Plant and equipment are tangible assets like machinery, apparatus, appliances, containers, implements or tools that are used by an agency to produce goods or assist in providing services to the community. Plant and equipment tend to be smaller and more mobile in nature than other types of property, plant and equipment like buildings, roads and land. Plant and Equipment includes mobile plant, water tanks, air conditioning and heating systems, office and computer equipment, furniture and fittings, motor vehicles, buses, earth moving machinery, light rail vehicles (rolling stock), light rail maintenance equipment, and other mechanical and electronic equipment. Right of use plant and equipment assets and Service concession plant and equipment assets are included within the plant and equipment asset class. The carrying amount of plant and equipment pledged separately and specifically as security for liabilities at 30 June 2023 was \$xxx (\$xxx in 2022). Right-of-use plant and equipment are not included in the plant and equipment asset class.
	• Right-Of-Use Plant and Equipment has the same definition as plant and equipment, with the exception that they are held under a lease. Plant and Equipment held by 'Burley Griffin Agency' includes motor vehicles and specialised plant and equipment.

Reference	NOTE 19. PROPERTY, PLANT AND EQUIPMENT – CONTINED
	Description and Material Accounting Policies relating to Property, Plant and Equipment - Continued
	• Infrastructure assets are physical asset that typically have a long useful life and consist of a complex interconnected network of individual components, which enhance the productive capacity of the economy and supports Government services. Buildings do not meet the definition of infrastructure assets unless they are an ancillary part of an infrastructure system. Infrastructure assets held by the Agency include roads (including earthworks), bridges, stormwater drains, footpaths, street lighting, signs, barriers, bollards, traffic lights, fences, playgrounds not adjoining a building, and light rail infrastructure assets (including tracks, overhead wiring and poles, signalling and traffic control systems, electricity substations and light rail stops). Right of use infrastructure assets are included within the infrastructure asset class. Land under infrastructure and right-of-use infrastructure assets is not included in the infrastructure assets.
	• Heritage and Community assets. Heritage assets refer to assets that have unique cultural, historical, geographical, scientific, and/or environmental attributes and that the Government intends to preserve indefinitely because of those attributes. Heritage assets held by the Agency include artwork, museum collections, historical buildings, and memorials. Community assets are those assets that are provided primarily essentially for general community use or service. Community assets held by the Agency include public parks and gardens, public sporting reserves, public nature reserves, shelters and land under infrastructure.
AASB 16.47 ACT Disclosure Policy	Property, Plant and Equipment does not include assets held for sale or investment property. Right-of-Use (ROU) assets recognised under AASB-16 Leases are disclosed under the relevant class of property, plant and equipment.
AASB 116.51 AASB 108.34 & 39	Revision in Accounting Estimates The useful lives of some community and heritage and community assets were reassessed resulting in the depreciation expense increasing by \$xxx.
AASB 116.51 AASB 108.39	Change in Depreciation due to a Revision of Carrying Amount The residual value of plant and equipment was revised and subsequently increased as it was considered that some items of plant and equipment could be sold for an amount greater than originally anticipated. As a result, the depreciation on the plant and equipment was also revised and consequently decreased by \$180,000 in the current reporting period.
AASB 116.15, AASB 116.Aus 15.1, AASB 1004.BC28 AASB 1059.7	Acquisition and Recognition of Property, Plant and Equipment Property, Plant and Equipment are initially recorded at cost. Right-of-use assets are also measured at cost on initial recognition, where cost comprises the initial amount of the lease liability, initial direct costs, prepaid lease payments, estimated cost of removal and restoration less any lease incentives received. However, the Agency initially recognises service concession assets at current replacement cost in accordance with the cost approach to fair value in AASB 13 Fair Value Measurement.
	Where property, plant and equipment are acquired at no cost, or minimal cost, cost is its fair value as at the date of acquisition. However, property, plant and equipment acquired at no cost or minimal cost as part of a restructuring of administrative arrangements is measured at the transferor's book value.
AASB 116.23	Where payment for property, plant and equipment is deferred beyond normal credit terms, the difference between its cash price equivalent and the total payment is measured as interest over the period of credit. The discount rate used to calculate the cash price equivalent is an asset specific rate.
	Property, Plant and Equipment with a minimum value of <\$5,000> are capitalised.
AASB 16.23 & 36, ACT Accounting Policy – Property Plant & Equipment	Measurement of Property, Plant and Equipment After Initial Recognition Property, Plant and Equipment is valued using the cost or revaluation model of valuation. 'Burley Griffin Agency' measures land, buildings, infrastructure assets, leasehold improvements and community and heritage and community assets are measured at fair value. 'Burley Griffin Agency' measures plant and equipment is measured at cost. Service Concession Assets included in each of these asset classes are measured on the same basis as the rest of that asset class owned by the Agency.
	After the commencement date, all right-of-use assets are measured at cost less any accumulated depreciation and accumulated impairment losses and adjusted for any re-measurement of the lease liability. Right-of-use assets are presented in property, plant and equipment under the relevant in their own separate asset class.
AASB 1059.9(b)	The fair value of service concession assets measured using the revaluation model is determined based on current replacement cost.

Reference	NOTE 19. PROPERTY, PLANT AND EQUIPMENT – CONTINUED
	Major Cyclical Maintenance - Infrastructure Asset The Agency undertakes major cyclical maintenance on its infrastructure assets. Where the maintenance leads to an upgrade, increasing the service potential of the existing infrastructure asset, the cost is capitalised.
AASB 116.77(a) &(b)	Valuation of Non-Current Assets XYZ Valuers, an independent valuer, has performed all revaluations of the Agency's property, plant and equipment assets. 'XYZ Valuers' hold a recognised and relevant professional qualification and have recent experience in the location and category of the property, plant and equipment involved. The latest valuation of infrastructure assets was performed as at 30 June 2022. The latest valuation of land, buildings and community and heritage and community assets was performed as at 30 June 2023.
	The Agency has made a significant estimate regarding the fair value of its assets. Land and buildings have been recorded at the market value of similar properties as determined by an independent valuer. In some circumstances, buildings that are purpose built may in fact realise more or less in the market. Infrastructure assets, service concession assets and some community and heritage and community assets and service concession assets have been recorded at fair value based on current replacement cost as determined by an independent valuer. The valuation uses significant judgements and estimates to determine fair value, including the appropriate indexation figure and quantum of assets held. The fair value of assets is subject to management assessment between formal valuations.
AASB 116.31 & 34	Revaluation Land, buildings, infrastructure assets, leasehold improvements, and community and heritage and community assets are revalued every three years. This also includes all right of use assets and service concession assets within these all asset classes. However, if at any time management considers that the carrying amount of an asset materially differs from its fair value, Towards the end of each financial year 'Burley Griffin Agency' assesses whether there are any 'indicators' that
	the carrying amount of their PPE is materially different to fair value. Where these indicators existthen the asset will be revalued regardless of when the last valuation took place. Any accumulated depreciation relating to buildings, leasehold improvements and community and heritage and community assets at the date of revaluation is written back against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset.
AASB 116.35(a)	Any accumulated depreciation relating to infrastructure assets is restated proportionally with the change in the gross carrying amount so that the net carrying amount of those assets after revaluation equals its revalued amount.
AASB 136.9 & 10	Impairment of Assets The Agency assesses, at each reporting date, whether there is any indication that property, plant and equipment may be impaired. Property, Plant and Equipment is also reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable.
AASB 136.9, 59 & 60	Any resulting impairment losses, for land, buildings, infrastructure, and community and heritage and community assets, are recognised as a decrease in the Asset Revaluation Surplus relating to these classes of assets. This is because these asset classes are measured at fair value and have an Asset Revaluation Surplus attached to them. Where the impairment loss is greater than the balance in the Asset Revaluation Surplus for the relevant class of asset, the difference is expensed in the Operating Statement.
	Impairment losses for plant and equipment, and leasehold improvements are recognised in the Operating Statement (see Note 14 <i>Other Expenses</i>), as plant and equipment is carried at cost, and leasehold improvements are carried at fair value but do not have an Asset Revaluation Surplus attached to them. The carrying amount of the asset is reduced to its recoverable amount.
	Non-financial assets that have previously been impaired are reviewed for possible reversal of impairment at each reporting date.
AASB 116.6 AASB 116.43 & 50	Depreciation and Useful Life Depreciation is the systematic allocation of the cost of an asset less its residual value over its useful life. Depreciation is applied to physical assets such as buildings, infrastructure assets, and plant and equipment.
	Land, and some community and heritage and community assets have an unlimited useful life and are therefore not depreciated.
	Right-of-use buildings, leasehold improvements, plant and equipment, and infrastructure assets as well as leasehold improvements are depreciated over the estimated useful life of each asset, or the unexpired period of the relevant lease, whichever is shorter.
AASB 116.53	All depreciation is calculated after first deducting any residual values, which remain for each asset.

Reference	NOTE 19. PROPERTY, PLA	ANT AND EQUIP	MENT –						
	Depreciation for non-current assets is determined as follows:								
AASB 116.73(b) & (c),	Class of Asset	Depreciation Method	Useful Life (Years)					
AASB 116.51	Buildings	Straight-line	2-100						
	Leasehold Improvements	Straight-line	2-40

	CONTINUED Fair Value Hierarchy
AASB 13.93(b)	The Fair Value Hierarchy below reflects the significance of the inputs used in determining fair value. The Fair Value Hierarchy is made up of the following three levels:
AASB 13.76	• Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities that the agency can access at the measurement date;
AASB 13.81	 Level 2 - inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
AASB 13.86	 Level 3 - inputs that are unobservable for particular assets or liabilities.
	Details of the Agency's property, plant and equipment at fair value and information about the Fair Value Hierarchy as at 30 June is as follows:
	Classification According to Fair Value Hierarchy
	Level 2 Level 3 Total \$'000 \$'000 \$'000
	2023
AASB 13.93(a)&(b) AASB 13.94	Property, Plant and Equipment at Fair Value

AA3D 13.94	Land
	Buildings
	Leasehold Improvements Infrastructure Assets
	Community and Heritage and Community Assets
AASB 13.93(c) & e) (iv)	Transfers Between Categories
	There have been no transfers between Levels 2 and 3 during the current and previous reporting period.
	Valuation Techniques, Inputs and Processes:
	Level 2 Valuation Techniques and Inputs
AASB 13.91(a) & 93(d)	Valuation Technique: The valuation technique used to value land and buildings is the market approach that reflects recent transaction prices for similar properties and buildings (comparable in location and size).
AASB 13.91(a) & 93(d)	Inputs: Prices and other relevant information generated by market transactions involving comparable land and buildings were considered. Regard was taken of the Crown Lease terms and tenure, The Australian Capital Territory Plan and the National Capital Plan, where applicable, as well as current zoning.
	Level 3 Valuation Techniques and Significant Unobservable Inputs
AASB 13.91(a) & 93(d)	Land Valuation Technique: Land where there is no active market or significant restrictions is valued through the market approach.
AASB 13.91(a) & 93(d)	Significant Unobservable Inputs: Selecting land with similar approximate utility. In determining the value of land with similar approximate utility, significant adjustment to market based data was required.
AASB 13.91(a) & 93(d)	Other Property, Plant and Equipment Valuation Technique: Buildings, Leasehold Improvements, Infrastructure Assets and Community and Heritage and Community Assets were considered specialised assets by the Valuers and measured using the cost approach to fair value.
AASB 13.91(a) & 93(d)	Significant Unobservable Inputs: Estimating the cost to a market participant to construct assets of comparable utility adjusted for obsolescence. For Buildings, historical cost per square metre of floor area was also used in measuring fair value. For Infrastructure Assets, the historical costs per cubic metre was also used in measuring fair value. In determining the value of Buildings, Leasehold Improvements, Infrastructure Assets and community and Heritage and Community assets regard was given to the age and condition of the assets, their estimated replacement cost and current use. This required the use of data internal to 'Burley Griffin Agency'.
AASB 13.93(d)	There has been no change to the above valuation techniques during the year.
AASB 13.95	Transfers in and out of a fair value level are recognised on the date of the event or change in circumstances that caused
	the transfer.

Reference	NOTE 19. PROPERTY, PLANT AND EQUIPMENT – CONTINUED
AASB 13.93(i)	Assets where Current Use is not Highest and Best Use 'Burley Griffin Agency' has a block of land with a three storey building near the Belconnen Town Centre that is mainly used as a shopfront. Given recent commercial and residential development in the immediate area, management is of the view, based on expert advice, that the highest and best use of this property would be to sell it on the open market for construction of a high-rise residential tower, to meet the accommodation needs of students and young families. An alternative site for the shopfront has been identified. There is no physical, legal or financial barrier to this sale and the Government will be proceeding with this course of action. Accordingly, the fair value of this property reflects its estimated selling price, in its current condition, to a developer.
	Commentary – Note 19: Property, Plant and Equipment
	Classes
ACT Disclosure Policy AASB 116.37	 ACT Disclosure Policy requires the following ten classes of Property, Plant and Equipment be disclosed in an agency's financial statements where applicable: land; buildings;
	 right-of-use buildings; leasehold improvements;
	 plant and equipment;
	 right-of-use plant and equipment;
	 community and heritage and community assets; and infrastructure assets;
	 right-of-use infrastructure assets; and
	 property, plant and equipment held for transfer.
	Property, Plant and Equipment Reconciliations
AASB 116.73(e)	Reconciliation of All Property, Plant and Equipment A reconciliation of the carrying amounts of each class of Property, Plant and Equipment at the beginning and end of the reporting period must be disclosed in an agency's financial statements. Where applicable, the reconciliation must show details of movements as follows:
	additions;
	 assets classified as held for sale or included in a disposal group held for sale; acquisitions through business combinations;
	• increases or decreases in other comprehensive income resulting from revaluations, impairment losses and
	 impairment losses reversed; impairment losses, or impairment losses reversed, in profit and loss;
	 Impairment losses reversed, in pront and loss, depreciation; and
	other changes.
	Reconciliation of Level 3 Property, Plant and Equipment
AASB 13.93(e)	Agencies shall provide a reconciliation from the opening balances to the closing balances, disclosing separately changes during the period attributable to the following:
	 total gains or losses for the period recognised in the operating result by line item;
	 total gains or losses for the period recognised in other comprehensive income by line item; purchases, calor, issues and cattlements (such disclosed constrately), and
	 purchases, sales, issues and settlements (each disclosed separately); and the amounts of any transfers into or out of level 3, the reasons for those transfers and the policy for determining
	when transfers between levels are deemed to have occurred. Transfers into Level 3 shall be disclosed and
AASD 116 74(a)	discussed separately from transfers out of Level 3. Agencies must disclose information about the carrying amount of any non-current assets pledged as security for
AASB 116.74(a)	liabilities and the existence and amounts of any restrictions on title.
	Measurement
	Initial Measurement
	Property, Plant and Equipment are initially recorded at cost, with service concession assets initially measured at current replacement cost.

Reference	Commentary – Note 19: Property, Plant and Equipment – Continued
AASB 116.16	 The cost of an item of property, plant and equipment comprises: its purchase price; any directly attributable costs; and the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.
	 Right-of-use assets are initially measured at cost including the following: the amount of the initial measurement of the lease liability; any lease payments made at or before the commencement date less any lease incentives received; any initial direct costs; and restoration costs, including dismantling and removing the underlying asset.
	Subsequent Measurement
ACT Accounting Policy	Agencies are required to measure all land, buildings, infrastructure assets and community and heritage and community assets at fair value. Plant and equipment, and leasehold improvements are to be measured at fair value when the value of these assets is used in making management decisions, and measured at cost or fair value when the value of these assets is not used to make management decisions.
ACT Accounting Policy	Agencies are required to subsequently measure right-of-use assets at cost.
AASB 13.91(a)	For assets and liabilities that are measured at fair value in the balance sheet after initial recognition, agencies shall disclose the valuation techniques and inputs used to determine fair value.
	Fair Value Disclosures
	Valuation Techniques
AASB 13.B.5	 Market approach – uses prices and other relevant information generated by market transactions involving identical or comparable (i.e. similar) assets, liabilities or a group of assets and liabilities such as a business. Cost approach – reflects the amount that would be required currently to replace the service capacity of an asset (after proceed to get the service capacity of an asset).
AASB 13.B8	 (often referred to as the current replacement cost). Income approach – converts future amounts (e.g. cash flows or income and expenses) to a single (i.e. discounted) amount. When the income approach is used, the fair value measurement reflects current market expectations about those future amounts.
AASB 13.B10 AASB 13.93(g)	Agencies shall provide a description of their valuation process (including, for example, how they decide their valuation policies and procedures and analyses changes in fair value measurements from period to period).
	Fair Value Hierarchy
AASB 13.93(b)	Agencies are required to classify assets and liabilities measured at fair value into a Fair Value Hierarchy that reflects the significance of the inputs used in determining their fair value. The Fair Value Hierarchy is made up of the following three levels:
AASB 13.76	• Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities that the agency can access at the measurement date;
AASB 13.81	 Level 2 - inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and
AASB 13.86	Level 3 - inputs that are unobservable for particular assets or liabilities.
AASB 13.93(c)	Levels 1 and 2 Valuation Inputs Agencies shall disclose for assets and liabilities held at the end of the reporting period that are measured at fair value, the amounts of any transfers between Level 1 and Level 2 of the Fair Value Hierarchy, the reasons for the transfers and the agency's policy for determining when transfers between levels are deemed to have occurred. Transfers into each level shall be disclosed separately from transfers out of each level.
AASB 13.93(d)	Levels 2 and 3 Valuation Inputs Agencies shall disclose for fair value measurements categorised within Level 2 and Level 3 of the fair value hierarchy, a description of the valuation technique(s) and the inputs used in the fair value measurement. If there has been a change in the valuation technique (e.g. changing from a market approach to an income approach or the use of an additional valuation technique), agencies shall disclose that change and the reason(s) for making it.
	Level 3 Valuation Inputs
AAB 13.91(b)	For fair value measurements using significant unobservable inputs, agencies shall disclose the effect of the measurements on the operating result or other comprehensive income for the reporting period.

Reference	Commentary – Note 19: Property, Plant and Equipment – Continued
AASB 13.93(b)	Agencies shall provide quantitative information about significant unobservable inputs used in the fair value measurement. Agencies are not required to create quantitative information to comply with this disclosure requirement if they have not developed quantitative unobservable inputs when measuring fair value (e.g. when an entity uses prices from prior transactions or third-party pricing information without adjustment). However, when providing this disclosure agencies cannot ignore quantitative unobservable inputs that are significant to the fair value measurement and are reasonably available to them.
	Agencies only need to disclose those valuation input levels (i.e. Level 1, 2 & 3) that are relevant to them. For example, 'Burley Griffin Agency' does not have any assets in Level 1 and as such only disclosures for Level 2 and Level 3 have been included in the above Property, Plant and Equipment note. It is not expected that any agencies will have Property, Plant and Equipment contained in Level 1.
	Following Policy for Transfers Between Levels of the Fair Value Hierarchy
	Agencies shall disclose and consistently follow its policy for determining when transfers between levels of the Fair Value Hierarchy are deemed to have occurred. The policy about the timing of recognising transfers shall be the same for transfers into the levels as for transfers out of the levels. Examples of policies for determining the timing of transfers include the following:
	• the date of the event or change in circumstance that caused the transfer;
	 the beginning of the reporting period; or the end of the reporting period.
AASB 13.93(b)	Agencies shall disclose the level of the Fair Value Hierarchy within which the fair value measurements are categorised in their entirety (Level 1, 2 or 3).
	Fair Value Disclosures – General
AASB 13.94(a)&(b)	Agencies need to classify assets and liabilities on the basis of the following:
AASB 13.95	 the nature, characteristics and risks of the asset or liability; and the level of the Fair Value Hierarchy within which the fair value measurement is categorised.
AASB 13.93(a)	Agencies shall disclose the fair value measurement of assets and liabilities at the end of the reporting period.
AASB 13.99	Agencies shall present the quantitative disclosures required by AASB 13 Fair Value Measurement in a tabular format unless another format is more appropriate.
	Depreciation
	Depreciation of Land
AASB 116.58 & 59	With some exceptions, such as quarries or landfill, land has an unlimited useful life and therefore is not depreciated. Where land is required to be restored after it has been used, this cost must be capitalised into the carrying amount of the land and a relevant provision raised. That portion of the land's cost is then depreciated over the period the land will be used (i.e. until the time the land is restored). For example, where an agency has a landfill site which is required to be restored by law at the end of 10 years, the restoration portion of the land's value will be depreciated over the next 10 years.
	Depreciation of Right-of-Use Assets
AASB 16.57	Right-of-Use assets are generally depreciated over the shorter of the asset's useful life and the lease term. Where the agency obtains ownership of the underlying leased asset or if the cost of the right-of-use asset reflects that the agency will exercise a purchase option, the agency depreciates the right-of-use asset over its useful life.
	Useful Lives
AASB 116.51	Agencies must assess their asset's useful lives at the end of each reporting period and where expectations differ from previous estimates, the changes shall be accounted for as a change in accounting estimate in accordance with AASB 108 <i>Accounting Policies, Changes in Accounting Estimates and Errors.</i>
AASB 108.36	Changes in accounting estimates are required to be recognised prospectively in the Operating Statement by including it as revenue or expense in the reporting period in which the accounting estimate is revised, if the revision affects that reporting period only, or in the reporting period of the revision and future reporting periods, if the revision affects both the current and future reporting periods.
	Highest and Best Use
ASSB 13.93(i)	If the highest and best use of a non-financial asset differs from its current use, agencies shall disclose that fact and why the non-financial asset is being used in a manner that differs from its highest and best use.
AASB 13.27 & 28	The highest and best use of a non-financial asset takes into account the use of the asset that is physically possible (given location and size), legally permissible (given zoning regulations), and financially feasible (generates adequate income or cash flows).

Reference	Commentary – Note 19: Property, Plant and Equipment – Continued
AASB 116.79	 Voluntary Disclosures To assist users of financial statements, the following voluntary disclosures are recommended: the carrying amount of temporarily idle property, plant and equipment; the gross carrying amount of any fully depreciated property, plant and equipment that is still in use; and the carrying amount of property, plant and equipment retired from active use and not classified as held for sale in accordance with AASB 5 Non-current Assets Held for Sale and Discontinued Operations.
AASB 16.95	Disclosures required by Lessors that have Operating Leases involving Property, Plant and Equipment Where an agency is a lessor with operating leases involving property, plant and equipment it needs to provide the disclosures required by AASB 116 separately for the assets subject to an operating lease from those that are held and used by the lessor.
	Compensation from Third Party
AASB 116.74(d)	Agencies must disclose the amount of compensation received from third parties for items of property, plant and equipment that were impaired, lost or given up during the reporting period that have not already been separately disclosed in the Operating Statement.
	Right of-Use Assets Acquired by Lessees
	A lessee shall either present in the statement of financial position, or disclose in the notes:
	 right-of-use assets separately from other assets. If a lessee does not present right-of-use assets separately in the statement of financial position, the lessee shall: include right-of-use assets within the same line item as that within which the corresponding underlying assets would be presented if they were owned; and
	• disclose which line items in the statement of financial position include those right-of-use assets.
ACT Disclosure Policy	Given the Model sets out that right-of-use assets are not included on the face of the Balance Sheet, agencies need to include right-of-use assets within the same line item as that within which the corresponding underlying assets would be presented if they were owned.
AASB 16.48	Right-of-use assets that meet the definition of investment property are presented within Investment Property.
	Treatment of Revaluation Decrements
AASB 116.Aus 40.1	Revaluation decrements are expensed when a particular asset (of for-profit territory authorities), or class of assets (of not-for-profit agency), as a whole, has been revalued downwards and there is no amount in the Asset Revaluation Surplus for that asset class for the revaluation to be offset against.
	Territory Authority Commentary
AASB 116.77(e)	For-profit Territory Authorities Territory authorities that are for-profit are required to disclose for each revalued class of property, plant and equipment, the carrying amount that would have been recognised had the assets been carried under the cost model. An example disclosure is presented above.
AASB 116.AUS 77.1	Territory authorities which are not-for-profit are not required to make this disclosure.
AASB 13.93(f)	For recurring fair value measurements categorised within level 3 of the fair value hierarchy, for-profit authorities need to disclose the amount of the total gains and losses for the period attributable to the change in unrealised gains or losses relating to those assets and liabilities held at the end of the reporting period, by line item.
AASB 93(d)	For fair value measurements categorised within level 3 of the fair value hierarchy, for-profit authorities have to disclose quantitative information about the significant unobservable inputs used in the fair value measurement.
AASB 93(h)(i)	For-profit authorities also need to provide a narrative description of the sensitivity of the fair value measurements to changes in unobservable inputs if a change in those inputs to a different amount might result in a significantly higher or lower fair value measurement. If there are interrelationships between those inputs and other unobservable inputs, agencies shall provide a description of those interrelationships and how they might magnify or mitigate the effect of changes in the unobservable inputs on the fair value measurement.

Reference	NOTE 20. INVESTMENT PROPERTIES			
	Description and Material Accounting Policies Relating to Investment Properties Investment properties are properties held to earn rental income or for capital ap Agency' owns commercial and office buildings which are classified as investment p for rental income.

	Commentary – Note 20: Investment Properties
	Investment property can arise from either of the following:
	 owned assets – assets owned by the Agency and rented out under a head lease, or right-of-use assets – assets which are leased by the Agency under a head lease and sub-leased via an operating sub-lease.
	These two types of investment property are separate classes of assets and therefore an Agency should specify whether the investment property is owned or arises from a right-of-use asset.
	If an Agency has both types of investment property, then the disclosures should be shown separately for both classes.
	Definition
AASB 140.5	Investment property is property (land or a building – or part of a building – or both) held (by the owner or by the lessee as a right-of-use asset) to earn rentals or for capital appreciation or both, rather than for:
	use in the production or supply of goods or services or for administrative purposes; or
AASB 140.Aus 9.1	 sale in the ordinary course of business. However, for agencies, property may be held to meet service delivery objectives rather than to earn rental or for capital appreciation. In such situations, the property will not meet the definition of investment property and will be accounted for under AASB 116 <i>Property, Plant and Equipment</i>, for example:
	 property held for strategic purposes; and property held to provide a social service, including those which generate cash inflows where the rental revenue is incidental to the purpose for holding the property.
AASB 140.76	 An agency that applies the fair value model in accordance with AASB 140 <i>Investment Property</i> shall disclose a reconciliation between the carrying amounts of investment property at the beginning and end of the period, showing the following: additions, disclosing separately those additions resulting from acquisitions and those resulting from subsequent
	 expenditure recognised in the carrying amount of an asset; additions resulting from acquisitions through business combinations;
	 assets classified as held for sale or included in a disposal group and other disposals; net gains or losses from fair value adjustments;
	 transfers to and from inventories and owner-occupied property; and other changes.
AASB 140.75(c)	Where it is difficult for an agency to determine whether a property should be classified as an investment property, the criteria it uses to distinguish investment property from owner-occupied property and from property held for sale in the ordinary course of business must be disclosed.
	Operating Lease Disclosures for Lessors
AASB 16.88	Lessors shall present assets subject to operating leases in the Balance Sheets according to the nature of the underlying asset. In the case of 'Burley Griffin Agency' it is investment properties that are subject to an operating lease, however where, for example, an agency had property, plant and equipment under an operating lease, these assets should be disclosed in the property, plant and equipment note.
AASB 16.83	Initial direct costs incurred by Lessors in negotiating and arranging an operating lease shall be added to the carrying amount of the leased asset and recognised as an expense over the lease term on the same basis as the lease income.

NOTE 22. CAPITAL WORKS IN PROGRESS

Description and Material Accounting Policies Relating to Capital Works in Progress

Capital works in progress include infrastructure assets, buildings, leasehold improvements and software under construction. Capital works in progress are recognised at the time the construction activity occurs. These assets are measured at the cost of constructing the asset. The cost includes direct construction costs (e.g. direct materials and direct labour), and 'directly attributable' costs in bringing the asset to a location and condition ready for use, as well as the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located. Directly attributable costs included in capital works in progress by 'Burley Griffin Agency' are the cost of site preparation, initial delivery and handling costs of materials, installation and assembly costs, functional testing and professional fees.

Reference	LIABILITY NOTES
AASB 101.60 & 69	Material Accounting Policies – Liability Liabilities – Current and Non-Current Liabilities are classified as current when they are due to be settled within 12 months after the reporting date or the Agency does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date. Liabilities, which do not fall within the current classification, are classified as non-current.
	NOTE 24. PAYABLES AND CONTRACT LIABILITIES
	Description and Material Accounting Policies Relating to Payables and Contract Liabilities
	Payables Payables include Trade Payables, Accrued Expenses and Other Payables.
AASB 7.21	Payables are initially recognised at fair value based on the transaction cost and subsequent to initial recognition at amortised cost, with any adjustments to the carrying amount being recorded in the Operating Statement. All amounts are now normally settled within <14 days> after the invoice date given the ACT Government accelerated the payments of invoices for local enterprises recognising the importance of cash flow to small and medium enterprises given the COVID-19 pandemic.
AASB 15.117 AASB 15.116(c)	<i>Contract liabilities</i> Contract liabilities relate to consideration received in advance from customers in respect of Fare Revenue and Grants with Sufficiently Specific Performance Obligations. When an amount of consideration is received from a customer prior to the Agency transferring a good or service to the customer, the balance of the consideration which has not been transferred is presented as a contract liability.
	Members of the public can pay cash upon entering a bus or can pay using a MyWay card. In order to use a MyWay card, a customer must pre-pay their bus fare by loading money onto their MyWay card, and then upon entering a bus they scan their card which deducts the amount of the fare from the card. Therefore, when customers use a MyWay card, fare revenue is collected by 'Burley Griffin Agency' before the bus services are provided. As such, 'Burley Griffin Agency' recognises the revenue paid upfront as a contract liability and it then recognises this as fare revenue once the customer scans their card.
	'Burley Griffin Agency' receives grants that have sufficiently specific performance obligations for conducting ecological surveys for 'Example Commonwealth Department'. The grant payments are normally received in advance and accordingly are recognised as a contract liability until the milestones in the ecological survey funding agreement are met at which time the relevant amount is moved to revenue.

	 business combinations, cumulative catch-ups, such as those arising from a change in the measure of progress, a change in an estimate of th transaction price or a modification; and a change in timeframe – for performance obligations to be satisfied. 			
	NOTE 25. BORROWINGS			
	Description and Material Accounting Policies Relating to Borrowings			
	ACT Government Borrowings ACT Government Borrowings held by 'Burley Griffin Agency' include debt securities and concessional loans payable.			
	Debt Securities Interest-bearing borrowings comprise short and long-term debt securities issued by the Territory at the time of se government.			
AASB 7.21, AASB 123.6(a)	ACT Government debt securities are financial liabilities and are measured at the fair value of the consideration receive when initially recognised and at amortised cost subsequent to initial recognition, with any adjustments to the carryin amount being recorded in the Operating Statement. The associated interest expense is recognised in the reporting period in which it occurs.			
	Concessional Loans Payable On 1 July 2022 'Burley Griffin Agency' entered into a memorandum of understanding with the Environment, Planning ar Sustainable Development Directorate for a Concessional Loan of \$xxx from the Zero Emissions Government Fund. Th purpose of the concessional loan was for the installation of solar photovoltaic pv panels, battery storage, generator back-u systems and upgrading to LED lights at all the buildings owned by 'Burley Griffin Agency'. The concessional loan is intere free and if 'Burley Griffin Agency' sourced these borrowings in the market then it would pay an interest rate of x.xx%.			
	The amount of the concessional loan will be repaid over the next 8 years so that the loan will be fully repaid by 30 June 203 The repayment of the loan will be made in equal annual repayments. The loan is not repayable on demand.			
	Concessional loans payable are recognised when 'Burley Griffin Agency' become a party to the contract and, as consequence, has a legal right to pay cash. This generally occurs once the concessional loan agreements are signed and the loan amount is provided to 'Burley Griffin Agency'. As the loan agreement was finalised at the date the funds were provide no loan commitment will be initially recognised.			
	Upon initial recognition the loan payable is measured at fair value plus transaction costs, with fair value being determine using a discounted cash flow analysis. Subsequent to initial recognition the loan payable is measured at amortised cost as is held only to pay contractual cash flows and these cash flows are repayments of principal on specified dates.			
	ACT Government Borrowings and Commonwealth Government Borrowings Interest-bearing borrowing liabilities comprise short and long-term debt securities issued by the Territory ar Commonwealth Government loans assigned by the Commonwealth at the time of self-government.			
AASB 7.21, AASB 123.6(a)	Both ACT Government and Commonwealth Government Borrowings are financial liabilities and are measured at the favalue of the consideration received when initially recognised and at amortised cost subsequent to initial recognition, with any adjustments to the carrying amount being recorded in the Operating Statement. The associated interest expense recognised in the reporting period in which it occurs.			
	Service Concession Arrangement Liability In 2017 'Burley Griffin Agency' entered into a service concession arrangement with 'Example Metro' to construct, delive maintain and operate light rail infrastructure assets, light rail plant and equipment, and light rail building assets over th term of the contract. As part of these arrangements 'Burley Griffin Agency' has taken up a service concession arrangeme			

Reference	NOTE 25. BORROWINGS – CONTINUED
AASB 1059.11, 12 & 15	A service concession liability is initially recognised as a financial liability where the grantor has a contractual obligation to make specified or determinable future payments to the operator for the construction, development, acquisition or upgrade of a service concession asset. The service concession financial liability is recognised at the same time as recognising or reclassifying a service concession asset. The service concession financial liability is initially measured at the same amount as the asset, adjusted for any other consideration exchanged between 'Burley Griffin Agency' and the operator.
AASB 1059.B73 & B74	Where a service concession arrangement involves both payments to the operator and a grant of a right to the operator (Hybrid Arrangement), then 'Burley Griffin Agency' recognises both a financial liability and an unearned revenue liability. The financial liability part is measured first, with the remainder of the total liability (i.e. amount of the service concession asset) allocated to the unearned revenue liability. The financial liability portion is calculated by discounting future payments using the contractually specified interest rate or otherwise a prevailing market rate for a similar instrument with a similar credit rating.
ACT Accounting Policy	All borrowings of 'Burley Griffin Agency' are unsecured.
	2023 2022 \$'000 \$'000

	ACT Government Borrowings ^a
	Commonwealth Borrowings Service Concession Arrangement Financial Liability
	Total Non-Current Borrowings Total Borrowings
	 a) The overall decrease in ACT Government borrowings of \$xxx is due to a planned reduction in borrowings throughout 2022-23.
ACT Disclosure Policy	Credit Facilities There are no formal credit facilities in place for the Agency with the Territory's appointed transactional bank.
	If the Agency's accounts go into overdraft throughout the year, the Agency is not charged interest as its bank accounts are set-off accounts as part of the Whole-of-Government Banking arrangements. However, the overdraft position is required to be rectified as soon as possible. The Agency went into overdraft for a short period of time in November 2022, and rectified the situation immediately.
	Commentary – Note 25: Borrowings
	Credit Facilities
	Agencies can have either set-off or non set-off bank accounts through the Territory Banking Account with Westpac as part of the Whole-of-Government Banking Arrangement. Agencies that have set-off bank accounts will not be charged interest where the bank account is overdrawn at any stage throughout the financial year. However, agencies that have non set-off bank accounts will be charged interest where the bank account is overdrawn. Interest paid on overdrawn non set-off bank accounts should be recorded as interest expense in Note 13 <i>Borrowing Costs</i> .
FMA Sec 34B(2)	It is important to note that Directors-General of agencies manage the balance of the Controlled bank account. If at the end of the year the closing balance is negative, the Director-General of that agency will be required to implement a debt reduction strategy, as soon as possible.
	Some agencies have received interest-free loans from the Environment, Planning and Sustainable Development Directorate under the Carbon Neutral Government Fund. These loans can be disclosed under a separate Note Interest-Free Borrowings.

Reference	NOTE 26 LEA	ASE LIABILITIES			
AASB 16.59	Description and Material A Agency as a Lessee	Accounting Policies Relating to Lease Liabilities			
	The Agency has leases over a range of assets including buildings, motor vehicles, ICT equipment, specialised plant and equipment, concessionary land and public private partnership assets. There are a number of leasing arrangements that have resulted in the recognition of a lease liability while other leasing arrangements have not resulted in a liability being recognised. The below table provides information relating to the leases in place and a split between those that have been taken up as a lease liability and those that have not.				
	Leases that have resulted in 'Burley Griffin Agency' recognising a lease liability are as follows:				
	Terms and Conditions of Leases				
	Motor vehicles	The Agency holds 145 motor vehicle leases (140 in 2022). The terms vary from two years to three years. These leases allow for extensions, but have no terms of renewal or purchase options, nor escalation clauses.			
	Specialised plant and equipment	Leases for specialised plant and equipment have lease terms which vary from $3 - 10$ years and there is generally no extension or renewal options.			
		Where the lease contains a purchase option, the purchase price is included in the lease liability where the Agency believes it is reasonably certain that the purchase option will be exercised.			
	Public Private Partnership (PPP)	'Burley Griffin Agency' has entered into a PPP agreement with 'Example Private Sector Entity' for the design, construction and financing of a new court building as well as the subsequent provision of facilities management and support services. 'Burley Griffin Agency' determined that this arrangement was not a Service Concession Arrangement under AASB 1059 but instead the arrangement fell within the requirements of the leasing standard (AASB 16). The design and construction of the new court building was completed in June 2020, and as such, 'Burley Griffin Agency' recognised a lease liability and a corresponding lease asset at this date. The lease term is 25 years and will therefore expire in June 2045.			
	Building leases – Specialised Depot Building	The Agency has one lease for a specialised depot building which expires in six years. The lease has varying terms, escalation clauses and renewal rights in order to provide flexibility to the Agency and the extension options are exercisable only by the Agency. The lease agreement gives the Agency the right to renew the lease for up to twice the initial term.			
		There are no conditions in the lease agreements requiring the Agency to restore the site which the leased building is situated.			
		The depot lease contains an annual pricing mechanism based on CPI movements at each anniversary of the lease inception.			
AASB 16.Aus59.1	Concessionary land leases (also referred to as peppercorn leases)	The Agency has a 30 year concessionary lease from 'ABC Agency' for use of land. The lease expires in 2044, with a rental of \$xxx per year which is well below market value. 'Burley Griffin Agency' is dependent on the use of the land to further its objectives of conducting ecological studies and using the results to provide policy advice to Government. The land is restricted to provision of community services in accordance with the objectives of the Agency to local residents.			
	Leases that have not result Terms and Conditions of Le	ted in 'Burley Griffin Agency' recognising a lease liability are as follows: ases			
ACT Accounting Policy	Building leases – office accommodation	The Agency has a Memorandum of Understanding (MoU) for each of two office buildings with the ACT Property Group (ACTPG). A lease asset and lease liability have been recognised by ACTPG for these office buildings in accordance with ACT Government Office Accommodation Accounting Policy, and as such, 'Burley Griffin Agency' has not recognised a lease liability for these buildings.			
		One of the MOUs expires in three years and the second one expires in five years. There are no conditions in the MOUs requiring the Agency to restore the leased buildings to the physical state they were in prior to the commencement of the MOUs. The MOUs contain an annual pricing mechanism based on CPI movements at each anniversary of the inception of the MOUs.			

Reference	NOTE 26 LI	EASE LIABILITIES – CONTINUED
	IT equipment	The Agency has numerous leases for IT equipment. 'Burley Griffin Agency' has determined th these leased assets are low value and as such has used the exemption for leases of low val assets. Therefore 'Burley Griffin Agency' does not take up a lease liability for these leases b instead accounts for the cost of these leases as an expense through the Operating Stateme as incurred.
		Where the lease contains a purchase option, the purchase price is included in the lease liabil where the Agency believes it is reasonably certain that the purchase option will be exercised
AASB16.59bii		is extension options, at commencement date and at each subsequent reporting date, the Ager e it is reasonably certain that the extension options will be exercised.
		ntial future lease payments which are not included in lease liabilities as the Agency has assessed th ion is not reasonably certain.

	Commentary – Note 26: Lease Liabilities		
	The AASB 16 <i>Leases</i> disclosure objective is to ensure that users of the financial statements of have on the financial statements. AASB 16 contains both quantitative and qualitative disclosed and the financial statements.	can assess the effect sures.	that leases
	The disclosure objective should be used by Agencies to assess whether the overall quality and are sufficient rather than just mechanically following the lease disclosures in the Model Final structures in the Model Final structure structures in the Model Final structure structures in the Model Final structure structure structures in the Model Final structures in the Model Final structure structures in the Model Final structure structure structures in the Model Final structure structure structures in the Model Final structure structure structure structures in the Model Final structure structure structures in the Model Final structure structure structure structures in the Model Final structure structure structure structures structures in the Model Final structure structure structure structures in the Model Final structure structure structure structure structure structures structures at the structure structure structure structure structure structure structure structure structures at the structure structur		disclosures
AASB 16.52	Lessees are required to disclose information about their leases for which they are a lessee ir financial statements or cross referenced throughout the notes. ACT Accounting Policy requir		-

1

Reference	Commentary – Note 26: Lease Liabilities - Continued
AASB 16.B9	For lessors, information relating to investment properties under leases should be included in the investment property note.
	Identification of a Lease
	To assess whether a contract conveys the right to control the use of an identified asset, agencies should assess whether they have:
	 the right to obtain substantially all of the economic benefits from use of the identified asset (e.g. by having exclusive use of the asset through the lease period); and the right to direct the use of the identified asset.
	In considering whether the relevant asset is an identified asset, Agencies should consider whether the asset is explicitly identified (e.g. by serial number, building floor and address) or implicitly identified (e.g. through the asset being specialised and / or customised). If the lessor has a substantive substitution right (i.e. can swap the asset and there is economic incentive to do so) then there is no identified asset. In accordance with ACT Accounting Policy, this substantive substitution right is relevant to properties leased through ACT Property Group.
	A lessee has the right to direct the use of the asset only, if either:
	 they have the right to direct how and for what purpose the asset is used throughout the period of use; or the relevant decisions about how and for what purpose the asset is used are predetermined and: they have the right to operate the asset (or to direct others to operate the asset in a manner that it determines) throughout the period of use, without the supplier having the right to change those operating instructions; or
AASB 16.B24	 they designed the asset (or specific aspects of the asset) in a way that predetermines how and for what purpose the asset will be used throughout the period of use.
	Variable Lease Payments Disclosures
AASB 16.B49	Where the Agency leases have variable lease payments, additional information should be considered to satisfy the disclosure objective, for example:
	• the Agency's reasons for using variable lease payments and the prevalence of those payments;
	the relative magnitude of variable lease payments to fixed payments;
	 key variables upon which variable lease payments depend and how payments are expected to vary in response to changes in those key variables; and
	other operational and financial effects of variable lease payments.
	Residual Value Guarantee Disclosures
AASB 16.B51	Where the Agency has leases with residual value guarantees then consider additional information to satisfy the disclosure, for example:
	• the reasons for providing residual value guarantees and the prevalence of those guarantees;
	 the magnitude of the exposure to residual value risk;
	 the nature of underlying assets for which those guarantees are provided; and other operational and financial effects of those guarantees.
AASB 16.46A	COVID-19 and Lease Modification
AASB 2021-3.46B	As a practical expedient, a lessee may elect not to assess whether a rent concession occurring as a direct consequence of the COVID-19 pandemic is a lease modification only where:
	• the change in lease payments results in revised consideration for the lease that is substantially the same as, or less
	 than, the consideration for the lease immediately preceding the change; any reduction in lease payments affects only payments originally due on or before 30 June 2022 (for example, a rent concession would meet this condition if it results in reduced lease payments on or before 30 June 2022 and increased
	 ease payments that extend beyond 30 June 2023); and there is no substantive change to other terms and conditions of the lease.
	Where this practical expedient is applied, the lessee shall disclose:
	 that it has applied the practical expedient to all rent concessions that meet the conditions outlined above or, if not applied to all such rent concessions, information about the nature of the contracts to which it has applied the practical expedient; and
	 the amount recognised in profit or loss for the reporting period to reflect changes in lease payments that arise from rent concessions to which the lessee has applied the practical expedient.

Reference	NOTE 27. EMPLOYEE BENEFITS				
	Description and Material Accounting Policies Relating to Employee Benefits Liabilities				
Model Financial Statements Guidelines - 1. 6 Application – ACT Disclosure Policy	Accrued Wages and Salaries Accrued wages and salaries are measured at the amount that remains unpaid to employees at the end of the reporting period.				
Model Financial Statements Guidelines - 1.6 Application – ACT Disclosure Policy	Annual and Long Service Leave Annual and long service leave, including applicable on-costs, that are not expected to be wholly settled before twelv months after the end of the reporting period when the employees render the related service, are measured at the presen value. The present value is determined based on the estimated future payments to be made in respect of services provide by employees up to the end of the reporting period. Consideration is given to the future wage and salary levels, experienc of employee departures and periods of service. At the end of each reporting period, the present value of future annual leave and long service leave payments is estimated using market yields on Commonwealth Government bonds with term to maturity that match, as closely as possible, the estimated future cash flows.				
	Annual leave liabilities have been estimated on the assumption they will be wholly settled within three years. This financial year the rate used to estimate the present value of future:				
	 annual leave payments is XX% (101.8% 100.2% in the previous financial year); and 				
	• payments for long service leave is XX% (95.3% 108.7% in the previous financial year).				
AASB 119.60, 66 & 156	The long service leave liability is estimated with reference to the minimum period of qualifying service. For employees with less than the required minimum period of 7 years of qualifying service, the probability that employees will reach the required minimum period has been taken into account in estimating the provision for long service leave and applicable on-costs.				
	On-costs only become payable if the employee takes annual and long service leave while in-service. The probability tha employees will take annual and long service leave while in-service has been taken into account in estimating the liabilit for on-costs.				
	Significant judgements have been applied in estimating the annual and long service leave liabilities, given that 'Burle Griffin Agency' uses the Whole-of-Government present value, probability and on-cost factors. These factors are issued b ACT Treasury and apply to all ACT Government Agencies. ACT Treasury organises an actuarial review to be undertake every three by the Australian Government Actuary to estimate each of these factors. The latest assessment wa undertaken in December 2021, with the next review expected to be undertaken by early late 2024.				
AASB 101.69	Annual leave and long service leave liabilities are classified as current liabilities in the Balance Sheet where there are no unconditional rights to defer the settlement of the liability for at least 12 months. Conditional long service leave liabilities are classified as non-current because the agency has an unconditional right to defer the settlement of the liability until the employee has completed the requisite years of service.				
	Superannuation Liability The employer superannuation benefits payable to 'Burley Griffin Agency' employees, who are members of the defined benefit CSS or PSS Schemes, are recognised in the financial statements of the Superannuation Provision Account. COVID-19 Impact				
	As part of the ACT Government's response to the COVID 19 pandemic a 'Jobs for Canberrans' program was established to				
	provide secure work opportunities for Canberrans who have relied on casual work and are not eligible for the Australia Government's wage subsidy scheme. This program has had a material impact on employee expenses with an additiona				
	27 staff being employed throughout 2021-22 under this program at a cost of \$xxx.

AASB 137.5(b)	Commentary - Note 27: Employee Benefits AASB 137 Provisions, Contingent Assets and Contingent Liabilities does not apply to employee benefit provisions and there for the divelopment of the target and benefits and the problem of the second s
	therefore the disclosure requirements in that standard do not have to be applied to employee benefits. Annual Leave and Long Service Leave Liabilities Classification
AASB 101.69	 A liability is required to be classified as current when it satisfies any of the following criteria: it is expected to be settled in the agency's normal operating cycle; it is held primarily for the purpose of being traded; it is due to be settled within 12 months after the reporting date; or the agency does not have an unconditional right to defer settlement of the liability for at least 12 months after the reporting date.
	All other liabilities shall be classified as non-current.
	The effect of the last bullet point above is that all annual leave and unconditional long service leave is to be classified as current. An agency does not have an unconditional right to defer the payment of annual leave or unconditional long service leave. For example, the meeting of these obligations could not be deferred if the employee were to resign. This leave is required to be classified as current when the employee is entitled to the leave rather than when the leave is expected to be taken.
	Conditional long service leave is classified as a non-current liability as an agency has an unconditional right to defer settlement of the liability for at least 12 months. Agencies should refer to the requirements of their workplace agreements to determine whether leave is conditional or unconditional. For example, for most agencies, employees with a service period of between 1 and 6 years would have conditional long service leave which is to be classified as non-current.
	Termination Benefits
AASB 119.159 AASB 119.162&163	A termination benefit only arises if it is provided in direct exchange for the termination of employment; not on any other exchange (e.g. benefits cannot include provisions for future services by an employee). A benefit that is in any way dependent upon providing services in the future is not a termination benefit.

AASB 137.84(e)	Unwinding of discount or change in discount rate				
AASB 137.84 (a)	Provision at the End of the Reporting Period				

Reference	Commentary – Note 28: Other Provisions
AASB 137.85	 For each class of provision the following must be disclosed: a brief description of the nature of the obligation and the expected timing of any resulting outflow of economic benefits; an indication of the uncertainties about the amount or timing of those outflows. Where necessary to provide adequate information, an agency shall disclose the major assumptions made concerning future events; and the amount of any related estimated reimbursement, stating the amount of any asset recognised for that expected reimbursement.
AASB 137.84	 Movements during the reporting period for each class of provision must be disclosed for the current year only (i.e. comparative information is not required) showing separately: the carrying amount at the beginning and end of the reporting period; additional provisions made in the period (including increases to existing provisions); amounts incurred or charged against the provision during the reporting period; unused amounts reversed during the reporting period; and increases during the period in the discounted amount arising from the passage of time and the effect of any changes in the discount rate. The above movements must be separately shown for each provision reconciliation where there are material amounts to be disclosed.
AASB 137.92	In extremely rare cases, where disclosure of information regarding provisions, contingent liabilities or contingent assets is expected to seriously prejudice the position of the agency, in a dispute with other parties, the agency need not disclose the information. However, the agency must provide information regarding the general nature of the dispute, together with the reason for non-disclosure.
AASB 137.66 & 68	Onerous Contracts An onerous contract is a contract in which the unavoidable costs of meeting the obligation under the contract exceed the economic benefits expected to be received under it. The present obligation under an onerous contract shall be recognised and measured as a provision. Where the impact of COVID-19 results in increased costs to meet, or reduced benefits from, an executory contract, management need to assess whether the contract has become onerous and a provision needs to be recognised.
AASB 137.78	Restructuring and Sale of an Operation Where an agency is restructuring its operations and as part of the restructuring is selling that operation, no obligation arises for the sale until there is a binding sale agreement as well as a constructive obligation.
AASB 137.Aus 26.1	Recognition of Liabilities The intention to make payments to other parties, whether advised in the form of a government budget policy, election promise or statement of intent, does not of itself create a present obligation which is binding. A liability would be recognised only when the agency is committed in the sense that it has little or no discretion to avoid the sacrifice of future economic benefits. For example, a government does not have a present obligation to sacrifice future economic benefits for social welfare payments that might arise in future reporting periods. A present obligation for social welfare payment period. Similarly, a government does not have a present obligation to sacrifice nulti-year public policy agreements until the grantee meets conditions such as grant eligibility criteria, or has provided the services or facilities required under the grant agreement. In such cases, only amounts outstanding in relation to current or previous periods satisfy the definition of liabilities.
AASB 137.Aus 26.2	Such transactions or events may give rise to legal, social, political or economic consequences which leave little, if any, discretion to avoid a sacrifice of future economic benefits. In such circumstances, the definition of a liability is satisfied. An example of such an event is the occurrence of a disaster, where a government has a clear and formal policy to provide financial aid to victims of such disasters. In this circumstance, the government has little discretion to avoid the sacrifice of future economic benefits. However, the liability is recognised only when the amount of financial aid to be provided can be measured reliably.
	Provision for Make Good Where an agency is leasing a building through the ACT Property Group (ACTPG), it is recommended that the agency contact ACTPG to confirm whether there are any requirements at the end of the lease term around returning the building to the condition it was in prior to the commencement of the lease, and if so, who is response for undertaking this work (ie whether it is the agency's responsibility or ACTPGs responsibility). Where it is the agency's responsibility to return the building to the condition it was in prior to the lease then the agency should recognise a Provision for Make Good,

Reference	Commentary – Note 30: Restructure of Administrative Arrangements [Directorates Only]
AASB 1004.BC29	The basis of conclusion in AASB 1004 <i>Contributions</i> states that the scope of the requirements relating to restructures of Administrative Arrangements (AAs) is limited to the transfer of a business (as defined in AASB 3 <i>Business Combinations</i>). As such, the requirements do not apply where, for example, an individual asset or a group of assets that are not a business are transferred. Therefore, the example disclosures in this note do not have to be applied in the situation where an individual asset or a group of assets that are not a business are transferred as part of an AA.
AASB 3 Appendix A Defined Terms	 AASB 3 defines a business as an integrated set of activities and assets that is capable of being conducted and managed for the purpose of providing: (a) a return in the form of dividends; or (b) lower costs or other economic benefits directly to investors or other owners, members or participants.
ACT Disclosure Policy	As AAs involve a transfer of an integrated set of activities mainly for the purpose of reducing overall costs or providing other economic benefits to the Community (members or participants) and because AAs are a discrete function transferred between agencies, it is considered that all AAs of this nature will satisfy the definition of a business under AASB 3.
	Examples of AAs restructures of administrative arrangements are as follows:
	 a new agency is created and assets and liabilities are transferred to this new agency from one or more government controlled agencies; two or more agencies are merged together;
	 dividing a single agency into two or more new agencies; cessation of an agency and the net assets are transferred to another government controlled agency; and transfer of function between existing agencies due to Government decisions.
AASB 1004.54-56	Accounting Treatment of Transferred Assets and Liabilities AASB 1004 states that assets and/or liabilities transferred as part of an AA should be treated as a contribution by owners or a distribution to owners. As such, transfers should be recognised directly in equity.
AASB 1004.57	Disclosure of Transferred Income and Expenses AASB 1004 states that when activities are transferred as a consequence of an AA, the transferee agency shall disclose the expenses and income attributable to the transferred activities for the reporting period, showing separately those expenses and income recognised by the transferor during the reporting period. If disclosure of this information would be impracticable, that fact shall be disclosed, together with an explanation of why this is the case.
	Disclosure of Comparative Information
AASB 101.38 AASB 1004.57	Comparative information is required to be disclosed in respect of the prior reporting period for all amounts included in the financial statements, except where another Australian Accounting Standard permits or requires otherwise. AASB 1004 does not specifically address the need for comparative figures for an AA; however, as stated above, the disclosure of income and expenses relating to an AA is not required where it is impractical to provide this information.
AASB 101.7 & 43	Further, in some circumstances, it may be impracticable to reclassify comparative information for a particular prior period to achieve comparability with the current period. AASB 101 states that a requirement is impracticable when the directorate cannot apply it after making every reasonable effort to do so. It is likely that agencies will be able to provide income and expense figures for the comparative year where an entire output class is transferred as part of an AA. However, it is unlikely that comparative figures can be provided where only part of an output class is transferred as part of an AA (note that a reasonable effort must be made).
	The example provided in the Model for 2023 involved the transfer of a Heritage and Environment division between 'Burley Griffin Agency' and ABC Directorate. Given this is the transfer of a separate output, rather than an Output Class, comparatives have not been disclosed.

AASB 7.42D	Commentary – Note 31: Financial Instruments The note included in the Model represents the minimum disclosures by way of example only. Each agency needs consider their specific financial instruments and modify the disclosures accordingly.
	Definitions
AASB 132.11	'Financial asset' means any asset that is:
	 cash; a contractual right to receive cash or another financial asset from another entity;
	• a contractual right to exchange financial assets or financial liabilities with another entity under conditions that a
	 potentially favourable to the entity; or an equity instrument of another entity.
AASB 132.11	'Financial instrument' means any contract that gives rise to a financial asset of one entity and a financial liability or equi
AA3D 132.11	instrument of another entity.
AASB 132.AG15	Examples of financial instruments include primary instruments, such as receivables, payables and equity securities, and derivative financial instruments, such as financial options, futures and forwards, interest rate swaps and currency swaps
AASB 132.11	'Financial liability' means any liability that is a contractual obligation:
	 to deliver cash or another financial asset to another entity; or to exchange financial assets or financial liabilities with another entity under conditions that are potentia unfavourable to the entity.
AASB 132.11	'Equity Instrument' means any contract that evidences a residual interest in the assets of an entity after deducting all liabilities.
AASB 132.13	The terms 'contract' and 'contractual' refer to an agreement between two or more parties that has clear econom consequences that the parties have little, if any, discretion to avoid, usually because the agreement is enforceable law. Contracts, and thus financial instruments, may take a variety of forms and need not be in writing. In taking accruals for financial instruments, only those that have a contractual basis should be recognised. Also, in government certain rights to receive or pay cash may not be contractual and therefore in these situations, the requirements abo
AASB 132.AG12	will not apply. For example, the rights or obligations may have their source in legislation such as in the case of taxatic receivables, GST receivables or levy receivables.

Reference	Commentary – Note 31: Financial Instruments – Continued
ACT Disclosure Policy	Disclosures – Quantitative and Qualitative ACT Disclosure Policy requires disclosure of the terms, conditions, timing, accounting policies and certainty of future cash flow for each class of financial asset, financial liability and equity instrument, so that the significance of financial instruments can be determined. Most of these disclosures have not been included in the financial instruments note, instead they have been included in other notes within the Models. Where an instrument is individually material, its terms and conditions should be disclosed.
AASB 7.25, 31, 32, 33, 34, 36 & 39	AASB 7 <i>Financial Instruments: Disclosures</i> requires disclosure of information about an agency's exposure to credit risk, market risk (which includes interest rate risk, currency risk and price risk), foreign currency risk, liquidity risk and also fair value for each class of financial asset and financial liability. The fair value for each class of financial asset and financial liability should be disclosed in such a way that they can be compared with the corresponding carrying amount in the Balance Sheet. The only risk applying to investments with the Territory Banking Account is price risk. Interest rate risk and credit risk are not applicable.
AASB 7. 32A	Providing qualitative disclosures in the context of quantitative disclosures enables users to link related disclosures and hence form an overall view of the nature and extent of risks arising from financial instruments.
AASB 7.36	Where an agency holds collateral or other credit enhancements, it will need to disclose the extent to which those arrangements financially mitigate the credit risk by class of instrument (whether or not the carrying amount reflects the maximum exposure to credit risk). Disclosure of amounts that best represent an agency's maximum exposure to credit risk from its financial instruments will not be required for those instruments whose carrying amount reflects this. Agencies will not need to disclose the carrying amounts of financial assets for which the terms have been renegotiated, which would otherwise be past due or impaired. For those financial assets that is either past due but not impaired, or which have been individually impaired, agencies need not separately disclose details about any associated collateral or other credit enhancements held by the agency.
AASB 7.29(a) ACT Disclosure Policy	Where the carrying amount of financial instruments such as short-term trade receivables and payables is a reasonable approximation of their fair value, AASB 7 states that no disclosure of the fair value is required. However, ACT Disclosure Policy requires these amounts be disclosed in an agency's financial statements for ease of comparability.
AASB 7.14(a) & (b)	An agency shall disclose the carrying amount of financial assets pledged as collateral for liabilities and contingent liabilities, and any material terms and conditions relating to assets pledged as collateral.
AASB 7.42A, 42B & 42C	There are additional disclosures for transfers of financial assets where an asset is not derecognised in its entirety or the asset is derecognised in its entirety but the transferor retains some continuing involvement. An agency transfers a financial asset when it:
	 transfers contractual rights to receive cash flows from the asset; or retains contractual rights to cash flows from an asset but assumes a contractual obligation to pay those cash flows to one or more recipients.
AASB 7.39	Maturity Analysis
AASB 7.B11E	AASB 7 requires undiscounted amounts to be included in the maturity analysis. This means that in a number of cases the amount included in the Balance Sheet for a financial asset or financial liability will be different to the amount included in the maturity analysis. Note that for agencies that have ACT Government borrowings and Commonwealth Government
ACT Disclosure Policy	borrowings, the amortised cost for these items approximates their costs and as such there will be no difference between the amount in the Balance Sheet and the amount in the maturity analysis.
AASB 7.B11	AASB 7 provides an example of the time bands to include in the maturity analysis required by the standard. These time bands are as follows:
	 not later than one month; later than one month and not later than three months; later than three months and not later than one year; and later than one year and not later than five years.
ACT Disclosure Policy	It is considered that these are not the most appropriate time bands for ACT Government agencies as the public sector is not as focused on the short-term liquidity of its financial assets and liabilities. As such, ACT Disclosure Policy requires agencies to use three time bands which are as follows: • one year or less;
	 over one year to five years; and over five years.

Kererenee	Commentary – Note 31: Financial Instruments – Continued
	Sensitivity Analysis
	AASB 7 requires a sensitivity analysis to be undertaken for each type of market risk to which the agency is exposed at the reporting date, showing how profit and loss and equity would have been affected by changes in the relevant risk variable that were reasonably possible at that date. Market risk includes interest rate risk, price risk and foreign currency risk. An agency must also disclose the methods and assumptions used in preparing the sensitivity analysis and changes from the previous period in the methods and assumptions used, and the reasons for such changes.
	Note that a sensitivity analysis, as disclosed in the Model, does not need to be undertaken for the interest rate risk or price risk, if the agency has determined that the possible impact on profit and loss or total equity from fluctuations in interest rates or price respectively is immaterial.
	Carrying Amount of and Gains on Financial Assets and Financial Liabilities
AASB 7.8 AASB 7.20	AASB 7 requires the carrying amount and gains to be disclosed for the following classes of financial assets and financial liabilities:
	• Financial Assets at Fair Value through the Profit and Loss showing separately those designated upon Initial Recognition at Fair Value through Profit and Loss;
	 Financial Liabilities at Fair Value through the Profit and Loss showing separately those designated upon Initial Recognition at Fair Value through Profit and Loss; Financial Assets measured at Amortised Cost; Financial Liabilities measured at Amortised Cost; and
	• Financial Assets measured at Fair Value through Other Comprehensive Income.
ACT Disclosure Policy	AASB 7 allows this above disclosure to be included in either the financial statements or in the notes. ACT Disclosure Policy requires this disclosure to be included in the notes.
	 Note however that most ACT Government agencies will not have all these categories of financial assets and liabilities and as such will not need to disclose all these categories. Most agencies will only have the following categories: Designated upon Initial Recognition at Fair Value through Profit and Loss (e.g. Investments with the Banking Account); and
	Financial Assets and Liabilities measured at Amortised Cost.
	As such, these are the only categories which have been included in the Model.
	Credit Risk
AASB 9 AASB 2014-7 AASB 7.35M-N AASB 7.36	AASB 7 requires, for all financial instruments within its scope, (except those to which the impairment requirements in AASB 9 are not applied) the disclosure by class of financial instrument of the amount that best represents an agency's maximum exposure to credit risk at the end of the reporting period without taking account of any collateral held or other credit enhancements. This disclosure is not required for financial instruments whose carrying amount best represents the maximum exposure to credit risk. Also required is a description of collateral held as security and other credit
AASB 7.35M-N Financial Framework Memo 2018/23 see Appendix B	enhancements and their financial effect. Agencies should disclose by credit risk rating grades the gross carrying amount of financial assets and the exposure to credit risk on loan commitments and financial guarantee contracts. For trade receivables, contract assets and lease receivables to which an agency applies AASB 9.5.5.15 (i.e. the simplified approach, measuring the loss allowance at an amount equal to lifetime expected credit losses) the information may be based on a provision matrix.
	Concentration of Credit Risk The expression 'Concentration of Credit Risk' used in the Financial Instruments note above refers to credit risk being focused in one area. For example, a high concentration of credit risk would occur when all receivables held by an agency are with one debtor. On the other hand, a low concentration of credit risk would occur when all receivables held by an agency are with a large number of unrelated debtors.
AASB 7.7 AASB 7.31	 AASB 7 sets out detailed requirements regarding the agency's obligations to report the identification and management of financial risks. The standard requires the following: Qualitative and quantitative disclosures for each type of risk (e.g. credit risk, liquidity risk, and market risk) that the agency is exposed to; Qualitative disclosures on: the exposures to risk and how they arise; the objectives, policies and processes for managing the risk and the methods used to measure the risk; and any changes in theses from the previous period. Quantitative disclosures - summary of quantitative data about the agency's exposure to a particular risk at the end of the reporting period, including concentrations of risk.

	Time Bands	
T Disclosure Policy	Whilst there is no requirement in the accounting standards to disclose capital and expenditure commitments by bands, ACT Disclosure Policy requires this since it is considered to provide useful information to the users of final statements.	
	Public Private Partnerships	
T Accounting Policy	Agencies that have entered into Public Private Partnerships will disclose the commitments under these arrangeme including lease commitments (minimum lease payments and finances charges) and capital and operating commitme	
	No Material Commitments	
	If an agency has no material commitments, this note can be excluded.	
	NOTE 33. CONTINGENT LIABILITIES AND CONTINGEN ASSETS Material Accounting Policies Relating to Contingent Liabilities and Contingent Assets	IT
	Contingent liabilities and contingent assets are not recognised in the Balance Sheet due to the uncertainty regarding possible amount or timing of any underlying claim or obligation. Instead they are disclosed and, if quantifiable, the estimate is disclosed.	
ASB 137.86	Contamination of Land During July 2022, the Agency disposed of waste material by burying it in landfill. In November 2022, it was discov that the waste had leaked from the containers and contaminated the area in which it was buried. The Agency undertaken to clean up the contaminated area where the waste was buried. The clean-up of the contaminated area be completed over the next two years at an approximate cost of \$xxx. This amount has been recognised as a provi (for further details see Note 28 <i>Other Provisions</i>).	y has a wil
AASB 137.88	The Agency considers that the environmental impact of the leak will be minimal because of the short amount of between the waste being buried and the contamination being discovered and also the prompt response to commute clean-up. The Agency is investigating the matter to determine what caused the incident.	
	It was alleged that the waste also contaminated nearby farmland. In May 2023 the owner of the farmland bro judicial proceedings against 'Burley Griffin Agency'. At 30 June 2023 the outcome of the proceedings against the ag	-

ACT Disclosure Policy	Legal Claims 'Burley Griffin Agency' is subject to 15 legal claims (2022 – 13 legal claims). 'Burley Griffin Agency' is potentially liable for \$xxx (2022 \$xxx) which represents the excess amount payable on these actions as 'Burley Griffin Agency' is covered by the ACT Insurance Authority (ACTIA). If 'Burley Griffin Agency', under the arrangements with ACTIA, pays the full amount of a successful claim, the amount less the excess amount (\$xxx per claim) is reimbursed to 'Burley Griffin Agency' by ACTIA. The estimated actuarially assessed liability covered by ACTIA is included in ACTIA's financial statements.
AASB 137.86 AASB 7.35K	Guarantees The Agency has guaranteed a loan taken out in April 2023 by 'Example Borrower' for an amount of \$xxx.
	Joint Ventures For contingent liabilities relating to joint ventures see Note 34 Interest in a Joint Venture.
AASB 137.89	Contingent Assets The only contingent assets as at 30 June 2023 relate to 'Burley Griffin Agency's' insurance arrangements where reimbursement from ACTIA occurs (see Legal Claims above).
	Commentary – Note 33: Contingent Liabilities and Contingent Assets
AASB 137.10	Definitions A contingent liability is:
	 a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the agency; or
	 a present obligation that arises from past events but is not recognised because: it is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or the amount of the obligation cannot be measured with sufficient reliability.
AASB 137.10	A contingent asset is a possible asset that arises from past events, whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the agency.
	Disclosure of Contingent Liability
AASB 137.86	 For each class of contingent liability, an agency shall disclose at the reporting date, unless the possibility of any outflow in settlement is remote, a brief description of the nature of the liability and where practicable: an estimate of its financial effect;
	 an indication of the uncertainties relating to the amount or timing of any outflow; and the possibility of any reimbursement.
AASB 137.89	Where an inflow of economic benefits is probable, an agency shall disclose a brief description of the nature of the contingent assets at the reporting date, and, where practicable, an estimate of the financial effect.
AASB 137.91	Where information regarding contingent liabilities and contingent assets is not disclosed because it is not practicable to do so, that fact must be stated.
	Contingent Liability Relating to Legal Action
ACT Disclosure Policy	The estimated contingent liability for legal action relating to an agency should be included in this note. Where legal services are undertaken by the Government Solicitors Office, they will provide the number of legal matters that occurred throughout the financial year and the estimated amount possibly payable under each legal matter. The note explanation should reflect the insurance arrangement that the agency has with ACTIA.
	Disclosure that Might Seriously Prejudice the Position of the Agency
AASB 137.92	In extremely rare cases, disclosure of some or all of the information regarding contingent liabilities and contingent assets may seriously prejudice the position of the agency, and where this is the case, the agency need not disclose that information. However, the agency must provide information regarding the general nature of the dispute, together with the reason for non-disclosure.

Reference NOTE 35. INTEREST IN A JOINT OPERATION -CONTINUED 2023 \$'000 **Plant and Equipment** At Cost Less: Accumulated Depreciation Less: Accumulated Impairment Losses **Total Plant and Equipment at Cost** Infrastructure Assets At Fair Value Less: Accumulated Depreciation Less: Accumulated Impairment Losses **Total Infrastructure Assets at Fair Value Total Non-Current Assets Total Assets** Commentary – Note 35: Interest in a Joint Operation Definition A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to AASB 11.15 the assets, and obligations for the liabilities, relating to the arrangement. Those parties are called joint operators. Nature, Extent and Financial Effects of an Agency's Interests in Joint Arrangements AASB 12.21(a) Where a joint arrangement is material to an agency, an agency shall disclose: the name of the joint arrangement; the nature of the agency's relationship with the joint arrangement (by, for example, describing the nature of the Ö activities of the joint arrangement and whether they are strategic to the agency's activities; the principal place of business (and country of incorporation, if applicable and different from the principal place of business) of the joint arrangement; and the proportion of ownership interest or participating share held by the entity and, if different the proportion of voting rights held (if applicable). A joint operator shall recognise in relation to its interests in a joint operation: AASB 11.20 its assets, including its share of any assets held jointly;

- its liabilities, including its share of any liabilities incurred jointly;
- its revenue from the sale of its share of the output arising from the joint operation;
- its share of the revenue from the sale of the output by the by the joint operation; and
- its expenses, including its share of any expenses incurred jointly.

AASB 11.21

A joint operator shall account for the assets, liabilities, revenues and expenses relating to its interests in a joint operation in accordance with the accounting standards applicable to the particular assets, liabilities, revenues and expenses.

NOTE 36. EVENTS AFTER THE REPORTING PERIOD

	Administrative Arrangement After the Reporting Period
AASB 110.21(a)	On 1 July 2023, the Executive approved an administrative arrangement that involved restructuring 'Burley Griffin
	Agency' by moving its land and planning division to 'Receiving Directorate'. The movement of the land and planning
	division was undertaken because it was considered that this function was more closely aligned with the existing
	functions of 'Receiving Directorate'. The financial effect of the administrative arrangement is not reflected in the
	financial statements.
AASB 110.21(b)	The total value of net assets transferred between the 'Burley Griffin Agency' and 'Receiving Directorate' after the reporting period was \$xxx000,000.

	Commentary – Note 36: Events after the Reporting Period
AASB 110.3	Events after the reporting period are those events, favourable and unfavourable, that occur between the reporting
	period and the date when the financial statements are authorised for issue. Two types of events can be identified:
	• those that provide evidence of conditions that existed at the end of the reporting period (adjusting events after the reporting period); and
	• those that are indicative of conditions that arose after the reporting period (non-adjusting events after the reporting period).
AASB 110.8 & 9	Adjusting events after the reporting period – involve an agency adjusting the amounts recognised in its financial statements for that adjusting event. An example of an adjusting event is the settlement after the reporting period of a court case that confirms the agency had a present obligation at the end of the reporting period. The agency would therefore have to make the appropriate adjustment in its financial statements for the result of the court case.
AASB 110.10 & 11	Non-adjusting events after the reporting period – involve the disclosure of the event; however, no adjustment is made to amounts recognised in the financial report. An example of a non-adjusting event is a decline in market value of investments between the end of the reporting period and the date when the financial report is authorised for issue. The decline in market value does not normally relate to the condition of the investments at the end of the reporting period, but reflects circumstances that have arisen subsequently.
AASB 110.19	If an agency receives information after the reporting period about conditions that existed at the end of the reporting period, disclosures relating to those conditions should be updated in light of the new information.
AASB 110.21	AASB 110 Events after the Reporting Period requires the following information to be disclosed for each material category of non-adjusting event after the reporting period:
	the nature of the event; and
	• an estimate of its financial effect or a statement that such an estimate cannot be made.
	If an agency does not have any material events occurring after the reporting period, then this note can be excluded.

Reference	Commentary – Note 37: Third Party Monies
ACT Disclosure Policy	Agencies are required to include a note on third party monies held. The information should include third party monies held at the end of the reporting period and the purpose for which the monies are held.
ACT Disclosure Policy	Where a trust has assets and liabilities (other than cash), the financial statements should include an accrual presentation of that trusts activities during the year and financial position at the reporting date. If a trust has no assets or liabilities apart from cash, the financial statements need only provide cash disclosure of the trust's activities during the year, and financial position at the reporting date.
	Control Assets held in trust for the benefit of other parties are not controlled by the agency.
AASB 10.6 AASB 10.5-18	The definition of control in AASB 10 <i>Consolidated Financial Statements</i> is that an investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Depending upon the circumstances, it may be that an agency has control of the trust funds and relevant trust assets and should consolidate them into its financial statements.
AASB 15.33	AASB 15 <i>Revenue from Contracts with Customers</i> outlines certain elements which may indicate that an agency has control over an asset. In particular, if an agency has control of an asset it can direct the use of, and obtain substantially all of the remaining benefits from the asset. Control can also be demonstrated by being able to prevent other entities from directing and using the asset for their own benefit.
	NOTE 38. RELATED PARTY DISCLOSURES
AASB 124.9	Description and Material Accounting Policies Relating to Related Party Disclosures A related party is a person that controls or has significant influence over the reporting entity, or is a member of the Key Management Personnel (KMP) of the reporting entity or its parent entity, and includes their close family members and entities in which the KMP and/or their close family members individually or jointly have controlling interests.
	KMP are those persons having authority and responsibility for planning, directing and controlling the activities of the 'Burley Griffin Agency', directly or indirectly.
	KMP of the 'Burley Griffin Agency' are the Portfolio Minister, Director-General and certain members of the Senior Management Team.
	The Head of Service and the ACT Executive comprising the Cabinet Ministers are KMP of the ACT Government and therefore related parties of 'Burley Griffin Agency'.
	This note does not include typical citizen transactions between the KMP and 'Burley Griffin Agency' that occur on terms and conditions no different to those applying to the general public.
	(A) Controlling Entity 'Burley Griffin Agency' is an ACT Government controlled entity.
	(B) Key Management Personnel B.1 Compensation of Key Management Personnel Compensation of all Cabinet Ministers, including the Portfolio Minister, is disclosed in the note on related party disclosures included in the ACT Executive's financial statements for the year ended 30 June 2023.
AASB 124.9 Compensation defined	Compensation of the Head of Service is included in the note on related party disclosures included in the Chief Minister, Treasury and Economic Development Directorate's (CMTEDD) financial statements for the year ended 30 June 2023.
	Two of the KMP of 'Burley Griffin Agency' are employees of CMTEDD and are compensated by CMTEDD. The first of these was both a KMP of 'Burley Griffin Agency' and CMTEDD simultaneously throughout the current financial year. The compensation relating to this KMP is included in CMTEDDs financial statements, and as such, is not included in this note. The second KMP worked for 'Burley Griffin Agency' on secondment from CMTEDD for 6 months of the current financial year, and as such, the amount of their remuneration while on secondment is included in the table below. The compensation for the other 6 months of the financial year the KMP was not on secondment is included in the CMTEDD financial statements.
	Compensation by 'Burley Griffin Agency' to KMP is set out below: 2023 2022
	\$'000 \$'000
	Short-term employee benefits Post-employment benefits Other long-term benefits
	Termination benefits
AACD 124 17	Board member fees
AASB 124.17	Total Compensation to KMP

	Commentary – Note 38: Related Party Disclosures
	If there are no material transactions under B.2, B.3 or C then no disclosures need to be made in this note.
	The disclosure in section C above for 'Burley Griffin Agency' is an example only. Agencies should highlight only the materi transactions with other ACT Government Entities in this Note.
ASB 124.1	The objective of AASB 124 is to ensure that an agency's financial statements contain the disclosures necessary to dra attention to the possibility that its financial position and profit or loss may have been affected by the existence of relate parties and by transactions and outstanding balances, including commitments, with such parties.
AASB124.9	Key management personnel are those persons having authority and responsibility for planning, directing and controllin the activities of the entity, directly or indirectly, including any director (whether executive or otherwise) of that entity.
	Primarily, this Standard requires disclosure of summarised details about KMP remuneration, and certain transactions with related parties, in ACT Government controlled entities' financial statements.

Reference	Commentary – Note 38: Related Party Disclosures – Continued

	by 'Burley Griffin Agency' to a KMP will also need to be included here. Compensation to KMP must be disclosed regardless of the materiality of the amount to the financial stat Transactions with KMP and other related parties need to be disclosed only if they are material to the financial stat The April 2017 AASB Agenda Decision <i>Materiality of Key Management Personnel Related Party Transactions of</i> <i>Profit Public Sector Entities</i> provides guidance on the relevant materiality considerations. It is not expected that a will have material transactions with KMP. If they do, they should make the relevant disclosures in a similar formatiable in B.3.					

Shared Services Finance will be providing reports for compensation to KMP for agencies whose payroll is managed by them. These agencies still also need to consider any compensation to its KMP that may have been processed through the Accounts Payable module.

Reference	Commentary – Note 38: Related Party Disclosures – Continued
	Other Related Party Transactions
AASB 124.19	Disclosures required by AASB 124 paragraph 18 regarding the nature of the related party relationship as well as information about those transactions and outstanding balances, including commitments, necessary for users to understand the potential effect of the relationship shall be made separately for each of the following categories: (a) the parent; (b) entities with joint control of, or significant influence over, the entity;
	(c) subsidiaries;
	(d) associates;
	(e) joint ventures in which the entity is in a joint venture;
	(f) key management personnel of the entity or its parent; and
	(g) other related parties.
AASB 124.21	Disclosures under each of the above categories of related parties need to be separately identified by the type of transaction. The following are examples of transactions that are disclosed in the financial statements if they are with a related party:
	(a) purchases or sales of goods (finished or unfinished);
	(b) purchases or sales of property and other assets;
	(c) rendering or receiving of services;
	(d) leases;
	(e) transfers of research and development;(f) transfers under licence agreements;
	(g) transfers under finance arrangements (including loans and equity contributions in cash or in kind);
	(h) provision of guarantees or collateral;
	 (i) commitments to do something if a particular event occurs or does not occur in the future, including executory contracts (recognised and unrecognised); and
	(j) settlement of liabilities on behalf of the entity or by the entity on behalf of that related party.
	Agencies need to exercise judgement in assessing what information warrants disclosure.
	Items of a similar nature can be aggregated, except where separate disclosure is necessary for understanding the effects of related party transactions on the entity's financial statements.
AASB 124.27	In using judgement to determine the level of detail to be disclosed in accordance with the requirements in AASB 124 paragraph 26(b), the reporting entity must consider the closeness of the related party relationship and other factors relevant in establishing the level of significance of the transaction such as whether it is:
	(a) significant in terms of size;
	(b) carried out on non-market terms;
	(c) outside normal day-to-day business operations, such as the purchase and sale of businesses;
	(d) disclosed to regulatory or supervisory authorities;
	(e) reported to senior management; and(f) subject to shareholder approval (in this context Ministerial approval).
	Transactions conducted on normal terms and conditions with KMP and other related parties may or may not be material for inclusion in the note. However, if the terms and conditions of the transaction are different to those applying to the general public, the transaction is more likely to be included in the note regardless of the underlying transaction amount.
	Names of close family members and entities controlled (or jointly controlled) by the KMP or the KMP's close family members <u>are not to be disclosed</u> in the financial statements. Where, the information in the draft disclosure enables the KMP or their close family member(s) to be identified, the KMP and the affected family member must be given the opportunity to review the disclosure prepared for the financial statements and given the opportunity to request that the disclosure be corrected, amended or withdrawn.

Reference	Commentary – Note 38: Related Party Disclosures – Continued
	Other Related Party Transactions – Continued
	Not all information collected from KMP needs to be disclosed in the financial statements. Disclosure is not required where the transactions are not material to the financial statements. As a guide, the disclosure of transactions with othe related parties in the Example Note is based on the following information:
	Equipment purchased - \$xxx
	Separate disclosure of the individual transaction is made where it is significantly material to the financial statement or is unusual by nature.
	Services received - \$xxx
	Represents the aggregate value of a number of transactions that are individually material for the reporting entit but may not be sufficiently material (as in the previous example) or unusual in nature to require separate disclosure
	Territory Authority Commentary
	Territory authorities need to consider their enacting legislation and specific circumstances in assessing whether the relevant Portfolio Minister is a KMP. Considerations may include the existence of a governing board responsible for the management of the territory authority.
	NOTE 39 SERVICE CONCESSION ARRANGEMENTS
AASB 1059.28	Light Rail Service Concession Arrangement
	Background
	'Burley Griffin Agency' undertakes an annual review to assess whether there have been any changes to the existing service concession arrangement and whether there are any new Service Concession Arrangements. This review also involves contacting business units across 'Burley Griffin Agency' to obtain information about any new contracts, leasing agreements, Public Private Partnerships (PPPs), and other arrangements in order to make an assessment about whether any of these arrangements fall within the scope of AASB 1059. After this year's assessment 'Burley Griffin Agency' determined that there were no new Service Concession Arrangements and there were no changes to the one existing Service Concession Arrangement.
	On 25 May 2016 'Burley Griffin Agency' (grantor) entered into a 20-year Public Private Partnership (PPP) with 'Exampl Metro' (operator) to construct, deliver, maintain and operate light rail infrastructure assets, light rail plant an equipment, and light rail building assets over the term of the contract. These assets have been constructed on Territor land. The assets are made up of a 12km light rail track from Canberra City to Gungahlin, comprising 13 stops, 14 Ligh Rail Vehicles and one maintenance depot. Construction was completed and the light rail services commenced for publi passenger operations on 20 April 2019. There were no existing assets of the grantor or operator being utilised in this service concession arrangement.
	Under the terms of the arrangement 'Burley Griffin Agency' retains the significant residual interest in the assets at th end of the 20-year term.
	 'Example Metro' is responsible for the management, recruitment, training, and determining the adequate number of staff to run light rail operations. These staff ensure the timely delivery of public transport services to ACT residents are are all employed by 'Example Metro'. 'Example Metro' is solely responsible for all aspects of asset management activitie for light rail vehicles, tracks and electrical equipment. It is also required to manage, at its own discretion, all aspects or an operations control centre (OCC) on a continuous 24 hours per day, seven days a week basis. The OCC centrall manages the following functions: operations; power supply management;
	 communications, both internal and external; emergency Help Point response;
	 security and access control; emergency response and management; and system alarm monitoring and fault response.
	Over the life of the contract 'Burley Griffin Agency' has granted 'Example Metro' the right to charge third-party users of the light rail and will also have to make monthly service payments to 'Example Metro' when light rail fare revenue is below an agreed monthly amount. These amounts are split between the component related to the design an construction or upgrading of the assets and ongoing operation and maintenance of the assets. The future compensation payable is estimated based on projected population increases over the term of the contract.

payable is estimated based on projected population increases over the term of the contract.

Reference

NOTE 39 SERVICE CONCESSION ARRANGEMENTS – CONTINUED

Termination clauses

The Project Agreement (the Agreement) can be terminated under a number of scenarios. The three types of termination scenarios set out in the Agreement are summarised below:

- Termination for convenience 'Burley Griffin Agency' may terminate the Agreement at any time by giving no less than 60 business days' notice in writing to 'Example Metro'. 'Burley Griffin Agency' will be required to pay a termination for convenience payment. This amount is calculated as 'Example Metro's' outstanding project debt, plus the fair market value of 'Example Metro's' equity, plus any other reasonable costs incurred by 'Example Metro' as a result of the termination.
- Force Majeure Termination Event where the Agreement is terminated for force majeure (e.g. earthquake, bushfire, landslide), or the service concession arrangement project is wholly or substantially damaged or destroyed upon the occurrence of an uninsurable risk, 'Burley Griffin Agency' will pay 'Example Metro' the general termination event payment. This amount is calculated as 'Example Metro's' outstanding project debt plus any other reasonable costs incurred by 'Example Metro' as a result of the termination, less any insurance proceeds.
- Termination for 'Example Metro' default where the Project Agreement is terminated for 'Example Metro's' default, 'Burley Griffin Agency' will pay 'Example Metro the fair market value of the Project determined by an independent expert or as a result of a re-tender of the contract to the market. A default by 'Example Metro' under the Agreement will entitle 'Burley Griffin Agency' to various remedies. 'Burley Griffin Agency', in most circumstances, is required to give 'Example Metro' an opportunity to remedy the default. If the default is not remedied within the required period, then it will escalate to a Major Default. The Agreement also states that a number of events are automatically classified as a Major Default (e.g. when there are persistent breaches or frequent service failures). In respect of Major Defaults, 'Example Metro' will be given the opportunity to develop a plan to remedy the default (if the default is capable of being remedied) or a prevention plan to prevent the default from recurring (in circumstances where the default is not capable of remedy). Where 'Example Metro' fails to remedy the Major Default within the required period or fails to comply with an agreed remedy or prevention plan, 'Burley Griffin Agency' has the right to terminate the Agreement. Certain events of default are so severe that they are not subject to a remedy regime. They give rise to an 'Burley Griffin Agency' termination right immediately upon their occurrence (e.g. insolvency of 'Example Metro'). These events are called Default Termination Events.

AASB 1059.7,8 & 9 AASB 116.29

Accounting for the Service Concession Arrangement

AASB 1059 requires the application of a control-based approach to the recognition of assets. On initial recognition or reclassification, service concession assets are measured at current replacement cost. After initial recognition or reclassification, service concession assets are either measured at fair value (current replacement cost) using the fair value revaluation model or at cost using the cost model in accordance with AASB 116. 'Burley Griffin Agency' measures light rail infrastructure assets and light rail building assets at fair value (determined using current replacement cost) after initial recognition, whereas light rail plant and equipment is held at cost. The assets are depreciated on a straight-line basis over their useful lives, which are 30 years for light rail plant and equipment, and 50 years for light rail infrastructure assets.

AASB 1059.11 A service concession liability is recognised at the same time as recognising or reclassifying a service concession asset. The service concession liability is initially measured at the same amount as the asset, adjusted for any other consideration exchanged between 'Burley Griffin Agency' and the operator. Where an existing asset of 'Burley Griffin Agency' is reclassified as a service concession asset then 'Burley Griffin Agency' does not recognise a corresponding service concession liability for this asset, except in circumstances where additional consideration is provided for the asset by the operator. The service concession liability is initially recognised as a financial liability where 'Burley Griffin Agency' has a contractual obligation to make specified or determinable future payments to the operator for the construction, development, acquisition or upgrade of a service concession asset. However, the service concession liability is initially recognised as a service concession unearned revenue liability where the grantor grants the operator a right to charge third party users or a right to access another revenue-generating asset.

AASB 1059.24 & 25

Where a service concession arrangement involves both payments to the operator and a grant of a right to the operator (Hybrid Arrangement) then 'Burley Griffin Agency' recognises both a service concession financial liability and a service concession unearned revenue liability. In measuring both these liabilities under a hybrid model, the financial liability part is measured first, with the remainder of the total liability (i.e. amount of the service concession asset) allocated to the unearned revenue liability. The financial liability portion is calculated by discounting future payments using the contractually specified interest rate or otherwise a prevailing market rate for a similar instrument with a similar credit rating.

Subsequent to initial recognition or reclassification, the service concession financial liability accrues interest and is reduced when capital payments are made to the 'Example Metro'. The service concession unearned revenue liability is amortised as revenue on a straight-line basis over the remaining concession period.

NOTE 40. BUDGETARY REPORTING

Significant Accounting Judgements and Estimates – Budgetary Reporting

Significant judgements have been applied in determining what variances are considered 'major variances'. Variances are considered major if both of the following criteria are met:

- The line item is a significant line item: where either the line item actual amount accounts for more than 10% of the relevant associated actual category amount (Income, Expenses, Assets, Liabilities and Equity totals) or more than 10% of the sub-element (e.g. Current Liabilities and Receipts from Operating Activities totals) of the financial statements; and
- The variances (original budget to actual) are greater than plus (+) or minus (-) 10% and \$15 million for the financial statement line item. [Please See Commentary below for thresholds for Smaller Agencies.]

Original Budget refers to the amounts presented to the Legislative Assembly in the original budgeted financial statements in respect of the reporting period Budget Statements. These amounts have not been adjusted to reflect supplementary appropriation or appropriation instruments.

Note: #^ in the Line Item 'Variance %' column represents a variance that is greater than 999 per cent or less than -999 per cent.

Reference	Commentary – Note 40: Budgetary Reporting
ACT Disclosure Policy	AASB 1055 <i>Budgetary Reporting</i> sets out the budgetary reporting requirements for not-for-profit entities within the General Government Sector (GGS).
	Disclosures under AASB 1055 are intended to provide primary users with information relevant to assessing the financia performance of an agency. The main user is considered to be the Legislative Assembly.
	 When a directorate's or territory authority's budgeted financial statements are presented to the Legislative Assembly and are separately identified, that directorate or territory authority will need to disclose for the reporting period: the original budget figures as presented to the Legislative Assembly, in a form that is consistent with the agency's annual financial statements; and
	 explanations of major variances between actual amounts presented in the financial statements and the corresponding individual original budget amounts.
ACT Disclosure Policy	Budgetary reporting is required to be disclosed for territorial as well as controlled.
	Original Budget refers to the amounts presented to the Legislative Assembly in the original budgeted financial statements in respect of the reporting period (2022-23 Budget Statements). These amounts are not adjusted to reflect revised budgets, resulting from supplementary appropriations or administrative arrangements or other instruments authorised under the provisions of the <i>Financial Management Act 1996</i> . Explanations associated with revised budgets, particularly administrative arrangement changes, are to be reflected in the Management Discussion and Analysis, which provides a high level overview of the financial results of an entity and the factors underlying the development
ACT Disclosure Policy	performance and position of the entity's business during the reporting period. Under the provisions of AASB 1055, where the original budget is revised by a supplementary budget that is presented to the Legislative Assembly, the revised budget may be disclosed in the financial statements in addition to the origina budget and might need to be referred to in explanations of major variances. It is ACT Disclosure Policy that Agencies only include the original budget in its financial statements.
	The explanations of major variances required to be disclosed are those relevant to an assessment of the discharge of accountability and to an analysis of the performance of an entity, and should not merely focus on the numerica differences between original budget and actual amounts. They include the causes of major variances rather than merely the nature of the variances.
	Variances from comparative budget information in respect of the previous period need not be disclosed.
	Variances for the Statement of Changes in Equity do not have to be disclosed because these line items are also contained in other financial statements.
	Explanations of major variances at the Output Class level are not required.
	General Guide for Assessing Major Variances
	 As a general guide, variances are considered to be major variances if both of the following criteria are met: the line item is a significant line item: where either the line item actual amount accounts for <u>more than</u> 10% of the relevant associated actual category amount (Income, Expenses, Assets, Liabilities and Equity totals) or <u>more than</u> 10% of the sub-element (e.g. Current Liabilities and Receipts from Operating Activities totals) of the financia statements; and
	 the variances (original budget to actual) are greater than plus (+) or minus (-) 10% and \$500,000 of the budget for the financial statement line item for smaller agencies and greater than plus (+) or minus (-) 10% and \$15 million for large agencies. Small agencies include Office of the Legislative Assembly, ACT Auditor-General, Legal Aid Commission, Public Trustee and Guardian, Cultural Facilities Corporation, ACT Gambling and Racing Commission, Independent Competition and Regulatory Commission, Motor Accident Injuries Commission, ACT Electoral Commissioner, ACT Integrity Commission, ACT Executive, ACT Local Hospital Network, ACT Long Service Leave Authority, Building and Construction Industry Training Fund Authority, CIT Solutions Pty Ltd, Lifetime Care and Support Fund, and Office of the Work Health and Safety Commissioner.
	 Large agencies include Chief Minister, Treasury and Economic Development Directorate, Canberra Health Services, Transport Canberra and City Services Directorate, Housing ACT, Justice and Community Safety Directorate, Education Directorate, Community Services Directorate, Transport Canberra Operations, Environment, Planning and Sustainable Development Directorate, City Renewal Authority, Suburban Lance Agency, Health Directorate, Public Sector Workers Compensation Fund, Major Projects Canberra, ACT Insurance Authority, Canberra Institute of Technology, and Superannuation Provision Account.

Reference

Commentary – Note 40: Budgetary Reporting – Continued

These thresholds are indicative only and are included to assist agencies⁴ in making judgement on whether a variance explanation is required. Each agency will need to consider this guidance and Section 1.2 Materiality Guidance when determining appropriate thresholds for explanations of major variances to be disclosed in their financial statements.

Consultation with Audit Committee and the Audit Office

Agencies are encouraged to agree on their specific thresholds for disclosures with their Audit Committee and consult with the Audit Office in the process of preparing their financial statements.

Explanations are required for line items only. Explanations are not required for totals. If a line item is a category in its own right (e.g. only one line item in the category) then criteria (a) is not applicable and an explanation is required if criteria (b) is met. Examples of where a line item is a category in its own right are "Share of Operating Profit from Joint Venture" and "Cash and Cash Equivalents at the Beginning of the Reporting Period".

The associated category for the line item is the grouping in the financial statements where the line item appears. A grouping will usually start with a **bolded** heading and end with a **bolded** total.

The relevant bolded titles for these criteria are:

- **Operating Statement**
 - Income
 - Expenses
 - Other Comprehensive Income

Balance Sheet

- Current Assets
- Non-Current Assets
- Current Liabilities
- Non-Current Liabilities
- Equity

Statement of Changes in Equity

These line items are disclosed in other financial statements.

Statement of Cash Flows

- Receipts from Operating Activities
- Payments from Operating Activities
- Receipts from Investing Activities
- Payments from Investing Activities
- Receipts from Financing Activities
- Payments from Financing Activities

Not all the above **bolded** totals will be applicable to each agency.

Agencies should provide to the Audit Office a work paper calculating all the variances of the financial statements, supporting which items have been disclosed as major variances. Work papers will also be required supporting the variance explanations.

Territory Authority Commentary

AASB 1055 does not apply to for-profit agencies. However, it is ACT Disclosure Policy that for-profit territory authorities also adopt AASB 1055 for reporting purposes.

Reference	Commentary – Discontinuing Operations
AASB 5.32	Discontinuing operations are not expected to occur frequently within agencies, so no pro forma note has been included in the Model.
AASB 5.Aus 2.1	A discontinued operation is a component of an agency that either has been disposed of, or is classified as held for sale, and:
AASB 5.30	represents a separate major line of business;
	• is part of a single co-ordinated plan to dispose of a separate major line of business; or
	• is a subsidiary acquired exclusively with a view to resale.
	AASB 5 <i>Non-current Assets Held for Sale and Discontinued Operations</i> classifies an operation as a discontinued operation at the date when the operation meets the criteria to be classified as held for sale or when the entity has actually disposed of the operation.
	AASB 5 does not apply to the restructuring of administrative arrangements of Government agencies.
	AASB 5 requires the presentation and disclosure of information to allow evaluation of the effects of discontinued operations.
	Disclosures
AASB 5.33	 The details of discontinuing operations should be disclosed by way of a note and include: revenue, expenses and pre-tax profit or loss of discontinued operations;
	related income tax expense;
	• gain or loss recognised on the measurement to fair value less costs to sell;
	 net cash flows attributable to operating, investing and financing activities of discontinued operations; and the amount of income from continuing operations and from discontinued operations attributable to the parent, i.e. Example Agency.
AASB 101.82(ea)	The operating statement shall include a single amount for the total of discontinued operations.
	An agency shall re-present the above disclosures for prior periods presented in the financial statements so that the disclosures relate to all operations that have been discontinued by the reporting date for the latest period presented.
AASB 5.34	The classification of an operation as discontinued at the reporting date, is prohibited if it did not meet the classification criteria until after the reporting date.

Commentary – Content of Territorial Financial Statements

Presentation of Statements and Notes

It is not compulsory to have an index to the financial statements and notes to the financial statements, however, it is recommended as this helps users to quickly access a particular statement or note. Notes and the financial statements must be presented in a systematic manner and each item on a financial statement must be cross-referenced to any directly related information in the notes.

Page numbers are used in the Models for ease of reference. Agencies are not required to include page numbers in the table of contents due to the difficulty in knowing what page numbers the financial statement will have in the Annual Report.

The notes to the financial statements are to provide details of each class of income, expense, asset and liability. Each note should disclose all material line items within that class.

The above Statement of Income and Expenses on Behalf of the Territory is to be read in conjunction with the accompanying notes.

Refer to the Territorial Statement of Appropriation.

Commentary – Statement of Income and Expenses on Behalf of the Territory

With the exception of the Operating Result total line, if an agency does not have an amount against a line item it should not be included on the face of the Statement of Income and Expenses on Behalf of the Territory.

Agencies that have fair valued Territorial Property, Plant and Equipment may have an increase/(decrease) in the Asset Revaluation Surplus which means that Other Comprehensive Income and Total Comprehensive Income is included in the Statement of Income and Expenses on Behalf of the Territory.

Budget

The budget numbers appearing in the above statement are those published in the 2022-23 Budget Papers.

	Commentary – Statement of Changes in Ec	uity on B	ehalf of the T	erritory
	Agencies must include a Statement of Changes in Equity on Behalf amounts against the line items in this Statement. In this case just should be included.			

Agencies are free to combine, where possible, the Statement of Changes in Equity on Behalf of the Territory onto one page.

Agencies that have Territorial Property, Plant and Equipment at fair value may have an Asset Revaluation Surplus line and column to be included in the Statement of Changes in Equity on Behalf of the Territory.

Budget

The budget numbers appearing in the above statement are those published in the 2022-23 Budget Papers.

l l					

The above Statement of Cash Flows on Behalf of the Territory is to be read in conjunction with the accompanying notes.

Commentary – Statement of Cash Flows on Behalf of the Territory

Where agencies have investing and/or financing cash flows, details of these items must be disclosed in the Investing Activities and/or Financing Activities section within the Statement of Cash Flows on Behalf of the Territory. Where there are no Investing or Financing items:

- the Net Cash Inflows/(Outflows) from Investing Activities total line; and
- the Net Cash Inflows/(Outflows) from Financing Activities total line.

should still be disclosed as in the above example.

Budget

The budget numbers appearing in the above statement are those published in the 2022-23 Budget Papers.

'Burley Griffin Agency' Territorial Statement of Appropriation For the Year Ended 30 June 2023

Reference	Description and Material Accounting Policies relating to Payment for Expenses on Behalf of the Territory The Agency receives appropriation to fund a number of expenses incurred on behalf of the Territory, the main one being the payment of grants to various non-government organisations (See Note 44 <i>Grants and Purchased Services -</i> <i>Territorial</i>).					
	Payment for Expenses on behalf of the Territory is recognised when the Agency gains control over the funding which is normally obtained upon the receipt of cash, given they do not contain enforceable and sufficiently specific performance obligations as defined by AASB 15.					
	Original Total Appropriation Appropriation Budget Appropriated Drawn Drawn 2023 2023 2023 2022 \$'000 \$'000 \$'000 \$'000					
	Territorial Expenses on Behalf of the Territory Total Territorial Appropriation					
	The above Territorial Statement of Appropriation is to be read in conjunction with the accompanying notes.					
	Column Heading Explanations The <i>Original Budget</i> column shows the amounts that appear in the Statement of Cash Flows in the Budget Papers. This amount also appears in the Statement of Cash Flows.					
	The Total Appropriated column is inclusive of all appropriation variations occurring after the Original Budget.					
	The <i>Appropriation Drawn</i> is the total amount of appropriation received by the Agency during the year. These amounts appear in the Statement of Cash Flows on Behalf of the Territory.					
	Commentary – Territorial Statement of Appropriation					
FMA Section 8	An Appropriation Act must make separate appropriations in relation to each directorate for any payments to be made by the directorate on Behalf of the Territory (i.e. for territorial expenses).					
	Where an agency has a material difference between 'Total Appropriated' and 'Appropriation Drawn' it should explain why there is a variance. Further, it is recommended that agencies provide explanatory details of significant approved appropriation variations (i.e. variance between the 'Original Budget' and 'Total Appropriated'). A tabular presentation of the variance explanation similar to that shown in the Statement of Appropriation (Controlled Statements) should be used if it would assist understanding the reasons for the variance.					
	used in it would assist understanding the reasons for the variance.					
FMA Section 37A	If a directorate receives an amount of territorial appropriation (Payment for Expenses on Behalf of the Territory or a Capital Injection) that is excess to its requirements, it may repay the excess amount, or part of the excess amount, to the Territory Banking Account. The appropriation from which the excess was paid to the directorate is restored by the amount it repaid to the Territory Banking Account. The balance of the appropriation, including the amount repaid, may be applied for the purposes for which it was appropriated.					
FMA Section 37A	If a directorate receives an amount of territorial appropriation (Payment for Expenses on Behalf of the Territory or a Capital Injection) that is excess to its requirements, it may repay the excess amount, or part of the excess amount, to the Territory Banking Account. The appropriation from which the excess was paid to the directorate is restored by the amount it repaid to the Territory Banking Account. The balance of the appropriation, including the amount repaid, may be applied for the purposes for which it was appropriated. Agencies should disclose appropriation amounts returned (if any) in a footnote to the 'Appropriation Drawn' in the

The basis of preparation of 'Burley Griffin's Agency' are contained in Note 2 *Basis of Preparation of the Financial Statements* and apply to both the Controlled and Territorial financial statements.

Reference

NOTE 42. TAXES, LICENCES, FEES AND FINES – TERRITORIAL

Description and Material Accounting Policies Relating to Taxes, Licences, Fees and Fines - Territorial 'Burley Griffin Agency' collects taxes, licences, fees and fines on behalf of the Territory.

Motor Vehicle Registration Duty

Revenue from motor vehicle registration duty arises when a member of the public registers a new vehicle for the first time, transfers a vehicle's registration to another person or registers an imported second-hand vehicle for the first time. The amount of duty payable depends on the type of vehicle and its dutiable value being the higher of the purchase price and the market value of the vehicle. Revenue is recognised at the time of payment.

Drivers' Licence Revenue

Drivers' licence revenue relates to members of the public paying for a licence to operate or seek to operate a vehicle within the ACT. Licences can generally be obtained for either a 5 or 10 year period. Given each licence is less than the ACT low-transaction licence threshold of \$10,000, the drivers licence revenue is recognised upon issue of the licence rather than evenly over the term of the licence.

Fees for Regulatory Services

Fees for regulatory services relate to 'Burley Griffin Agency' collecting all fees and charges under the Work Safety Act. Fees are generally either recognised as revenue at the time of receipt or when the fee is incurred.

Traffic Fines and Parking Fines

Traffic fines and parking fines are issued upon an infringement event occurring and are recognised as revenue on the issue of the relevant infringement notice. However, the revenue recognised is adjusted for the expected disputes, which are estimated based on historical data. Historical data shows that there is approximately <5%> of fines that are successfully disputed. Where the fine attracts a penalty for late payment, the penalty amount is recognised as revenue on issue of the late payment notice.

Impact of COVID-19

Since the commencement of the COVID-19 pandemic 'Burley Griffin Agency' has lost a material amount of traffic fine and parking fine revenue. It is estimated that there was only 10% of pre COVID-19 levels of traffic on Canberra roads during the lock down introduced by the ACT Government during August 2021 to November 2021, in response to the Delta outbreak. Since Following the lockdown being lifted in November 2021 ended and with people have returninged to school and work, the amount of traffic has slowly recovered and is now estimated to be at 85% 75% of pre COVID-19 levels. However, given the continuation of flexible working arrangements post the pandemic, there is still a large number of people working partly or fully from home which has resulted in lower amounts of The reduction in traffic over the current financial year. This has resulted in lower traffic fines of approximately \$xxx million and lower parking fines of approximately \$xxx million when compared to pre-pandemic levels.

Reference	Commentary – Note 42: Taxes, Licences, Fees and Fines – Territorial
ACT Disclosure Policy	The break-up of Taxes, Licences, Fees and Fines shown here is an example only. As Taxes, Licences, Fees and Fines collected are generally unique to each agency, the break-up of this note disclosure will differ between agencies. Agence will need to disclose relevant line items of Taxes, Licences, Fees and Fines that apply to them. It is ACT Disclosure pot that all material line items within Taxes, Licences, Fees and Fines be separately disclosed in this note.
ACT Disclosure Policy	In addition, agencies should modify the length of the description and material accounting policies provided for early revenue type based on the materiality and complexity of that revenue type. That is, the more material and complex revenue type, the more detailed longer the description and accounting policy should be for that revenue type. The l material and complex the revenue type, the less detailed shorter the description and accounting policy should be that revenue type.
	Revenue from licences is accounted for under AASB 15 (see exemptions below), while income from taxes is account for under AASB 1058.
	AASB 15 contains guidance for application by not-for-profit public sector licensors including:
	 for non-contractual licences; distinguishing a licence from a tax;
	 clarifying the types of licences issued by not-for-profit public sector licensors;
	 clarifying the application of its principles to licences that are not within the scope of other Australian Account Standards; and
	 providing recognition exemptions for short-term licences (a term of 12 months or less) and licences issued for low transaction price (ACT Government agencies will apply a threshold of \$10,000 to determine whether a licen has a low-transaction price). In these cases, revenue is recognised either at the point in time the licence is issue or on a straight-line basis over the licence term or another systematic basis.
ASB 15.Aus8.3	AASB 16 states licences that are in substance leases or contain leases, except licences of intellectual property, fall wit the scope of AASB 16.

NOTE 47. RECEIVABLES AND CONTRACT ASSETS – TERRITORIAL

Description and Material Accounting Policies Relating to Receivables and Contract Assets - Territorial

'Burley Griffin Agency's' territorial receivables arise from the collection of fees and fines. Receivables relating to the fees are recognised when the fee is incurred and receivables relating to fines are recognised when the infringement notice is issued. These are generally due within <30> days after the fee is incurred or the notice is issued.

Expected Credit Impairment Loss – Fees and Fines Receivable

The allowance for expected credit losses represents the amount of fees and fines receivable the Agency estimates will not be repaid. The allowance for impairment losses is calculated using a lifetime expected credit loss provision matrix which is based on several categorisations of receivables. The calculation factors in objective evidence available to the agency and a review of overdue balances. The categorisations are based upon the demonstrated pattern of collections over the past <3> years adjusted for justifiable forward-looking information, including forecast economic changes expected to impact on receivables.

Impact of COVID 19

'Burley Griffin Agency's' Expected Credit Losses have increased reflecting changes in the ability of people to settle their debts.

NOTE 52. RESTRUCTURE OF ADMINISTRATIVE ARRANGEMENTS – TERRITORIAL – CONTINUED

Liabilities Payables Total Liabilities Transferred

Total Net Assets Transferred

NOTE 53. FINANCIAL INSTRUMENTS – TERRITORIAL

Material Accounting Policies Relating to Financial Instruments - Territorial

Details of the material accounting policies and methods adopted, including the criteria for recognition, the basis of measurement, and the basis on which income and expenses are recognised, with respect to each class of financial asset and financial liability are disclosed in the note to which they relate. In addition to these policies, the following are also accounting policies relating to financial assets and liabilities.

Financial assets are subsequently 'measured at amortised cost', 'fair value through other comprehensive income' or 'fair value through profit or loss' on the basis of both:

- (a) the business model for managing the financial assets; and
- (b) the contractual cash flow characteristics of the financial assets.

All territorial financial assets and financial liabilities are measured at amortised cost.

Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates.

The Agency currently has all of its financial assets and financial liabilities held in non-interest bearing arrangements. This means that the Agency is not exposed to any movements in interest rates, and as such does not have any interest rate risk.

Sensitivity Analysis

A sensitivity analysis has not been undertaken for the interest rate risk of the Agency as it is not exposed to any movements in interest rates.

Credit Risk

Credit risk is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss. The Agency's credit risk is limited to the amount of the financial assets held less any provision for losses. The Agency expects to collect all financial assets that are not past due or impaired. There is no collateral held as security for financial assets.

Liquidity Risk

Liquidity risk is the risk that the Agency will encounter difficulties in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. To limit its exposure to liquidity risk, the Agency ensures that, at any particular point in time, it has a sufficient amount of current financial assets to meet its current financial liabilities. Also, where necessary the Agency has the ability to request additional appropriation in order to meet its territorial payables. This ensures the Agency has enough liquidity to meet its emerging financial liabilities. See the maturity analysis below for further details of when financial liabilities mature.

The Agency's exposure to liquidity risk and the management of this risk has not changed since the previous reporting period.

Price Risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. The Agency is not exposed to any price risk.

Fair Value of Financial Assets and Liabilities

The carrying amount of territorial financial assets and territorial financial liabilities of 'Burley Griffin Agency' approximate their fair value.

Fair Value Hierarchy

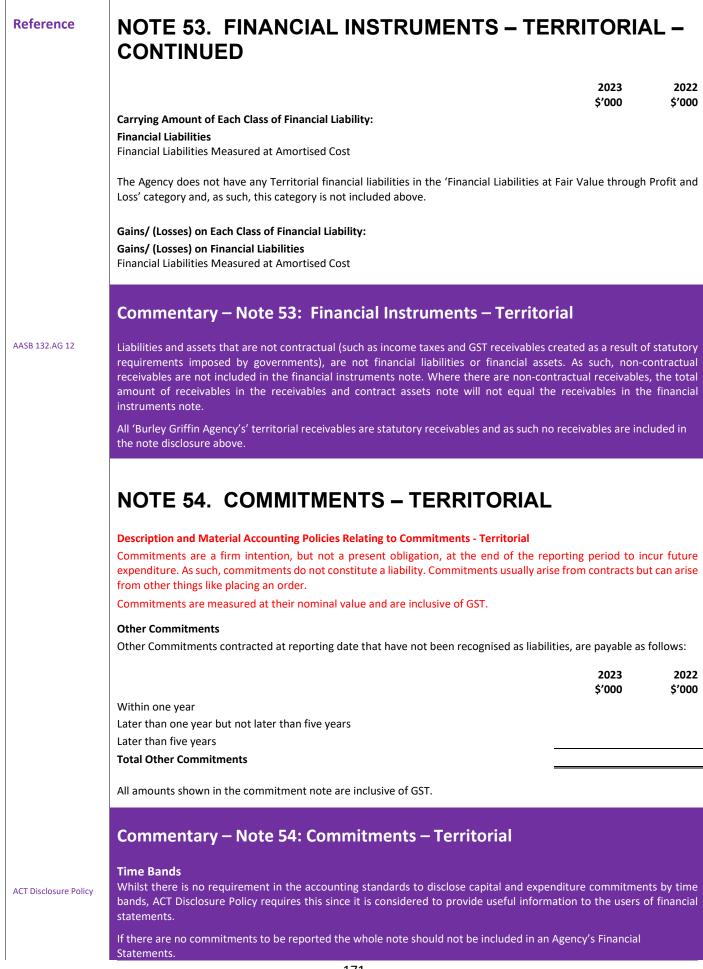

'Burley Griffin Agency' does not have any financial assets or financial liabilities on behalf of the Territory at fair value. As such no Fair Value Hierarchy disclosures have been made.

Reference NOTE 53. FINANCIAL INSTRUMENTS – TERRITORIAL – CONTINUED

AASB 7.34(a) & 39(a) & ACT Disclosure Policy

The following tables set out the Agency's maturity analysis for financial liabilities as well as the exposure to interest rates, including the weighted average interest rates by maturity period as at 30 June 2023 and as at 30 June 2022. All financial liabilities which are non-interest bearing will mature in 1 year or less. All amounts appearing in the following maturity analysis are shown on an undiscounted cash flow basis.

					Fixed Interest Maturing in:

NOTE 55. CONTINGENT LIABILITIES AND CONTINGENT ASSETS – TERRITORIAL

Material Accounting Policies Relating to Contingent Liabilities and Contingent Assets – Territorial

Contingent liabilities and contingent assets are not recognised in the Statement of Assets and Liabilities on Behalf of the Territory due to the uncertainty regarding any possible amount or timing of any underlying claim or obligation. Instead they are disclosed and, if quantifiable, the best estimate is disclosed.

Legal Claims

As at 30 June 2023 there were 74 outstanding legal claims against 'Burley Griffin Agency' involving members of the public disputing traffic and parking fines that they had been issued in the financial year. The disputes were made on the basis that the recipient either did not believe they committed the offence or they are not liable for the offence. 'Burley Griffin Agency' is potentially liable for \$xxx (2022 \$xxx).

NOTE 56. EVENTS AFTER THE REPORTING PERIOD – TERRITORIAL

AASB 110 21(a)

AASB 110.21(b)

Administrative Arrangement After the Reporting Period

On 1 July 2023, the Executive approved an administrative arrangement that involved restructuring the Agency by moving its land and planning division to 'Receiving Directorate'. The movement of the land and planning division was undertaken because the function was more closely aligned with the existing functions of 'Receiving Directorate'. The financial effect of the administrative arrangement is not reflected in the financial statements.

The total value of net assets transferred between the Agency and 'Receiving Directorate' after the reporting period was \$xxx.

NOTE 57. RELATED PARTY DISCLOSURES – TERRITORIAL

Refer to Note 38 Related Party Disclosures for disclosures relating to related parties of 'Burley Griffin Agency'.

NOTE 58. BUDGETARY REPORTING - TERRITORIAL

Significant Accounting Judgements and Estimates – Budgetary Reporting – Territorial

Significant judgements have been applied in determining what variances are considered 'major variances'. Variances are considered major if both of the following criteria are met:

- The line item is a significant line item: where either the line item actual amount accounts for more than 10% of the relevant associated actual category amount (Income, Expenses, Assets, Liabilities and Equity totals) or more than 10% of the sub-element (e.g. Current Liabilities and Receipts from Operating Activities totals) of the financial statements; and
- The variances (original budget to actual) are greater than plus (+) or minus (-) 10% and \$15 million for the financial statement line item. [Please See Commentary in Note 4039 for thresholds for Small Agencies.]

Original Budget refers to the amounts presented to the Legislative Assembly in the original budgeted financial statements in respect of the reporting period Budget Statements. These amounts have not been adjusted to reflect supplementary appropriation or appropriation instruments.

Note: #^ in the Line Item Variance % column represents a variance that is greater than 999 per cent or less than -999 per cent.
