FOREWORD

The Reader's Guide (the Guide) to the Budget Papers has been prepared to explain the structure and content of the Budget Papers, and to assist readers in understanding and interpreting information contained in the chapters.

The Annual Budget is the Government's key policy statement and financial plan for the upcoming financial year and forward estimates period for the Territory and the territory entities.

The Budget Papers are presented on an accrual accounting basis. Accrual accounting discloses the full cost of providing government services and indicates the ability of government to deliver services into the future.

The Budget Papers are separated into the following four main parts:

- Budget Paper No. 1: Speech;
- Budget Paper No. 2: Budget in Brief;
- Budget Paper No. 3: Budget Outlook; and
- Budget Statements.

This Guide provides a brief explanation of the Budget Papers and their intended purpose. A glossary of terms frequently used in this document and in Budget Papers is available in the Appendix.

OVERVIEW OF THE BUDGET PAPERS

Budget Paper No. 1: Speech

The Budget Speech is delivered by the Treasurer to the Legislative Assembly and highlights the Government's Budget strategies and key features of the Budget.

Budget Paper No. 2: Budget in Brief

This Budget Paper presents a summary of the overall budgetary position together with information on the Government's expenditure and investment priorities in key service delivery areas.

Budget Paper No. 3: Budget Outlook

This Budget Paper summarises the budget and forward estimates for the General Government Sector, the Public Trading Enterprises Sector and the Total Territory Government. Details of the projected Budget results are provided, as well as background information on the development of the Budget, including economic conditions and federal financial relations.

It also provides details of new policy initiatives made by the Government for the Budget year, as well as an overview of the Territory's Infrastructure Investment Program.

Budget Statements

The Budget Statements contain information on each directorate and agency, including descriptions of functions, and roles and responsibilities, together with major strategic priorities.

All of the Budget Papers are prepared in accordance with the principles of the standards issued by the Australian Accounting Standards Board, including the application of accrual based accounting. Accrual accounting presents the full cost of providing government services and indicates the ability of the Government to deliver sustainable services into the future.

Additional detail regarding the new structure of the Budget Statements and changes to the production of Statements of Intent may be found in the *Budget Statements* section of this document.

BUDGET PAPER NO. 3

Content of Budget Paper No. 3

Budget Paper No. 3 summarises the Budget and forward estimates for the General Government Sector, the Public Trading Enterprise Sector and the Total Territory Government. Details of the projected Budget results and financial position are provided, as is background information on the development of the Budget.

Budget Paper No. 3 also contains information relating to the economic position and outlook of the Territory, fiscal projections, provides detail on the expense, capital and revenue initiatives introduced in the Budget, and developments in key areas of reform. The Paper also includes an overview of the Territory's Infrastructure Investment Program and details of the Capital Works Program for the Budget year.

Budget Paper No. 3 contains the following chapters:

Economic Performance, Outlook and Strategy

Provides an overview of the expected economic conditions and outlook for the Territory.

Fiscal Strategy

Details the context within which the Budget has been formulated and provides an overview of the Budget. This chapter also summarises the Government's financial objectives and key measures and outlines how the Government proposes to meet those objectives in the context of the Budget.

Provides details of the projected Budget and financial results. Summaries are provided on prior year Budget movements along with identifying the major risks faced by the Territory in the upcoming Budget year.

New Initiatives

Provides details of new initiatives included in the 2016-17 Budget.

Expenses

Provides details of the General Government Sector expenses for the upcoming financial year and factors impacting the expenses and the forward estimates. This chapter also includes a brief commentary on the savings contained in the 2016-17 Budget.

Infrastructure and Capital

Provides an overview of the Territory's Infrastructure Investment Program as well as land supply and the land release program. It also includes information about the Territory's infrastructure and the capital works program.

Revenue

Provides details of the General Government Sector revenues for the upcoming financial year and factors impacting the expenses and the forward estimates. It also includes information on the Territory's taxation reforms.

Federal Financial Relations

Details are provided in relation to federal financial relations and the estimated amounts the Territory can expect to receive from the Commonwealth Government in the Budget year and forward estimates period.

Asset and Liability Management

Provides information on the material components of the Territory's Balance Sheet including net debt and net financial liabilities, superannuation and management of financial assets and liabilities.

General Government Sector Harmonised Financial Statements

Provides full financial statements for the General Government Sector.

Appendices

The appendices include information in relation to: ACT Government structure; Asbestos Eradication Scheme; budget consultation; various capital works tables; consolidated financial statements for Public Trading Enterprises and Total Territory; a history of key budget aggregates; the statement of risks; the statement of sensitivity of budget estimates; a summary and terms of debt capital injection; summary of outputs; summary of transfers; and whole of government staffing.

BUDGET STATEMENTS

Budget Statement Presentation

The Budget Statements will be presented in eight 'portfolio' booklets, consistent with the following table:

Booklet	Contents
Group A	ACT Executive Auditor-General Electoral Commissioner Office of the Legislative Assembly
Group B	Chief Minister, Treasury and Economic Development Directorate ACT Compulsory Third-Party Insurance Regulator ACT Gambling and Racing Commission ACT Insurance Authority Canberra Institute of Technology (CIT) CIT Solutions Pty Ltd Cultural Facilities Corporation Icon Water Limited Independent Competition and Regulatory Commission Land Development Agency Lifetime Care and Support Fund Superannuation Provision Account Territory Banking Account
Group C	Health Directorate ACT Local Hospital Network
Group D	Justice and Community Safety Directorate Legal Aid ACT Public Trustee and Guardian for the ACT
Group E	Environment and Planning Directorate
Group F	Education Directorate
Group G	Community Services Directorate Housing ACT
Group H	Transport Canberra and City Services ACTION ACT Public Cemeteries Authority

Budget Statement Sections

The *Financial Management Amendment Act 2015* (the Amendment Act) was passed on 30 September 2015, giving rise to a number of changes to the presentation of Budget Statements and Statements of Intent (SOIs). These modifications aim to streamline and improve Budget Paper clarity, including removing instances of duplication between documents. Additional detail regarding the changes can be found in the Explanatory Statement which accompanied the *Financial Management Amendment Bill 2015*, located at http://www.legislation.act.gov.au/es/db_51820/default.asp.

Broadly, the amended sections of the FMA with a bearing on Budget Statement/Statement of Intent production were:

- section 12A: *Territory authority and Territory-owned corporation budgets*;
- section 61: *Territory authority statements of intent*; and
- section 62: *Presentation of statements of intent*.

Section 12A has been split into separate sections for territory authorities and territory-owned corporations, as follows:

- the section relevant to territory authorities refers to section 61 associated with the SOI for territory authorities; and
- the section relevant to territory-owned corporations includes all of the existing provisions of section 12A.

Provisions relevant to territory authorities in section 12A have been included in section 61 to ensure all the information requirements of both the existing sections 12A and 61 are included in the amended section 61.

Section 62 (tabling SOIs) has been amended such that it only applies to territory authorities that are not consolidated into the whole of government budget, and as such are not presented as part of the Budget Papers.

In light of these changes, only two territory entities are required to produce 'standalone' SOI documents: the Long Service Leave Authority; and the Building and Construction Industry Training Fund Authority. For all other Authorities which produce Statements of Intent, their SOIs may be found in one of the eight portfolio booklets as per the prior table.

Budget Statement Structure

The following is intended to provide a brief summary of the information that may be found in the various Budget Statement sections.

Purpose

This section provides a brief overview of a territory entity's key service delivery responsibilities, intentions for the coming year and long-term goals for the territory entity.

Priorities for the Year

This section provides a brief overview of key strategies and operational priorities for the upcoming financial year for the territory entity. It takes into account any new initiatives and capital investment.

Estimated Employment Levels

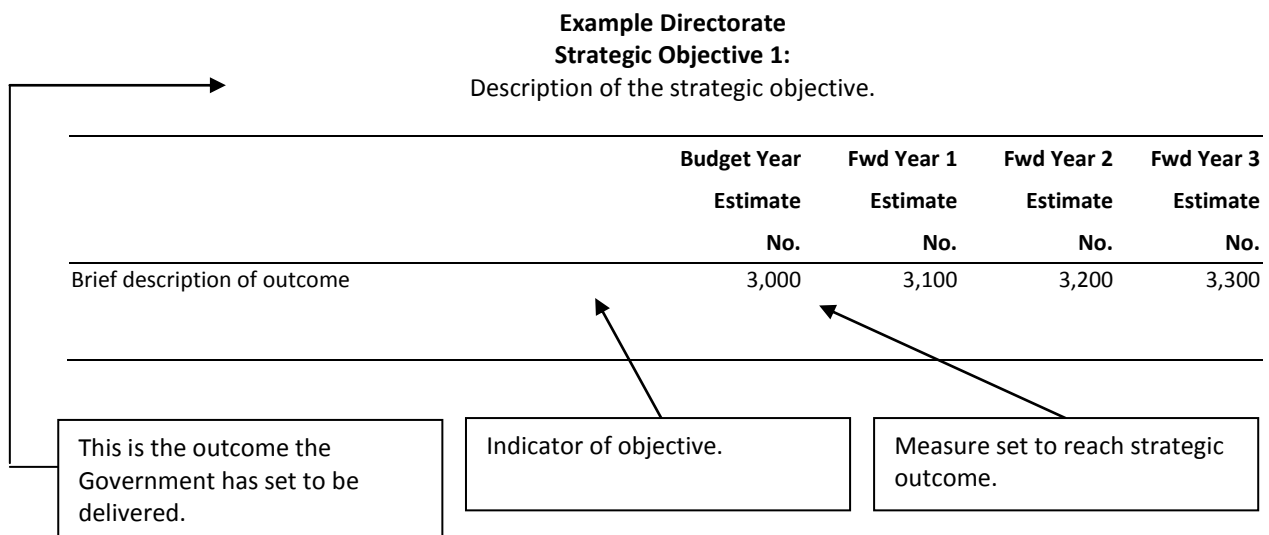

This section provides territory entity projected staffing numbers for the upcoming financial year, with the prior year budgeted numbers and estimated outcome for the current financial year for the territory entity. Employment levels are represented in terms of full-time equivalent numbers which is a measure of labour resources employed in the delivery of services to the community.

Strategic Objectives and Indicators

Strategic objectives and indicators are part of a territory entity’s performance information framework. They contribute to measuring the territory entity’s (and through it, the Government’s) performance against longer-term strategic objectives and outcomes which impact upon the community. Territory entities are accountable for performance against these indicators, although it is acknowledged that there may be external factors that can influence the achievement of particular targets. Strategic objectives and indicators are not subject to audit.

Provided below is a generic example of a strategic indicator. The example is not intended to align exactly with the actual indicators presented in the Budget Statements, and is for illustration purposes only.

Example 1

Outputs and Output Classes

Outputs are defined as identifiable goods and services delivered by a territory entity for the benefit of the community. The Government measures the cost of providing goods and/or services to the community in order to achieve policy objectives or outcomes. Outputs are grouped together into similar categories called output classes.

This section identifies and describes the outputs provided by the territory entity and provides the cost of the outputs compared to the appropriations received by the territory entity in relation to the output class. Example 2 provides an example of an output class by territory entity. Territory entities may have more than one output class.

Example 2

Output Class 1: enter name here

Table 1: Output Class 1: enter name

	2015-16 Est. Outcome \$'000	2016-17 Budget \$'000
Total Cost¹		
Controlled Recurrent Payments		

This is the name of an output class within the territory entity portfolio.

This is the Output delivered by the territory entity within the output class.

This is the estimate of the final outcome at the end of the current financial year.

This item reflects the cost of outputs within an output class. (This amount can be greater than the Government payment where the territory entity provides some of its own funding or the output is provided on a full or part cost recovery basis).

This item reflects the amount of funding for the output class.

Output Descriptions

Output Descriptions are also provided in the Budget Statements to provide readers with more information in relation to the outputs and services provided by the territory entity.

Accountability Indicators

Accountability indicators form another part of a territory entity's performance information framework. They are designed to help measure a territory entity's success in delivering its outputs (goods and/or services). Accountability indicators correspond to territory entity output classes and specified outputs. They often take the form of a target level of achievement against an indicator (as per Example 3 below). Territory entities are audited on their achievement against their accountability indicators.

Example 3

indicators.

Changes to Appropriations

Appropriation is the maximum amount of public money authorised by the ACT Legislative Assembly under a legislative authority for transfer from the Territory Banking Account (TBA) to a directorate, territory authority or a territory-owned corporation.

The 'Changes to Appropriation' table itemises a territory entity's appropriation made in the prior year's budget and the current budget year. The changes include Supplementary Appropriations, parameter and technical variations, and new policy adjustments. The changes to appropriations are shown for both Controlled and Territorial appropriations for each territory entity, for each appropriation type, as below:

Controlled Recurrent Payment from Government: The appropriated revenue that territory entities receive for the delivery of goods and services.

Payments for Expenses on Behalf of the Territory (EBT): Territorial (administered) revenues, which the Government appropriates to territory entities for the payment of grants, subsidies and transfer payments (refer Territorial).

Capital Injections: The means by which the Government injects funds into a territory entity for purposes such as the purchase or development of assets, the payment of debt, or the increase of a territory entity's working capital. On occasion capital injections may be repayable, in which case the terms of these loans are outlined in the Budget Papers.

KEY FINANCIAL CONCEPTS UNDERLYING THE BUDGET PAPERS

The 2015-16 Estimated Outcome

The 2015-16 estimated outcome figures have been updated to include the effect of the 2014-15 audited outcome and other impacts identified during the preparation of the Budget.

Sector Split

The Government Finance Statistics (GFS) sector classification is used for the presentation of consolidated financial statements. Consolidated statements are provided for the General Government Sector (GGS) and Public Trading Enterprise (PTE) Sector. A Total Territory consideration of the 2016-17 Budget is also included. Definitions of these sectors can be found in the Glossary.

Accrual Concepts

All budget estimates are calculated on an accrual basis. Amounts have been prepared in line with the principles of the standards issued by the Australian Accounting Standards Board (AASB) which applied from 1 July 2014.

In order to match transactions to a particular period, accruals are used to account for differences in timing between business or operational transactions and the associated cash flow. It is the inclusion of these non-cash items that differentiates the Operating Statement from the Cash Flow Statement.

The difference between income (in the Operating Statement) and cash receipts (in the Cash Flow Statement) is explained by the inclusion of income amounts which have been earned but not yet received. Further, accrued income excludes any amounts that have been collected in the current year but were earned in the previous year. Income includes non-cash transactions that have an impact on the Balance Sheet, such as an increase in the value of an asset following a revaluation.

Accrued expenses (in the Operating Statement) differ from cash payments (in the Cash Flow Statement) due to the inclusion of items such as employee benefits, which are recognised as expenses in the current period, but represent an obligation to pay cash in a future period. Another difference arises through the inclusion (in accrued expenses) of purchases made, or obligations incurred, where the associated bill/invoice will not be paid during the current year. Further, accrued expenses exclude payments which relate to purchases or obligations incurred in the previous year, although the cash payments may be paid in the current year. Similar to income, expenses include non-cash transactions, such as revaluations, and the recognition of depreciation against certain assets.

Controlled/Territorial Separation of Disclosure

A key feature of the accrual model used by the Territory is the separation of Controlled activities from Territorial activities. Each territory entity's budget distinguishes between these in its financial statement.

Controlled activities are those related to the delivery of agreed outputs of directorates and other territory entities for which there is agreed funding by the appropriation type 'controlled recurrent payment'. By separately reporting on these items from other activities, the performance of the directorate/territory entity in delivering the agreed outputs can be seen.

Territorial activities are the other activities of directorates, which are administered on behalf of the Territory, including administering Commonwealth Government grants and the collection of taxes, fees and fines for the Territory. Controlled and Territorial activities are separately appropriated.

The split of Controlled and Territorial activities allows for accountability and performance analysis to be more accurate and meaningful. Territorial payments and revenues are typically determined by Government, and payment or assessment processing is handled by the relevant directorate. The amounts of payments or revenues may vary significantly without reflecting on operational performance of the directorate.

The separate recording of these Territorial items allows readers to focus on the expenses, revenues, assets and liabilities involved in the delivery of outputs to establish the effectiveness of directorates' performance in the delivery of outcomes. Directors-General have a direct role in the level of resources applied to, and costs incurred in, delivering outputs. Similarly, they have greater control over the level of charges applying to consumers of the outputs.

Bank Accounts

Territory entities operate their own bank accounts and are paid on a progressive basis in accordance with the delivery of their outputs. By contrast, revenue collected on behalf of the Territory (RBT) by territory entities is transferred to the Territory Banking Account (TBA) on a regular basis.

The 2016-17 Budget was developed using the same arrangements applying to cash management practices as in previous budgets. A key aspect of the arrangements is the requirement for directorates to return cash surplus to their needs back to Government. As directorates no longer hold surplus cash, directorates will generally not have a need to invest surplus funds with the TBA. The changed cash management arrangements do not impact the cash operations for Territory authorities or Territory-Owned Corporations (TOCs).

In relation to the ACT Local Health Network (LHN), under the National Health Reform Agreement (NHRA), the Commonwealth Government will contribute 45 per cent of growth funding for public hospital expenditure for all States and Territories based on an Activity Based Funding (ABF) mechanism. Consistent with the NHRA, the ACT LHN will maintain two bank accounts to receive funding, a State Pool Account held at the Reserve Bank of Australia (RBA) and a State Managed Fund Account (SMFA).

The ACT LHN will 'purchase' services from the four public hospitals and manage the State Pool Account and the SMFA to collect payments from the Commonwealth, the ACT and other jurisdictions. The ACT LHN will control both bank accounts to minimise the number of funding transfers between the ACT LHN and the Health Directorate.

Central Finances of the Government

The central finances of the Government are managed through a separate whole of government bank account, namely the TBA, which is administered and reported as a Territorial activity.

Outputs Basis of Budget Management

There is an explicit linkage between the outcomes desired by Government and the outputs chosen to achieve those outcomes at an agreed level of funding. The budget structure and monitoring that occurs throughout the financial year targets the delivery of outputs against an agreed level of funding.

Appropriation Types

Section 8 of the *Financial Management Act 1996* establishes three types of appropriation.

Controlled recurrent payments

Controlled recurrent payments are shown as revenue to a territory entity. It represents the level of funding provided by Government to a territory entity to enable it to deliver a range of goods and services.

The full cost of providing a service may be financed partly by sales to third parties defined as 'user charge' revenues. Generally, where a service is provided to other territory entities, those territory entities show the receipt of that service as an input cost to their own output(s) and pay for that service with funds generated from their 'controlled recurrent payment' or 'user charge' revenues.

Capital Injections

Capital injections are used to increase the capital base of a territory entity, and may be used to:

- purchase assets;
- develop assets;
- augment assets; or
- reduce liabilities.

Capital injections are issued as either equity injections or repayable loans. The latter are effectively a working capital advance which must be repaid. The Budget Papers must disclose any repayable capital injections and the conditions under which the injection is given (for example repayment timeframes, interest rate principal and interest repayments). All repayable injections are reflected in the relevant territory entity as a liability, while the TBA discloses them as a loans receivable.

Expenses on Behalf of the Territory (EBT)

This category represents Territorial (administered) expenses, which the Government appropriates for payment of grants, subsidies and transfer payments.

Capital Works

In terms of budgeting, the capital works or asset acquisition program can be funded in a number of ways. Initially, a territory entity seeking to increase its physical asset base should examine its internal funding capability, then alternative funding sources such as debt, capital injection or public private partnerships. Capital works activities may also include the planning of future capital works, such as feasibility studies, which may be funded through controlled recurrent payments.

Capital works proposals are examined for their projected contribution to the Government's desired outcomes and to the delivery of outputs. A whole of life projection is required for the impact on the directorate operating results and balance sheet position.

FORMAT OF THE TERRITORY'S BUDGET FINANCIAL STATEMENTS

The Territory's financial interest is reflected in the consolidated budget and consolidated financial statements of all directorates, Territory authorities and Territory-Owned Corporations.

Normal accrual accounting principles apply to the consolidation of the individual territory entity budgets into the Total Territory statements. Internal trading transactions between components of the whole of Territory are eliminated during the consolidation process, as are the internal trading transactions between trading elements within a directorate or with another entity within Government.

Eliminations of internal trading are necessary in order to accurately reflect the interaction between each budget or reporting entity and other external entities. Failure to eliminate these transactions results in double counting, resulting in an inflated level of activity of the entity in relation to other external entities. On the Balance Sheet, failure to eliminate internal trading will result in an incorrect level of payables, receivables, investments and borrowings. This includes, for instance, the level of debt owed by the Territory. Internal debt created by one territory entity lending to another within the Territory is offset by an internal receivable and has no impact on Total Territory debt.

The Total Territory consolidation is split between the GGS and PTEs. The appropriate eliminations are also made in reporting these sectors, firstly within the sector (that is intra-GGS and intra-PTE eliminations) and secondly between the two sectors (that is between the GGS and PTE sectors).

Financial Statement Presentation

The format of the Territory's financial statements is different from territory entity financial statements. The Territory's whole of government format aligns financial reporting with the Government Finance Statistics format used in the Uniform Presentation Framework (UPF). This format is considered to be a more suitable presentation for whole of government financial reporting, more informative for readers and more readily facilitates comparison with other jurisdictions.

The key differences between whole of government financial statements and territory entity statements include:

- The whole of government Operating Statement classifies transactions as either revenue, expenses or other economic flows.
 - Revenue and expenses result from mutually agreed transactions between two parties.
 - Other economic flows result from changes in the volume or value of assets or liabilities resulting from revaluations, net gains on the sale of assets or liabilities and non-mutual bad debts written off.

- The UPF Net Operating Balance is a GFS concept that is calculated as the difference between revenue and expenses resulting from transactions. This is a good indicator of the underlying reality of a government's financial performance. The measure recognises that operating budgets cannot be sustained indefinitely by asset sales and unexpected investment windfalls.
- The Headline Net Operating Balance is the UPF Net Operating Balance plus expected long term superannuation investment earnings. The measure takes into account the full impact of the long term expected earnings on assets dedicated to fund and support the accruing costs associated with servicing the Government's long term defined superannuation obligations. Superannuation expenses will be paid over the next forty to sixty years. The Government's superannuation investments held in the Superannuation Provision Account (SPA) are to fund these future cash payments. The inclusion of the full amount of the long term investment earnings is necessary to provide an accurate assessment of the longer term sustainability of the budget position.
- The Operating Result recognises the change in a government's net worth as a result of both transactions and other economic flows, excluding those reflected directly in equity.
 - For the Territory, the key differences between the UPF Net Operating Balance and the Operating Result are significant land sales, net gains on the sale of non-financial assets and net gains on financial assets held to fund future superannuation payments.
- The Total Comprehensive Income serves as a measure of the total change in value of the territory entity during a financial year arising from revenue, expenses and both realised and unrealised movements in the valuation of assets and liabilities. Total Comprehensive Income is the equivalent to the increase or decrease in Net Assets during the financial year.
- The Net Lending/(Borrowing) position represents the financing requirement of government, calculated as the net operating balance less the net acquisition of non-financial assets. It also equals transactions in financial assets less transactions in liabilities. A positive result reflects a net lending position and a negative result reflects a net borrowing position.
- The whole of government Balance Sheet is presented on a liquidity basis rather than the more traditional current/non-current classifications.

Key Accounting Treatments by Schedule

Operating Statement

The items appearing on this statement are only controlled items. Controlled items are those associated with the delivery of outputs and transacted through territory entity operating bank accounts.

Interpreting the projected Operating Result:

- Some territory entities budget for an operating deficit, while others project a surplus or break-even position. A deficit result is mostly attributable to the impact of depreciation resulting from the process used for funding capital works. Funding of capital works is generally centrally managed within the Territory. Funding for new capital works is generally provided by the Government to territory entities as a capital injection in the year of acquisition of the new assets.
- Depreciation is the accounting process for allocating the cost of asset usage over the useful life of the assets. Generally, agencies are fully funded for the acquisition of assets at the time of acquiring the assets, thus further funding for depreciation is not provided. At the end of the useful life for assets, the Government will make decisions regarding the future asset needs of the territory entity and the Territory.
- As a result of territory entities not receiving recurrent funding for depreciation, the operating result for some agencies will be a deficit. Consequently, each territory entity's actual performance must be assessed against its projected performance, not against whether it achieved a breakeven or surplus result.

Balance Sheet

The items appearing on this statement are only those associated with the delivery of outputs by the territory entity and summarise the balances of controlled assets and liabilities estimated at the end of the financial year of the territory entity. Trust monies and Territorial (administered) items are excluded.

Statement of Changes in Equity

The items included in the Statement of Changes in Equity are only associated with the delivery of outputs by the territory entity and are therefore controlled by the territory entity. The types of changes in equity include movements in capital injections and distributions, and increases or decreases in net assets due to administrative restructures.

Cash Flow Statement

The items appearing on this statement are only those associated with the delivery of outputs by the territory entity. Trust monies and Territorial (administered) items are excluded.

This statement provides a view of the operations of a territory entity from a cash flow perspective. Items appearing on this statement disclose the cash flow effect of the activities appearing on the other two main statements.

Statement of Income and Expenses on Behalf of the Territory

Expenses on this statement are those which are administered on behalf of the Territory and over which a territory entity has no discretion in applying them to an alternative use. Income such as taxes, fees and fines are required to be transferred to the TBA. The directorate has no discretion over the use of territorial income collected.

Income includes amounts received from Government to pay for Territorial expenses. The income amounts transferred to the TBA are shown as transfer expenses in this statement.

Statement of Assets and Liabilities on Behalf of the Territory

This statement discloses those assets and liabilities which are administered by the territory entity on behalf of the Territory and over which the territory entity has limited discretion regarding resource deployment or alternative use.

Statement of Changes in Equity on Behalf of the Territory

The items included in the Statement of Changes in Equity on Behalf of the Territory are not associated with the delivery of outputs by the directorate and instead are administered by the directorate on behalf of the Territory. The types of changes in equity include movements in capital injection and distribution, and increases or decreases in net assets due to administrative restructures.

Statement of Cash Flows on Behalf of the Territory

This statement discloses those cash flows which are administered by the territory entity on behalf of the Territory. This reflects the total cash flows, including the transfers between the TBA and the territory entity operated bank account, for RBT and EBT.

2015-16 Comparative Figures

The projected 2015-16 results for territory entities are presented in the Budget Papers on the same basis as they will appear in the 2015-16 financial statements, which is consistent with Generally Accepted Accounting Principles (GAAP) and the AASBs.

Subsections 27(2) and 63(2) of the *Financial Management Act 1996* require the preparation of financial statements for territory entities to be in accordance with GAAP and for their presentation to facilitate comparison with the Budget presentation.

Where transfers of responsibilities have occurred during the 2015-16 financial year, the relevant territory entities reflect the impact of those transfers from the time of transfer and these are explained in variation notes in the Budget Papers where they are material.

Rounding

Due to the rounding of decimal places, the sum of the figures in the financial tables presented in the Budget Papers may not balance.

Notations

The following notations are used in the variation column of the territory entity financial tables:

- nil;
- .. not zero, but rounds to zero; and
- # the calculated variation is greater than 999%.

DETAILED FINANCIAL STATEMENT ANALYSIS

Financial information presented in the Budget Papers and Budget Statements for each territory entity is prepared in accordance with the principles contained in Australian Accounting Standards. Territory entity financial statements include forward estimate information to provide readers with a longer term focus on the territory entity's financial performance and financial position.

Controlled and Territorial (administered) activities are presented in separate schedules. Each territory entity provides (where appropriate) an:

- Operating Statement;
- Balance Sheet;
- Statement of Changes in Equity;
- Cash Flow Statement;
- Statement of Income and Expenses on Behalf of the Territory;
- Statement of Assets and Liabilities on Behalf of the Territory;
- Statement of Changes in Equity on Behalf of the Territory;
- Budgeted Statement of Cash Flows on Behalf of the Territory; and
- Notes to the Budget Statements.

Where there is more than one Output Class for the territory entity, the following is provided (where applicable):

- Operating Statement; and
- Notes to the Output Class Statements.

The Notes to the Budget Statements provide explanations for material variations between the estimated outcome and the original budget. Variation explanations are provided for all statements with the exception of the Cash Flow Statement and the Budgeted Statement of Cash Flows on Behalf of the Territory.

Illustrative examples and explanations of the financial statements follow.

Operating Statement

The Operating Statement presents information on expenses and revenue, and the operating result of the territory entity's activities in a financial year.

Revenue

Revenue is generated by a territory entity from its operating activities and mainly includes Controlled Recurrent Payments, which is the appropriation provided for the delivery of goods and services to the ACT Community; it also includes user charges. Revenues are recorded at the time they are earned, rather than at the time at which the cash payment is received. Therefore revenue amounts in the Operating Statement may differ from receipts from operating activities in the Cash Flow Statement.

Income

Income encompasses both revenue and gains.

Expenses

Expenses are costs incurred by a territory entity through its operating activities. Employee expenses, supplies and services, and grants are some of the common expenses incurred by territory entities.

Operating Result

The difference between income and expenses is known as the Operating Result. The Operating Result is the operating profit or loss for the period being reported.

Total Comprehensive Income

Total Comprehensive Income measures the total change in value of a territory entity during a financial year arising from income, expenses and both realised and unrealised movements in the valuation of assets and liabilities. Total Comprehensive Income is the equivalent to the total increase or decrease in Net Assets during the financial year.

Example 4 provides an example of a territory entity Operating Statement.

Example 4

The variance is the percentage difference between the Estimated Outcome and the Budget.

Operating Statement

Total Ordinary Expenses		546,884				
Operating Result		-44,331				
Other Comprehensive Income						
Increase/(Decrease) in the Asset Revaluation Surplus		10				
Total Other Comprehensive Income		10				
Total Comprehensive Income		-44,321				

This is the total amount appropriated to the territory entity to deliver goods and services and aligns with the Appropriation Bill.

These items reflect other revenue sources collected by or allocated to a territory entity.

Gains represent items other than revenue that meet the definition of income and may or may not arise in the course of the ordinary activities of a territory entity. Gains may arise, for example, on disposal of non-current assets.

These items reflect, on an accrual basis, the cost of all services delivered by a territory entity within a fiscal year.

This item reflects the difference between operating revenue, expenses and gains.

This item reflects the revaluation of Property, Plant and Equipment.

Balance Sheet

The Balance Sheet is a financial snapshot of a territory entity's financial position taken at the end of the financial year (30 June). It is broken up between current and non-current assets and liabilities and includes financial assets, non financial assets, and the extent of liabilities such as creditors, borrowings and superannuation. Assets reflect what is controlled by or owed to the territory entity, whilst liabilities reflect what the territory entity owes to others.

By providing information on the type of assets and liabilities, this statement gives an indication of the territory entity's financial strength.

Current Assets and Non-Current Assets

Current Assets are cash and other assets that are expected to be converted to cash within 12 months, such as receivables and inventories. Non-current assets are usually physical in nature with longer-term useful lives, such as land, buildings and equipment. These are utilised by territory entities in delivering services to the community.

Current Liabilities and Non-Current Liabilities

Current Liabilities are usually obligations that would be met within 12 months or where the territory entity does not have an unconditional right to defer settlement of the liability for at least 12 months, such as payables (creditors), employees' annual leave entitlements and interest expenses due but not paid. Non-current liabilities are longer term obligations, such as employees' long service leave entitlements, borrowings (debt) and superannuation.

Equity

Equity represents the difference between total assets and total liabilities. Equity is also known as net assets or net worth.

Example 5

The variance is the percentage difference between the Estimated Outcome and the Budget.

Balance Sheet

20XX-XX Budget	20XX-XX Est. Outcome	20XX-XX Budget	Var	20XX-XX Estimate	20XX-XX Estimate	20XX-XX Estimate
\$'000	\$'000	\$'000	%	\$'000	\$'000	\$'000
Current Assets						
Cash and Cash Equivalents		29,760				
Receivables		3,353				
Other Current Assets		2,608				
Total Current Assets		35,721				
Non Current Assets

NET ASSETS		1,572,160				
REPRESENTED BY FUNDS EMPLOYED						
Accumulated Funds		685,225				
Reserves		886,935				
TOTAL FUNDS EMPLOYED		1,572,160				

Assets that are either cash, or likely to be converted to cash within 12 months.

Assets that do not fall within the definition of current assets.

This item includes amounts owing by the territory entity to other parties including suppliers and employees.

This item represents the difference between the territory entity's Total Assets and Total Liabilities. Net Assets represent the territory entity's overall financial position at a point in time.

Reserves are recognised for the increase on revaluation of non-current assets or other intended use of funds.

This is a territory entity's contribution to the Net Worth of the Territory.

Cash Flow Statement

The Cash Flow Statement is concerned with the flow of cash in and cash out of a territory entity for the financial year. The Cash Flow Statement captures all cash receipts and cash payments that flow through the Operating Statement and Balance Sheet. Non-cash transactions, such as asset revaluations, are not captured in the Cash Flow Statement.

The Cash Flow Statement is partitioned into three segments, namely: cash flow resulting from operating activities, cash flow resulting from investing activities, and cash flow resulting from financing activities.

Operating Activities

Operating activities are those which relate to the core business of the territory entity; for example the collections of taxes, the distribution of grants and the provision of goods and services to the community.

Investing Activities

Investing activities are those that relate to the management of assets, including the sale and purchase of assets such as land, buildings, plant and equipment, management of investments and customer loans. Any profit or loss on the disposal of an asset is also recorded in the Operating Statement.

Financing Activities

Financing activities relate to changes in the size and composition of the contributed capital (accumulated funds) and borrowings of the territory entity. It includes items such as capital injections from Government, distributions to Government and repayment of finance leases/borrowings.

The net increase or decrease in cash held is simply the sum of cash receipts less cash payments for the period. Total cash at the beginning and end of the period is also shown, which matches the total of cash equivalent assets included in the Balance Sheet.

Example 6 provides an example of a territory entity Cash Flow Statement.

Example 6

Cash Flow Statement

The variance is the percentage difference between the Estimated Outcome and the Budget.

20XX-XX Budget	20XX-XX Est. Outcome	20XX-XX Budget	Var	20XX-XX Estimate	20XX-XX Estimate	20XX-XX Estimate

CASH FLOWS FROM FINANCING ACTIVITIES						
Cash Receipts						
Capital Injection from Government		214,821				
Total Cash Received from Financing Activities		214,821				
Cash Payments						
Distributions to Government		688				
Repayment of Finance Lease		1,769				
Total Cash Paid from Financing Activities		2,457				
NET CASH FLOWS FROM FINANCING ACTIVITIES		212,364				
NET INCREASE/ (DECREASE) IN CASH AND CASH EQUIVALENTS		-88				
CASH AT THE BEGINNING OF REPORTING PERIOD		29,848				
CASH AT THE END OF THE REPORTING PERIOD		29,760				

This figure aligns with the Appropriation Bill.

Operating activities are the principle revenue-producing activities of a territory entity and other activities that are not investing or financing activities.

Investing activities are the acquisition and disposal of long-term assets, and other investments not included in cash equivalents.

This figure aligns with the Appropriation Bill.

Financing activities are activities that relate to changes in the size and composition of the contributed capital (accumulated funds) and borrowings of the territory entity.

Net Increase/(Decrease) in Cash and Cash Equivalents is the sum of net cash flows from all operating, investing and financing activities. This measure is consistent with the movement of cash in the GGS Balance.

Statement of Changes in Equity

The Statement of Changes in Equity shows the changes in equity between two financial years reflecting the increase or decrease in its net assets during the year. The total overall change in equity during a financial year represents the total amount of income and expenses, including gains and losses generated by a territory entity's activities during the year. Examples of changes in equity include movements in capital injections and distribution, asset revaluations and increases or decreases in net assets due to administrative restructures.

Example 7

Statement of Changes in Equity

20XX-XX Budget \$'000	20XX-XX Est. Outcome \$'000	20XX-XX Budget \$'000	Var %	20XX-XX Estimate \$'000	20XX-XX Estimate \$'000	20XX-XX Estimate \$'000

		1,572,160				← Closing balance matches the totals in the Balance Sheet for Net Assets and Total Funds Employed.

Statement of Income and Expenses on Behalf of the Territory

Expenses on this statement are those which are administered by a territory entity on behalf of the Territory, and over which a territory entity has no discretion in applying to an alternative use. Income on this statement represents taxes, fees and fines that are collected on behalf of the Territory and transferred to the TBA for redistribution across Government. The territory entity has no discretion over the use of Territorial income collected.

Payments on behalf of the Territory accounted for in Revenue include amounts received from Government to pay for Territorial expenses. The income amounts transferred to the TBA are shown as Transfer Expenses in this statement.

Example 8

Statement of Income and Expenses on Behalf of the Territory

20XX-XX Budget	20XX-XX Est. Outcome	20XX-XX Budget	Var	20XX-XX Estimate	20XX-XX Estimate	20XX-XX Estimate
\$'000	\$'000	\$'000	%	\$'000	\$'000	\$'000
Income						
Revenue						
Payment for Expenses on behalf of Territory		231,271				
Taxes, Fees and Fines		195				
Grants from the Commonwealth		0				
Total Revenue		231,466

This figure aligns with the cash at the end of the reporting period in the Budgeted Statement of Cash Flows on Behalf of the Territory.

Budgeted Statement of Cash Flows on Behalf of the Territory

This statement discloses those cash flows which are administered by a territory entity on behalf of the Territory. This reflects the total cash flows, including the transfers between the TBA and the territory entity operated banking account, for Revenue on Behalf of the Territory (RBT) and Expenditure on Behalf of the Territory (EBT).

Example 10

Budgeted Statement of Cash Flows on Behalf of the Territory

20XX-XX Budget	20XX-XX Est. Outcome	20XX-XX Budget	Var	20XX-XX Estimate	20XX-XX Estimate	20XX-XX Estimate

APPENDIX B

GLOSSARY OF TERMS

APPENDIX B: GLOSSARY

Accountability Indicators

A measure of a territory entity's effectiveness and efficiency in delivering its outputs. These indicators are subject to audit and may be measures of outcomes, outputs or inputs.

Accounting Policy

Specific accounting principles and practices applied in preparing and presenting financial statements.

Accrual Accounting

The recognition of income, expenses, assets, liabilities and equity when an economic transaction occurs giving rise to a movement of resources, irrespective of the timing of any related movement in cash.

Accrued Expenses

Expenses incurred during the accounting period that are yet to be paid at the end of the reporting period. The expenses are expected to be paid in the next accounting period.

Accrued Income

Income earned during the accounting period, but not yet received by the end of the reporting period. The income is expected to be received in a future accounting period.

Accumulated Amortisation

This is the total accumulation of amortisation expenses at a given point in time, charged for intangible assets (refer to Amortisation).

Accumulated Depreciation

This is the total accumulation of depreciation expenses at a given point in time, charged for a particular depreciable asset or class of assets (refer to Depreciation).

Accumulated Funds

Represents the capital the Government has injected into a territory entity, less any capital distributions to Government, plus the surpluses and deficits accumulated in a territory entity as a result of operations. For directorates, capital injections and distributions may occur as a result of a change in administrative arrangements.

Amortisation

The systematic allocation of the cost of an intangible asset over its useful life. The term amortisation is often used interchangeably with the term depreciation. However, depreciation is used in relation to non-current assets that have physical substance (for example property, plant and equipment), while amortisation is used in relation to intangible non-current assets.

Appropriation

The maximum amount of public money authorised by the ACT Legislative Assembly under a legislative authority for transfer from the Territory Banking Account to a territory entity.

Assets

Future economic benefits, or service potential, controlled by a territory entity as a result of past transactions or other events.

Asset Classes

A grouping of assets of a similar nature and use in the operation of a territory entity.

Australian Accounting Standards (The Standards)

The accounting and reporting framework issued and maintained by the Australian Accounting Standards Board (AASB). The Standards prescribe the acceptable methods of measuring and recording accounting transactions and the required level of disclosure of those transactions in financial statements.

Australian Business Number (ABN)

A unique identifier for all business dealings with the Australian Taxation Office and for future dealings with other government agencies.

Balance Sheet

A statement of financial position which indicates the assets held by an entity relative to the claims against those assets (ie liabilities).

Budget Papers

These accompany an Appropriation Bill and contain detailed information on the Budget, as well as explanatory material on the context of the Budget.

Capital

The accumulated wealth that a territory entity is responsible for, resulting from Government contributions as owner and the retained earnings in the territory entity.

Capital Expenditure

Funds expended in the course of adding to the future economic benefits provided by an asset as a result of a physical addition, improvement or extension of the useful life of the asset. Capital expenditure also includes the purchase or development of new assets.

Capital Grants

Transactions in which the ownership of an asset (other than cash and inventories) is transferred from one institutional unit to another. Cash is transferred to enable the recipient to acquire another asset or in which the funds realised by the disposal of another asset are transferred, for which no economic benefits of equal value are receivable or payable in return.

Capital Injections

The means by which the Government injects funds into a territory entity for purposes such as the purchase or development of assets, the payment of debt, or to increase a territory entity's working capital. On occasion capital injections may be repayable, in which case the terms of these loans are outlined in the budget papers.

Capital Upgrades

Activities and minor works intended to extend the effective useful life of an existing asset, or improve an asset's service potential. They may also include works for ongoing programs vital to a territory entity's service delivery objectives.

Capital upgrades do not include ongoing repairs and maintenance which do not extend the useful life of an asset and are funded through a territory entity's recurrent appropriation.

Capital Works Capital

Capital works are defined as:

- the creation of a new Territory asset, including new construction projects, and additions to assets;
- alterations to buildings and other assets;
- demolition work;
- furniture and fittings, equipment or plant which are provided as an integral component in the construction and upgrade of buildings or works;
- work which significantly increases the service delivery capability of an asset, for example the major reconstruction of roads and bridges;
- design fees; and
- site testing and field investigations related to an approved capital works proposal or project.

Cash

Comprises cash on hand and demand deposits.

Cash Equivalents

Short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to insignificant risk of change in value.

Cash Flows

Inflows and outflows of cash and cash equivalents.

Cash Surplus/(Deficit)

The net cash received from operating activities less net sales and purchases of non-financial assets. A cash surplus indicates there was sufficient cash generated from operations to more than cover the net outlay of the capital works program. This measure is located at the bottom of the consolidated harmonised Cash Flow Statement.

Commitment

A firm intention (usually represented by a contractual obligation) at the end of the reporting period which will give rise to a future payment or sacrifice of service potential or benefits.

Commonwealth Grants

Include general revenue in the form of Goods and Services Tax (GST) grants from the Commonwealth Government for the purpose of contributing to the financing of the current operations of the recipient. This is in addition to monies received for specific purposes, where the Commonwealth Government wishes to have some involvement in the direction of the expenditure. These take the form of either Specific Purpose Payments or National Partnership Payments. Grants are also received for on-passing to third parties (for example to non-government schools), where the Territory has no discretion in their allocation.

Commonwealth Grants Commission (CGC)

Established by the Commonwealth Government in 1933, the CGC is a statutory authority whose current main function is to recommend GST relativities to the Commonwealth Government concerning the distribution of the GST pool among the States and Territories in accordance with the principles of Horizontal Fiscal Equalisation (HFE).

Consumer Price Index (CPI)

The CPI measures the changes in the price of a fixed basket of goods and services, acquired by household consumers who are resident in the eight State/Territory capital cities.

Controlled Items

Items over which the directorate or territory entity has discretion, responsibility and authority. An item is considered to be a controlled item if the territory entity has:

- capacity to benefit from the use of the asset or funds in the pursuit of its objectives and to deny or regulate the access of others to those assets or funds; or
- discretion and responsibility for how the funds are spent; or
- expended funds, incurred a liability, or received free services, related to the operations under its control.

Controlled Recurrent Payment

An amount provided, or to be provided to a territory entity for the delivery of goods and services provided by the territory entity or a person providing goods and services on behalf of the territory entity.

Council for the Australian Federation (CAF)

Established by State Premiers and Chief Ministers in October 2006 to support and enhance collaborative federalism by providing an intergovernmental forum for State and Territory leaders to work together on issues of importance.

Council of Australian Governments (COAG)

The peak intergovernmental forum in Australia comprising the Prime Minister, State Premiers, Territory Chief Ministers and the President of the Australian Local Government Association (ALGA). Its role includes initiating, developing, endorsing and monitoring the implementation of policy reforms of national significance which require cooperative action by Australian Governments.

Current Assets

An asset is classified as current when it satisfies any of the following criteria:

- it is expected to be realised or is intended for sale or consumption in the territory entity's normal operating cycle; or
- it is held primarily for the purpose of being traded; or
- it is expected to be realised within twelve months after the reporting date; or
- it is cash or a cash equivalent unless restricted from being exchanged or used to settle a liability for at least 12 months after the reporting period.

Current Grant Expenses

Payments of a current nature to individuals or organisations for general assistance or a particular purpose that, by virtue of their payment, contribute to the achievement of the program's objectives.

Current Liabilities

A liability is classified as current when it satisfies any of the following criteria:

- it is expected to be settled in the territory entity's normal operation cycle; or
- it is held primarily for the purpose of being traded; or
- it is due to be settled within twelve months after the reporting date; or
- the territory entity does not have an unconditional right to defer settlement of the liability for at least twelve months after the reporting date.

Debt

A legal obligation to make payments of principal and (in some cases) interest according to a predetermined schedule. Debt includes obligations arising from loans (including advances from the Commonwealth Government), bonds, notes and other securities on issue, the capitalised value of outstanding lease commitments under finance lease arrangements, supplier/buyer credits, bank overdrafts, and deferred contract payments.

Debt Servicing

Payments of interest and repayments of principal associated with borrowings and Commonwealth Government advances.

Depreciation Expense

The systematic allocation of the cost of a non-current asset that has a physical substance, less its residual value over the remainder of its useful life.

Directorate

The term used to define the functional units of the ACT Public Service.

Dividend

A portion of a corporation's after tax earnings paid to shareholders.

Employee

An employee is a natural person who receives benefits in exchange for services provided to an employer.

Employee Benefits

Benefits that employees accumulate as a result of providing their services to an employer up to the reporting date. These may include, but are not limited to, annual leave, long service leave, superannuation benefits and other post employment benefits.

Equity

Equity is the difference between the value of the assets/interest and the cost of the liabilities of something owned.

Expenses

Expenses are decreases in economic benefits during the accounting period in the form of outflows or depletions of assets or incurred liabilities that result in decreases in equity, other than those relating to distributions to equity participants.

The whole of government harmonised Operating Statement expenses include all mutually agreed transactions that decrease net worth, in accordance with Government Finance Statistics (GFS) principles.

Finance Lease

A finance lease transfers from the lessor to the lessee substantially all the risks and rewards incidental to the ownership of an asset. Title may or may not eventually be transferred.

Financial Assets

Assets that derive value because of a contractual claim.

First Home Owner Boost Scheme (FHOB)

The FHOB supplements the First Home Owner Grant Scheme (FHOG). The FHOB was funded by the Commonwealth Government and applied to contracts entered into on or before 31 December 2009. The FHOB does not apply to contracts made after 31 December 2009.

First Home Owner Grant Scheme (FHOG)

States and Territories are required to fund a FHOG to offset the impact of the Goods and Services Tax (GST) on the price of new homes.

Full-Time Equivalent (FTE)

A measure of the total level of staff resources used. The FTE of a full-time staff member is equal to 1.0. The calculation of an FTE for part-time staff is based on the proportion of time worked compared to that worked by full-time staff performing similar duties. Contractors are excluded from this definition.

Gains

Gains represent items other than revenue that meet the definition of income and may, or may not, arise in the course of the ordinary activities of a territory entity. Gains may arise, for example, on the disposal of non-current assets.

Generally Accepted Accounting Principles (GAAP)

A widely accepted set of uniform standards, rules, conventions and procedures for reporting financial information established by the Australian Accounting Standards Board.

Government Business Enterprise (GBE)

Organisational units within the public sector that produce goods and services which are, or could be, sold or tendered in the market place without compromising government's economic and social objectives.

General Government Sector (GGS)

This is an Australian Bureau of Statistics (ABS) categorisation of certain public sector agencies. It covers agencies mainly engaged in the production of goods and services outside the normal market mechanism, for consumption by government itself and the general public. The agencies' costs of production are mainly financed from public revenues and they provide goods and services to the general public, or sections of the general public, free of charge or at nominal charges well below the cost of production.

General Revenue Assistance (GRA)

Covers a broad range of payments including GST payments which are provided to the States and Territories by the Commonwealth without conditions to be spent according to their own budget priorities.

Goods and Services Tax (GST)

The GST is an indirect, broad-based consumption tax.

GST Revenue

GST revenue collected by the Commonwealth Government is transferred to the States and Territories as untied financial assistance in accordance with the principle of Horizontal Fiscal Equalisation.

Government Finance Statistics (GFS)

The framework used by the ABS for presentation of data on government outlays, revenue and financing transactions through either the General Government sector or the public component of the business sector (the Public Trading Enterprise sector) in accordance with an internationally accepted set of concepts and definitions.

Grants (non ACT Government)

These include payments to individuals or organisations for general assistance or for a particular purpose that contribute to the achievement of the program's objectives. Grants may be for capital and the grant name or category reflects the use of the grant. Grants are usually made subject to terms and conditions contained in legislation or contracts, or stipulated in correspondence. An individual or organisation may apply for a grant based on eligibility criteria being met. Capital grants do not reflect an investment by the Government and are not included as Territory assets.

Gross State Product

The total value of production within a State or Territory which is the State/Territory equivalent of Gross Domestic Product.

Harmonised Financial Statements

These are consolidated financial statements prepared in accordance with the 'AASB 1049, *Whole of Government and General Government Sector Financial Reporting*', standard to meet the requirements of the GFS, the AASB and the Uniform Presentation Framework.

Horizontal Fiscal Equalisation (HFE)

A concept used to distribute GST Revenue amongst the State and Territory governments such that each would have the fiscal capacity to provide services and the associated infrastructure at the same standard, if each made the same effort to raise revenue from its own sources and operated at the same level of efficiency.

Income

Income arises from increases in economic benefits during the accounting period in the form of inflows or enhancements of assets, or decreases of liabilities that result in increases in equity, other than those relating to contributions from equity participants. Income encompasses both revenue and gains.

Industry Value Added

The value of output in a particular industry minus the intermediate inputs used in the production of that output.

ICT

Information and communications technology.

Implementation Plans

Implementation Plans are subsidiary documents to some National Partnership agreements and outline what is to be achieved by a jurisdiction and when.

Intergovernmental Agreement on Federal Financial Relations (IGA-FFR)

The current Intergovernmental Agreement on Federal Financial Relations was signed by COAG in December 2008. The IGA-FFR replaced the 1999 IGA on the Reform of Commonwealth-State Financial Relations.

Federal legislation providing appropriation in respect of the fiscal grants, outlined in Schedule D of the IGA, was signed by the Commonwealth Government in the form of the *Federal Financial Relations Act 2009* on 1 April 2009.

Inventories

Includes assets (but does not include depreciable assets):

- held for sale or consumption in the ordinary course of service delivery; or
- in the process of production for such sale or consumption; or
- to be used up in the production of goods, other property or services for sale or consumption including consumable stores and supplies.

Investments

Assets held by a territory entity primarily for the accumulation of wealth through receipt of distributions (such as interest, royalties, dividends and rentals) or for capital appreciation.

Input Tax Credit

Organisations that are registered for GST are entitled to claim as a credit, from the Australian Taxation Office, any GST paid on purchases they made for a creditable acquisition.

Liabilities

Liabilities represent a present obligation of a territory entity arising from past events, the settlement of which is expected to result in an outflow from the territory entity of resources embodying economic benefits. Liabilities are a broader concept than debt. They also include obligations which do not have a predetermined repayment schedule, and those which do not require payments of interest, such as unfunded liabilities of superannuation funds, liabilities in respect of other employee benefits (long service and annual leave) and trade creditors.

Loan Council

Established under the *Financial Agreement Act 1927*, the Australian Loan Council has the objective of managing the call on national savings by the Australian public sector as a whole. The Loan Council consists of a Commonwealth Government representative as chairman and a representative of each of the States and Territories.

Loan Council Allocation (LCA)

A measure of the call on national savings by a jurisdiction. The Australian Loan Council allocates, by mutual agreement, an annual target for total net financing by each jurisdiction. The LCA is calculated on the basis of a government's cash position, and resulting call on financial markets in any given year, required to meet its budget obligations.

Local Health Network (LHN)

The ACT LHN consists of a networked system that will hold service contracts with the ACT Health Directorate. The ACT LHN will be comprised of the Canberra Hospital, Calvary Public Hospital, Clare Holland House (CHH) and the Queen Elizabeth II Family Centre (QEII). The ACT LHN has its own set of financial accounts and performance indicators, providing transparency and accountability of funding flows to the ACT LHN from the National Health Funding Pool.

Materiality

Materiality is the concept of establishing the importance of financial data. Omissions or misstatements of items are material if they could, individually or collectively, influence the economic decisions that users make on the basis of the financial statements. Materiality depends upon the size and nature of the omission or misstatement judged in the surrounding circumstances.

Memorandum Items

The size of a jurisdiction's Loan Council Allocation is determined by adding the General Government sector cash deficit/surplus, the Public Trading Enterprise sector's net financing requirement and certain memorandum items.

These memorandum items are included because their nature is sufficiently similar to financing transactions in their economic impact to justify inclusion. These include:

- the net movement of operating leases with a net present value of payments greater than \$5 million;
- private sector involvement in public sector infrastructure;
- sales of assets on a recourse basis;
- the net cash surplus/deficit of universities in the jurisdiction controlled by the Government (for example the University of Canberra); and
- adjustments to exclude all superannuation payments to externally managed and controlled superannuation funds from outlays.

Mid-Year Economic and Fiscal Outlook (MYEFO)

The Commonwealth Government generally updates its Federal budget estimates in November/December in any given year.

National Agreements

National Agreements define the objectives, outcomes, outputs and performance indicators, and clarify the roles and responsibilities that will guide the Commonwealth and the States in the delivery of services across a particular sector.

There are currently six National Agreements covering key areas of healthcare, education, skills and workforce development, disability services, affordable housing and Indigenous reform. Each National Agreement, with the exception of the National Indigenous Reform Agreement, is associated with a National Specific Purpose Payment (National SPP) which is required to be spent in the relevant sector.

National Partnership Agreement

A key element of the federal financial relations framework set out in the Intergovernmental Agreement on Federal Financial Relations is the National Partnership agreements which define the mutually agreed objectives, outcomes, outputs and performance benchmarks or milestones related to the delivery of specific projects, improvements in service delivery or reform.

National Partnership Payment

A Commonwealth payment to the States and Territories, in respect of a National Partnership Agreement, to support the delivery of specified projects, to facilitate reforms or to reward those jurisdictions that deliver on national reforms or achieve service delivery improvements.

National Specific Purpose Payment

A Commonwealth financial contribution to support State and Territory delivery of services in a particular sector. Each National SPP is associated with a National Agreement.

National Tax Equivalent Regime

An administrative arrangement between the Commonwealth Government, States and Territories which notionally applies relevant taxation laws to nominated State and Territory GBEs.

Net Debt

The sum of deposits held, advances received and borrowings minus the sum of cash and deposits, advances paid, investments, loans and placements. Net debt is a useful measure to judge the overall strength of the Government's fiscal position. A positive position indicates that cash reserves and investments are lower than gross liabilities placing a call on future revenues to service these liabilities. A negative position indicates that cash reserves and investments are greater than gross liabilities.

Net Financial Liabilities

Net financial liabilities takes into account unfunded superannuation liabilities and provides a broader measure of debt than net debt. Net financial liabilities are calculated as total liabilities less financial assets (such as cash reserves and investments). It takes into account all non-equity financial assets but excludes the value of equity held by the General Government sector in public corporations.

Net Financial Worth

The amount by which total financial assets exceed financial liabilities. It is a measure of net holdings of financial assets.

Net Increase / (Decrease) in Cash Held

The sum of the net cash flows from all operating, investing and financing activities.

Net Lending / Borrowing

The financing requirement of government, calculated as the net operating balance less the net acquisition of non-financial assets. It also equals transactions in financial assets less transactions in liabilities. A positive result reflects a net lending position and a negative result reflects a net borrowing position.

Net Operating Balance

This is calculated on the harmonised whole of government operating statement as revenue minus expenses. It is equivalent to the change in net worth arising from transactions.

Net Worth

Defined as total assets less total liabilities. It is an economic measure of wealth and reflects the contribution of jurisdictions to the wealth of Australia.

Nominal Superannuation Expense

Refers to the imputed interest accrued each quarter on unfunded superannuation liabilities. In an unfunded superannuation scheme, the increase in superannuation liability is taken as being equivalent to the liability that would be generated under a fully funded scheme as if the employer was paying into a separate superannuation fund. In this scenario, the Government is viewed as compulsorily 'borrowing' from employees the value of the increase in superannuation liability each period. In doing so, it sustains an additional cost for the use of these 'borrowed' funds which is an interest expense. The cost of these 'borrowed' funds is presented in operating statements as nominal interest.

Non-Financial Assets

Refers to all assets other than financial assets. Primarily includes property, plant and equipment, such as roads, schools, hospitals, land, inventories, other infrastructure and intangible assets.

Non-Financial Public Sector

Represents the consolidated transactions and assets and liabilities of the General Government and Public Non-Financial Corporation (PNFC) sectors. In compiling statistics for the NFPS transactions and debtor-creditor relationships between subsectors are eliminated to avoid double counting. This process is known as consolidation.

Operating Leases

Leasing arrangements in which all substantial risks and rewards incidental to ownership of a leased asset effectively remain with the lessor (the owner of the asset) rather than passing to the lessee (which would make it a finance lease).

Operating Statement

A summary of an entity's revenues and expenses over the reporting period.

Operating Result

Operating profit or loss for the period being reported.

Other Economic Flows

For the whole of government harmonised operating statement, other economic flows include changes in the value of assets from revaluations, non-financial asset sales and non-mutual bad debts written off.

Output

Goods produced or services provided by, or on behalf of, a territory entity to the community. Outputs allow for the measurement of the cost of a territory entity to provide goods or services to the ACT community.

Output Class

Output Classes will no longer be identified in the Appropriation Act.

Overdraft or Credit Facility

The Treasurer may, on the terms and conditions the Treasurer considers appropriate borrow money for a territory authority; or lend public money to a territory authority. A territory authority may subsequently (with written approval of the Treasurer) arrange an overdraft or credit facility only with the written approval of the Treasurer. The relevant Budget Statement section is intended to summarise the operating conditions and financial movements associated with the facility.

Payments for Expenses on Behalf of the Territory

Territorial (administered) revenues, which the Government appropriates to territory entities for the payment of grants, subsidies and transfer payments (refer Territorial).

Performance Indicator

An accountability indicator or a strategic indicator.

Performance Measure

Quantifiable units of measurement used to determine and assess the delivery of outputs.

Prepayments

Payments made in one reporting period, in respect to goods or services that a territory entity expects to receive or consume in future periods.

Project Agreements

Project Agreements are a type of National Partnership used to implement projects that are considered low-value and/or low risk. Project Agreements are simple, standalone, outputs-focussed documents that are generally bilateral although they may be multilateral in certain limited circumstances.

Property, Plant and Equipment

Property, plant and equipment are assets that:

- are held by the territory entity for use in the production or supply of goods and services, for rental to others, or for administrative purposes;
- have been acquired, obtained or constructed with the intention of being used on a continuing basis; and
- are not intended for sale in the ordinary course of business or service delivery.

Provision

Liability for which the amount or timing of the future sacrifice of economic benefits that will be made is uncertain.

Public Non-Financial Corporation (PNFC) Sector

The PNFC sector is also known as the Public Trading Enterprise (PTE) sector. The PNFC sector comprises bodies mainly engaged in the production of goods and services (of a non-financial nature) for sale in the market place at prices that aim to recover most of the costs involved. In general PNFCs are legally distinguishable from the government which owns them.

Public Trading Enterprises

This is an ABS categorisation of certain public sector agencies. It comprises government controlled corporations and quasi-corporations mainly engaged in the production of market goods and/or non-financial services.

Repayable Capital Injection Statement

Where a territory entity is appropriated with a repayable capital injection, a statement is to be presented reflecting that it is repayable and which sets out the conditions of the injection, including the repayment term.

Receipts

Cash inflows for a period, irrespective of when the moneys are earned.

Relativity (GST)

A per capita weight assessed by the CGC for use by the Australian Treasury to calculate the share of the GST revenue a State or Territory requires to achieve HFE. The Australian average relativity is 1.0. By way of example, a jurisdiction assessed by the CGC as having a relativity of 2.0 would require twice as much GST revenue per capita than the Australian average to achieve HFE.

Reserves

Reserves are recognised for the increases on revaluation of non-current assets or other intended uses of accumulated funds.

Retained Earnings (or Earnings)

Retained earnings are the accumulated operating results since the 1996-97 audited financial statements not transferred to reserves or to the Government.

Revenue

Revenue is an inflow of economic benefit which arises in the course of the ordinary activities of a territory entity. For the whole of government operating statement, revenue includes all mutually agreed transactions that increase net worth in accordance with GFS principles.

Service Purchasing

Refers to funding arrangements by which the Territory (as purchaser) contracts with a provider for delivery of specified services. These are identified as specific outputs which contribute toward the achievement of the Government's desired outcomes. Providers are required to report against agreed indicators in order to assist the Territory to meet its accountability obligations to the community.

State Final Demand

The aggregate obtained by summing government final consumption expenditure, household final consumption expenditure, private gross fixed capital formation and the gross fixed capital formation of public corporations and general government.

Standing Council for Federal Financial Relations (SCFFR)

The SCFFR was formally launched by the Prime Minister in January 2012, replacing the Ministerial Council for Federal Financial Relations under the new COAG system. It has responsibility for the general oversight of the operation of the IGA-FFR on behalf of COAG and is comprised of all State and Territory Treasurers, chaired by the Commonwealth Treasurer.

Strategic Indicators

Performance indicators aimed at measuring the Government's performance against longer-term strategic outcomes which impact upon the ACT community. A territory entity has some accountability for performance against these indicators, although it cannot be held fully responsible for achieving the specified targets, as there are external factors which will influence the result. Strategic indicators are not subject to audit.

Strategic Objectives

The effect or difference a territory entity aims to make in the ACT community in the short to medium term. Strategic objectives contribute to government priorities and goals and can be influenced by a territory entity in the medium term. The objectives are measurable and/or verifiable through strategic indicators.

Superannuation Provision Account (SPA)

A provisioning account established in 1991 to assist the Government in managing its unfunded superannuation liabilities for employees who are members of the Commonwealth Government's CSS and PSS schemes. Its operations are subject to the legislative requirements of the *Territory Superannuation Provision Protection Act 2000* which limits monies standing to the credit of the account to be used for superannuation purposes only, not for the general purposes of government.

Supplies and Services

This category of expenses is one of a number identified according to their nature or type for disclosure in the operating statement. This category includes such types of expenses as travel, office requisites, postage, computer services, consultants and telecommunications services.

Tax-Equivalent Payments

Refers to payments that a GBE is required to make in order to ensure it has the same taxation obligations as private sector firms, usually for competitive neutrality reasons. For example, although GBEs are ordinarily exempt from Commonwealth Government income taxes, they are required by their owner governments to make payments calculated on the same basis as income tax.

Territorial

Territorial (administered) items are income, expenses, assets and liabilities that a territory entity administers but does not control. These items relate to activities performed on behalf of the Territory. An item would generally be regarded as a Territorial (administered) item if the territory entity:

- has restricted or no discretion in relation to the item; or
- has restricted or no discretion to increase or decrease the item; or
- has responsibility for the item, but restricted or no authority over its use; or
- is responsible only for the collection and/or transfer of the item.

Items are Territorial (administered) where decisions relating to their use are primarily made by the Government.

Territory Banking Account (TBA)

The TBA is a banking account required to be opened and maintained for the purposes of the Territory in accordance with Section 33 of the *Financial Management Act 1996*.

Territory Entity

A directorate, territory authority, or territory-owned corporation.

Territory Owned Corporation (TOC)

A company owned by the Territory which is specified in Schedule 1 of the *Territory-Owned Corporations Act 1990*. Territory Owned Corporations are subject to the obligations imposed by the *Territory-Owned Corporations Act 1990* as well as other legal obligations imposed on them by any other law such as the *Commonwealth Corporations Act 2001* or the constitution of the company.

Territory Unencumbered Cash (TUC)

A measure of excess capacity (cash and investments) at a point in time that has not been formally allocated, excluding territory entity balances. TUC needs to be considered in the context of its balance over the Budget and Forward Estimates period, in order to ensure cash reserves are maintained at a reasonable level.

Total Comprehensive Income

A measure of the total change in value of the territory entity during a financial year arising from revenue, expenses and both realised and unrealised movements in the valuation of assets and liabilities. Total Comprehensive Income is the equivalent to the increase or decrease in Net Assets during the financial year.

Treasurer's Advance

Funds available under Section 18 of the *Financial Management Act 1996* for payments where there is an immediate requirement for the payment and the payment is not provided for or is insufficiently provided for by an appropriation.

Trust Money

Money a territory entity holds in trust on behalf of a third party. The territory entity acts as administrator of funds and is not permitted to spend these funds on the territory entity's controlled activities. This money is accounted for separately from either controlled or territorial money.

Uniform Presentation Framework (UPF)

By agreement between the Commonwealth Government and the States and Territories, each jurisdiction presents financial information on a UPF basis in their budget papers, and in mid-year budget updates and in budget outcome reporting. The primary objective of the UPF is to ensure that the Commonwealth, State and Territory governments provide a common 'core' of financial information in their budget papers to enable direct comparisons of each government's budget and financial results. The UPF is based on the harmonised whole of government reporting standard.

User Charges

Revenues resulting from the sale of goods and services to consumers. User charges include revenue that the reporting territory entity controls, and excludes Territory (administered) revenue. User charges exclude Controlled Recurrent Payments.

Vertical Fiscal Imbalance

The difference between the relative revenue raising capacity and spending responsibilities of the Commonwealth and States and Territories.

Wage Price Index (WPI)

The WPI is a price index which measures changes over time in wages and salaries for employee jobs, unaffected by changes in the quality or quantity of work performed. Changes in wages and salaries resulting from changes in the composition of the labour market are excluded from the WPI movements.

Whole of Government Harmonised Standard

The term refers to the harmonisation of GAAP and Government Finance Statistics. 'AASB 1049, *Whole of Government and General Government Sector Financial Reporting*' requires a single set of government reports which are auditable, comparable between jurisdictions, and in which the outcome statements are directly comparable to the relevant budget statements. The standard requires governments to report according to accounting standards, choosing options that are consistent with GFS accounting where available, and present according to the GFS principles.
