Other Information
Costing Methodology Used: - Costing Technique: This costing is for an operational improvement program within the ACT planning system with the aim of enhancing the community consultation process and improving processing timeframes for Development Applications. The cost to implement this program would be absorbed within the existing resources of the Environment, Planning and Sustainable Development Directorate (EPSDD).
- Proposal Parameters: - The costing assumes administrative expenses would be met by EPSDD. - The costing assumes the measures will be realised through an EPSDD operational reform program, which will review internal practises and procedures.
Caveats or qualifications to the costing: Treasury notes improvements in the processing of Development Applications through operational reforms may be limited without additional staffing and/or a re-prioritisation of directorate resources and activities, including the potential cessation of other programs or initiatives.
