ACT HOUSING

Objectives

ACT Housing provides property management and tenancy management services for public housing.

ACT Housing allocates public rental properties as well as assessing and providing rental assistance to eligible public housing tenants (rent rebates) and managing tenancies as part of its tenancy management function. ACT Housing also manages the Territory's public housing assets, including the acquisition, disposal, redevelopment and repair, maintenance and improvement of those assets. It also head-leases properties to community organisations, including community housing providers.

2000-01 Highlights

Strategic and operational priorities in 2000-01 include:

- completing the Government's commitment to provide 200 additional units for older persons' accommodation over three years;
- developing and implementing strategies for rejuvenating or replacing ageing public housing stock and better meeting tenant needs, through:
 - implementing a program to revitalise the larger multi-unit properties;
 - upgrading Burnie Court, Lyons; and
 - replacing older, poor quality stock with newer stock, ensuring that stock continues to be equitably distributed throughout the city;
- introducing initiatives to improve the energy efficiency in ACT Housing properties consistent with the ACT Greenhouse Strategy;
- continuing to reduce rental debt by encouraging the participation of public tenants in the direct deduction schemes for rent payment (via Centrelink and financial institutions);
- continuing the emphasis on a customer service culture in delivering housing assistance; and
- improving the efficiency of services provided to tenants by implementing service level agreements and protocols with various government agencies (family services, mental health and disability services, environment and the Australian Federal Police).

Notes to the Budget Statements

Significant variations are as follows:

Operating Statement

- user charges non ACT government: the decrease of \$1.390m from the 1999-2000 estimated outcome to the 2000-01 Budget is due to the flow through of the reduction in property numbers arising from the transfer of properties to the community housing sector;
- user charges ACT government: the increase of \$4.521m in the 2000-01 Budget from the 1999-2000 estimated outcome is due to the inclusion of additional funding to compensate for the impacts of the introduction of the Goods and Services Tax (GST). The additional funding (\$5.5m) has only been included for 2000-01, 2001-02 and 2002-03 as this is the timeframe for the current multilateral and bilateral agreements under the Commonwealth State Housing Agreement (CSHA). This has been offset by a reduction in grants under the CSHA due to efficiency savings (\$0.324m) and the retention of the Crisis Accommodation Program grant funding by DUS as the purchaser (\$0.649m);
- interest revenue: the increase of \$0.587m in the 1999-2000 estimated outcome from the original budget is due to the investment of funds from higher than expected property sales in 1999-2000 (refer other revenue below). The decrease of \$0.687m in the 2000-01 Budget from the 1999-2000 estimated outcome is due to a reduction in funds invested as the funds from the higher than expected property sales during 1999-2000 are applied towards the capital program and to revitalise the larger multi-unit properties. Interest revenues are expected to return to the normal levels in 2000-01 and the forward years;
- other revenue: the large increase of \$8.226m from original budget to 1999-2000 estimated outcome arose from the higher than expected property sales, particularly several high value properties in the inner north and south and the sale of Lachlan court. The profit on sales is not expected to be of this magnitude in 2000-01;
- employee expenses and superannuation expenses: the increase of \$1.260m in the 2000-01 Budget from the 1999-2000 estimated outcome is due to the increased costs associated with the Enterprise Bargaining Agreement, the conversion of some temporary employees to full-time staff, an allowance for redundancy costs and the cessation of capitalisation of some costs, such as for the implementation of Homenet;
- administrative expenses: the decrease of \$1.443m from the original budget to the 1999-2000 estimated outcome is due to savings in some property service costs such as general rates and water and sewerage rates resulting from the discount achieved from prepayment and the transfer of properties to the community housing sector. In addition, savings in other administrative expenditure occurred, including the delay in some costs associated with accommodation. The increase of \$4.810m in the 2000-01 Budget is due to the impact of the Goods and Services Tax (\$3.0m), particularly increasing the cost of repairs and maintenance as well as the impact of indexation and allowing for accommodation costs associated with the move to a new office;
- depreciation and amortisation expenses: the decrease of \$14.162m between the original budget and the 1999-2000 estimated outcome is due to the recalculation of the residual values and estimated useful lives of the public housing portfolio as well as the flow through effects of the decreased valuation of the portfolio over the preceding years, arising from independent valuations.

- other expenses: the increase of \$1.156m in the 1999-2000 estimated outcome from original budget is due to increased costs of demolition of properties above that originally budgeted for. The decrease of \$0.879m in the 2000-01 Budget is due to a reduction in the provisioning and write-off of bad debts and reduced costs of demolition; and
- abnormal expense: this item represents the value of the properties transferred to Community Housing Canberra Limited in 1999-2000. The initial transfer of 200 properties was finalised during 1999-2000.

Statement of Financial Position

• investments: the reduction in the balance of investments shown in the 1999-2000 estimated outcome will be used in the capital program, and the revitalisation of multi-unit properties through 2000-01;

OUTPUT CLASS 1: PUBLIC HOUSING PRINCIPAL MEASURES

OUTPUT 1.1: PUBLIC HOUSING

Description: The provision and management of public housing properties and tenancies.

Cost			
Cost of providing information	\$1 136 000	\$1 481 000	\$1 216 000
Cost of assessing and administering tenancy applications	\$1 617 000	\$1 451 000	\$1 499 000
Cost of assessing and providing rental rebates	\$3 047 000	\$2 258 000	\$2 378 000
Cost of Tenancy management	\$11 128 000	\$9 815 000	\$11 302 000
Cost of Property management ¹	\$72 816 000	\$60 735 000	\$64 472 000
TOTAL COST (\$'000)	\$89 744	\$75 740	\$80 867
GOVERNMENT PAYMENT FOR OUTPUTS (\$'000) ²	\$0.0	\$0.0	\$0.0

Government Payment for Output differs from cost to the extent that the Output is financed from within the agency.

1 The estimated final cost of property management is expected to be significantly lower in 1999-2000 due to a reduction in depreciation and amortisation. However costs of property management increase in 2000-01 due to impacts of the GST.

2 The Government Payment for Outputs is appropriated to the Department of Urban Services as the purchaser, and reflected in Output 3.1: Housing Assistance, for DUS.
