

**1 October 2023**

The *Motor Accident Injuries Act 2019* (the MAI Act) and the *Motor Accident Injuries (Premiums and Administration) Regulation 2019* (the Regulation) allows for the indexation of defined benefits being income replacement benefits, funeral and death benefits and quality of life benefits. In addition, quality of life damages, the excess payment for a WPI assessment and amounts for legal costs relating to external disputes and common law claims are also indexed. Benefits are adjusted to reflect movements in average weekly earnings (AWE) on either a biannual or annual basis. The series known as the Persons: full time adult total earnings series seasonally adjusted for the ACT, issued by the Australian Bureau of Statistics is used for these purposes.

The amounts used to calculate income replacement benefits are indexed biannually on 1 April and 1 October, commencing from 1 October 2020. All other amounts are indexed annually on 1 October.

A positive adjustment is made if AWE increases between two indexation days, and there is no negative adjustment to be offset. The indexation factor applied to a positive adjustment will always be greater than 1.000. If AWE falls between two indexation days, then a negative adjustment applies, and indexing will be deferred until the negative adjustment is fully offset by future positive adjustments. While a negative adjustment applies, an indexation factor of 1.000 is applied to AWE indexed amounts. This means the AWE indexed amounts are unchanged for that indexation day.

**Published AWE series and applicable indexation factors for amounts annually indexed**

<b>ABS series date</b>	<b>AWE<sup>1</sup></b>	<b>Indexation Day</b>	<b>Indexation Factor</b>
May 2019	1832.80	N/A	N/A
May 2020	1884.30	1 October 2020	1.028
May 2021	1952.40	1 October 2021	1.036
May 2022	2022.80	1 October 2022	1.036
May 2023	2067.00	1 October 2023	1.022
May 2024		1 October 2024	

1. Use AWE when first published and disregard any later revisions.

Section 9 of the Regulation explains the method for the annual AWE indexation factor. To work out a positive adjustment, the most recent AWE series prior to the indexation day is divided by the AWE series published from 12 months prior to this series. Then the indexation factor is rounded to 3 decimal places.

To calculate an annually AWE indexed amount, multiply the corresponding AWE indexed amount from the previous indexation day by the current indexation factor (greater than or equal to 1.000). Then round the result up to the nearest whole \$10.

**Published AWE series and applicable indexation factor for amount biannually indexed**

<b>ABS Series date</b>	<b>AWE<sup>1</sup></b>	<b>Indexation Day</b>	<b>Indexation Factor</b>
November 2019	1856.80

May 2022	2022.80	1 October 2022	1.000
November 2022	2050.70	1 April 2023	1.014
May 2023	2067.00	1 October 2023	1.008
November 2023		1 April 2024	
May 2024		1 October 2024	

1. Use AWE when first published and disregard any later revisions.

Section 8 of the Regulation explains the method for the biannual AWE indexation factor. To work out a positive adjustment, the most recent AWE series prior to the indexation day is divided by the AWE series published for the period 6 months prior to this series. Then the indexation factor is rounded to 3 decimal places.

To calculate a biannually AWE indexed amount in sections 96, 97 or 103, multiply the corresponding AWE indexed amount from the previous indexation day by the current AWE indexation factor (greater than or equal to 1.000). For indexation days from 1 October 2023 onwards, round up the result to the nearest dollar (prior to this date it was the nearest whole \$10).

**Applicable adjustment factors for pre-Injury income amounts.**

Section 11 of the Regulation tells you how to work out the AWE adjustment factor for an amount of pre-injury income. These amounts are adjusted on a biannual basis. To make a positive adjustment, the most recent AWE series published prior to the adjustment day is divided by the AWE series published for the period 6 months prior to the adjustment day to determine an adjustment factor. The factor is worked out to three decimal places. An amount is AWE adjusted by multiplying an applicable factor by the pre-injury income amount on an adjustment day. The AWE adjusted pre-injury amount is then rounded up to the nearest dollar.

The applicable factor for an adjustment day may vary depending on the start date for a person’s income replacement benefits under section 101 of the MAI Act. This will occur in circumstances where a negative adjustment, from a previous adjustment day, has not yet been fully offset for amounts with a given start date. An adjustment factor of one is applied to an amount if a negative adjustment applies.

The table shows the factor to be applied to an injured person’s pre-injury income on an adjustment day for a given range of start dates for an income replacement payment.

Start date range	Adjustment Day and Factor								
	1 Oct 2020	1 Apr 2021	1 Oct 2021	1 Apr 2022	1 Oct 2022	1 Apr 2023	1 Oct 2023	1 Apr 2024	1 Oct 2024
01/02/2020 - 30/09/2020	1.015	1.019	1.017	1.036	1.000	1.014	1.008		
01/10/2020 - 31/03/2021		1.019	1.017	1.036	1.000	1.014	1.008		
01/04/2021 - 30/09/2021			1.017	1.036	1.000	1.014	1.008		
01/10/2021 - 31/03/2022				1.036	1.000	1.014	1.008		
01/04/2022 - 30/09/2022					1.000	1.014	1.008		
01/10/2022 - 31/03/2023						1.014	1.008		
01/04/2023 - 30/09/2023							1.008		
01/10/2023 - 31/03/2024									
01/04/2024 - 30/09/2024									

**Worked example of adjusting pre-injury weekly income across multiple adjustment days**

Ray’s pre-injury weekly income (PIWI) is \$2,000. The start date for Ray’s income replacement benefit entitlement is 1 September 2020.

On adjustment day 1 October 2020, the 1<sup>st</sup> adjustment factor (1.015) is applied to Ray’s PIWI:

$$\$2,000 \times 1.015 = \$2,030$$

From the next complete payment week following 1 October 2020, this 1<sup>st</sup> adjusted PIWI (\$2,030) is the PIWI now used as part of calculating Ray’s income replacement benefits.

On adjustment day 1 April 2021, Ray’s 1<sup>st</sup> adjusted PIWI (\$2,030) is further adjusted by the 2<sup>nd</sup> adjustment factor:

$$\$2,030 \times 1.019 = \$2,068.57$$

$$\text{Rounded up to the nearest dollar} = \$2,069$$

From the next complete payment week following 1 April 2021, this 2<sup>nd</sup> adjusted PIWI (\$2,069) is the PIWI now used as part of calculating Ray’s income replacement benefits.

This compounding of the PIWI with positive adjustment factors will continue for subsequent adjustments days and future calculations of income replacement benefits.
